

The Commuter TE-380 stands out above the competition. There's only one thing you can't get once you own a Commuter TE-380. A better three-wheeler! See one today at your closest dealer.

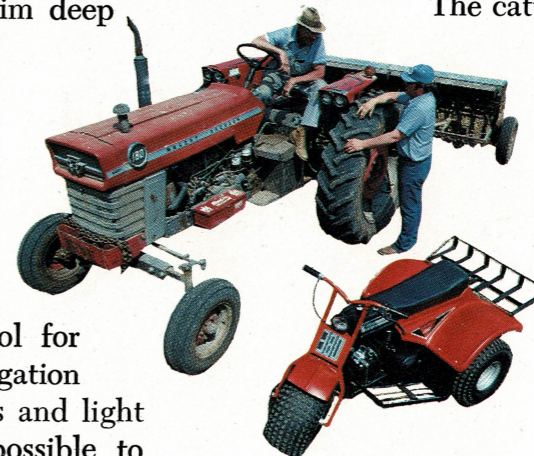

Commuter
three wheeled work force

Commuter TE-380 — The Three Wheeled Work Force. The reasons for buying a Commuter are various, but no matter where you live or what you do a three-wheeler can make it easier.

The hunter finds the Commuter a modern day pack mule. It will take him deep into the woods where not even four-wheel drive vehicles can go. And when the game is bagged the 400 lb. load capacity of the TE-380 will carry it out.

The crop farmer finds the Commuter a indispensable tool for checking and changing irrigation systems. The low pressure tires and light weight Commuter makes it possible to check crops without compacting or damaging the soil.

Mount the herbicide sprayer and eliminate several hired hands by spraying Johnson grass and weeds in your cotton fields. The sprayer is handy for spraying livestock, fence rows, weeds in pastures and much more.

The cattle and hog farmer will find the Commuter to be the most useful chore tool on the farm. Whether you are rounding them up or checking new-borns, the self-shifting automatic transmission cannot be equaled.

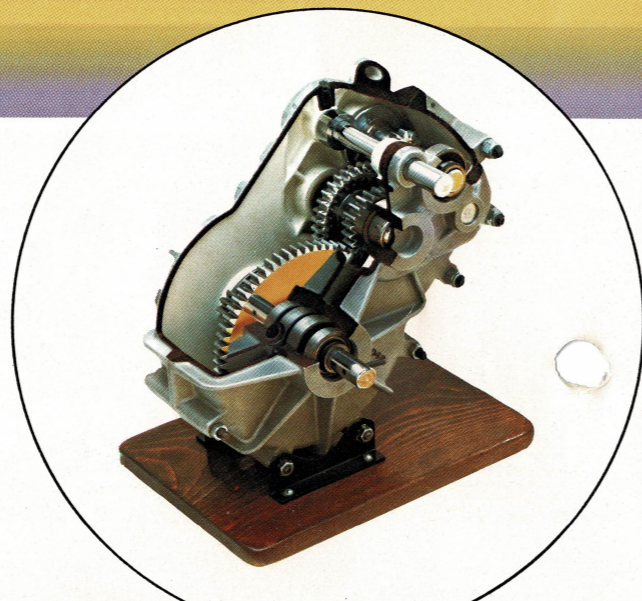

Construction workers, highway departments, forest service people, surveyors, oil field explorers, treasure hunters, farmers, ranchers, hunters. — Think about it; wouldn't a Commuter TE-380 make your job easier! It will never sit idle!

The Commuter TE-380 drive system is the only one of its kind. No one else can match it with a full one year warranty. From the cast-iron Kohler engine, to the large diameter torque converter, to the only transaxle drive system available today, the Commuter TE-380 is years ahead of the rest.

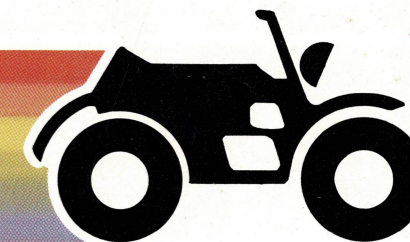

Commuter's maintenance free transaxle has hardened steel gears running in oil inside a sealed case. There are no roller chains or adjustments to ever worry about.

The Kohler engine is all cast iron and rebuildable, not a throw-a-way aluminum engine like the competition.

Yes, you may pay a little more for a Commuter but you cannot buy a better three-wheeler anywhere!

Commuter three-wheelers are available with a closed belt drive system making water crossings a cinch.

Dimensions
 Weight - 298 lbs.
 Length - 71" (without rear carrier)
 Width - 40"
 Wheel Base - 48"
 Height - 41" (at handle bars)
 Ground Clearance - 9" (under engine)
