**The Tri-Sport 3-Wheeler. Not one but a whole group of new motorcycles that take up where the others leave off. Just what you've been looking for to get you off and running – to your favorite play spot or anywhere else that the fun takes you. Shoot across dunes, charge up hills or swallow up shorelines in flat-out, mind-streaking runs. If you haven't found what you're looking for elsewhere, get it on with Tri-Sport – the OTHER motorcycle by Promark.**

**BAJA SCOUT.** Tri-Sport presents the most practical motorcycle going. Look at it for yourself. You'll find a full-sized adult machine that's really built to take it. Wide oval flotation type tires, rugged heavy duty frame and more. You'll be surprised at its ease of handling and comfort. Try it. It'll do wonders for your ego.

**BAJA CUB.** A great little motorcycle. The baby of the Tri-Sport pack. Made just for your youngster. To let him explore the real-life world of motorcycles. Safely, on his own, without any help from anyone. It's his kind of fun machine, the one motorcycle he can really trust. The Baja Cub. There's no better way to start.

**BAJA SPORTSMAN.** It'll take you wherever fun leads – hunting, fishing, bird-watching and beyond. Wide oval flotation type tires skim over dirt, dunes and rugged terrain. Powerful running lights, roll bar, electric start. For the sportsman it turns the outdoors into a whole new ball game. You'll feel right at home bragging about this one. Versatile, comfortable, easy to handle. Over 100 mile range on a 3 gallon tank of gas.

**THE DAYTONA BLAZER.** No need to hold yourself back. A twist of the throttle and you're off – heading straight for the horizon. Our Daytona Blazer is racier, and built closer to the ground than most other models. Low profile rear tires develop more thrust. And it's equipped with a real hi-performance 340 cc engine! All the power you could ask for. On track or off, the Daytona Blazer will add a whole new dimension to your sporting fun. Ride it for all it's worth.

**BAJA NOMAD.** If ever there was a "soft touch" in a rugged, off-road vehicle, this is it. Because the Baja Nomad features independent HD shocks at all three wheels. It takes the roughest going in stride. Even Mom could zap around and enjoy this one. Husky 5 or 8 HP engines work like tigers. You can leave it all behind when you strike out 'cross country in the Baja Nomad.

**BAJA ROVER.** A classy performer at an easy-to-take price. Engineered for high spirited fun. Power that assures fast starts and sure-footed cruising. Stable, low-slung, terrain-hugging design lets the whole family handle it. If you're ready to ride, here's the one. The Baja Rover.
