

## Sensors for Engine Management v 3.0

Sensoren für Motormanagement  
Capteurs pour gestion moteur  
Sensores para la gestión del motor  
Sensori per la gestione del motore  
Датчики системы управления двигателем

## The Company

Alongside our many specialised solutions for automotive manufacturers, we also offer comprehensive solutions and services for the aftermarket. Spare parts of matching quality, supplied with the experience and proven expertise of an OEM supplier are a particular strength. Our comprehensive range of spare parts of matching quality is readily available and is synonymous with a perfect fit, simple installation and consistently reliable quality, offering significant advantages for distributors, workshops and consumers alike.

## Das Unternehmen

Neben unseren speziellen und vielfältigen Lösungen für Automobilhersteller bieten wir umfassende Lösungen und Serviceaktivitäten für den Aftermarket. Hierzu zählen insbesondere qualitativ gleichwertige Ersatzteile, die wir mit dem Wissen und der langjährigen Kompetenz eines Erstausrüsters anbieten. Das umfassende und zeitnah verfügbare Leistungsspektrum an Ersatzteilen steht für Passgenauigkeit, einen einfachen Einbau sowie gleichbleibende Qualität. So bieten qualitativ gleichwertige Ersatzteile Großhändlern, Werkstätten und Endkunden gleichermaßen deutliche Vorteile.

## L'entreprise

Parallèlement à nos solutions particulières et multiples pour les constructeurs automobile nous offrons des solutions et des activités de service étendues pour l'Aftermarket (marché de pièces de rechange et d'accessoires). En font partie en particulier les pièces détachées qualitativement équivalentes que nous proposons avec le savoir et la compétence de longue durée d'un premier équipementier de série. La gamme étendue de fournitures, disponibles à brève échéance, de pièces détachées représente la précision de l'assemblage, un montage simple ainsi qu'une qualité constante. Ainsi les pièces détachées qualitativement équivalentes offrent des avantages nets de la même manière aux grossistes, aux garages et aux clients finaux.

## Nuestra empresa

Además de las soluciones especiales y variadas que producimos para fabricantes de automóviles, ofrecemos numerosas soluciones y actividades de servicio para el mercado postventa. Entre éstas destacan en particular los recambios de calidad equivalente, que ofrecemos al mercado con los conocimientos y el nivel de competencia, forjados durante muchos años, de un fabricante de primeros equipos. Nuestro amplísimo espectro de recambios, disponibles al poco tiempo de aparecer en cada modelo de automóvil, se caracterizan por su precisión de ajuste, su montaje sencillo y su calidad constante. Por ello, los recambios de calidad equivalente suponen por igual claras ventajas para mayoristas, talleres y clientes finales.

## La società

Oltre a numerose soluzioni specializzate per i produttori di automobili offriamo soluzioni e servizi ad ampio spettro per il settore aftermarket (pezzi di ricambio e accessori). Tra questi rientrano in particolare pezzi di ricambio qualitativamente equivalenti che offriamo con il know-how e l'esperienza pluriennale di un fornitore OEM. La vasta gamma di pezzi di ricambio rapidamente disponibili rappresenta una soluzione ottimale, facilmente installabile e di qualità costante. I pezzi di ricambio qualitativamente equivalenti offrono pertanto ai distributori, alle officine e ai clienti finali notevoli vantaggi.

## Компания

Помимо узкоспециальных и широкопрофильных решений для автопроизводителей мы готовы предложить комплексные решения, включая набор сервисных операций, для послепродажного обслуживания автомобилей. В частности, по качеству равноценные оригинальным запасные части, которые мы, как предприятие-изготовитель, предлагаем партнерам на базе наших знаний и многолетнего опыта. С учетом широкого спектра услуг и возможности поставок в кратчайшие сроки гарантирована точность изготовления изделий, простой монтаж и стабильное качество производства. Поэтому приобретая по качеству равноценные оригинальным запасные части у нас, оптовые покупатели, промышленные предприятия и конечные пользователи в одинаковой степени получают очевидные преимущества.

## Sensing and forwarding information

A wide variety of information is required to ensure reliable, safe and efficient vehicle operation. Sensors capture and transmit the necessary data. To fulfil this task they need to be resistant to temperature, moisture, dirt and chemicals. So that the information provided is as reliable as possible the sensors also need to function perfectly within electromagnetic fields and in the presence of other sensors, in addition to offering a long service life.

Sensors can help cut fuel consumption and harmful emissions. They play a part in boosting engine efficiency and vehicle safety to ensure greater driving comfort and enjoyment. Defective sensors can lead to engine management faults and in worstcase scenarios cause engine damage.

## Impulse aufnehmen – Informationen weitergeben

Um einen störungsfreien, sicheren und effizienten Betrieb eines Fahrzeugs zu gewährleisten, ist es notwendig, über unterschiedlichste Daten zu verfügen. Sensoren greifen diese Daten ab und leiten sie weiter. Hierbei müssen sie besonders temperaturbeständig sein und unempfindlich gegenüber Feuchtigkeit, Schmutz und Chemikalien. Um eine zuverlässige Informationsbasis zu bieten, müssen sie überdies auch in elektromagnetischen Feldern und im Umfeld von anderen Sensoren störungsfrei arbeiten sowie über eine lange Lebensdauer verfügen.

Sensoren können dazu beitragen, den Kraftstoffverbrauch und die Schadstoffemissionen zu reduzieren. Sie helfen, die Motoreffizienz und die Fahrsicherheit zu erhöhen und sichern hierüber Fahrkomfort und Fahrvergnügen. Defekte Sensoren können zu Fehlern im Motormanagement führen und im schlimmsten Fall Motorschäden hervorrufen.

## Envoi et réception d'informations

De nombreuses informations sont nécessaires pour assurer le bon fonctionnement, la sécurité et la fiabilité d'un véhicule. Les capteurs servent à collecter et à transmettre de telles données. Pour effectuer la tâche qui leur est assignée, ces capteurs doivent résister aux variations de température, à l'humidité, à la saleté et aux produits chimiques. Pour pouvoir fournir des informations aussi fiables que possible, les capteurs doivent, outre leur grande durabilité, fonctionner parfaitement dans un milieu électromagnétique et en présence d'autres capteurs.

Les capteurs peuvent, par exemple, permettre de réduire la consommation de carburant et les émissions polluantes. Ils jouent un rôle important dans l'efficacité du moteur et la sécurité du véhicule et assurent un plus grand confort de conduite. Des capteurs défectueux peuvent entraîner une panne moteur et, dans le pire des cas, l'endommager.

## Medición y envío de información

Se requiere una gran cantidad de información para garantizar el funcionamiento fiable, seguro y eficiente del vehículo. Los sensores captan y transmiten los datos necesarios. Para llevar a cabo esta tarea necesitan ser resistentes a la temperatura, humedad, suciedad y productos químicos. Para que esa información sea tan fiable como sea posible, los sensores también necesitan funcionar perfectamente aún dentro de campos electromagnéticos, o en presencia de otros sensores, además de ofrecer una larga vida de servicio. Los sensores pueden ayudar a reducir el consumo de combustible y las emisiones nocivas. Juegan un papel importante a la hora de mejorar la eficiencia del motor y la seguridad del vehículo, y permitir un mayor confort y diversión en la conducción. Los sensores defectuosos pueden causar fallos en la gestión del motor, y en casos extremos incluso dañarlo seriamente.

## Acquisizione e invio dati

Per assicurare il funzionamento di un veicolo in tutta affidabilità, sicurezza ed efficienza, serve tutta una serie di informazioni. I sensori hanno il compito di rilevare e trasmettere tutti i dati necessari. A questo fine, devono essere in grado di resistere a temperature elevate, umidità, sporco e sostanze chimiche. Perché le informazioni trasmesse siano accurate, i sensori devono anche poter funzionare perfettamente in presenza di campi elettromagnetici e di altri sensori, oltre ad avere una lunga durata.

I sensori possono aiutare a ridurre il consumo di carburante e le emissioni nocive e contribuiscono ad aumentare l'efficienza del motore e la sicurezza del veicolo, assicurando così il massimo comfort e piacere di guida. Viceversa, un sensore difettoso può provocare guasti o, addirittura, danni irreparabili al motore.

## Получение и передача информации

Для обеспечения надежной, безопасной и эффективной работы автомобиля необходим широкий спектр данных. Необходимую информацию считывают и передают датчики. Для выполнения данных функций необходимо, чтобы датчик был устойчив к температурным нагрузкам, влажности, грязи и химическому воздействию. Для обеспечения максимальной достоверности получаемой информации датчик должен исправно функционировать в электромагнитном поле и непосредственной близости от других датчиков, а также иметь длительный срок службы. Датчики способны в значительной степени снизить потребление топлива и количество выбросов. Они также играют важную роль в повышении эффективности работы двигателя и обеспечении безопасности автомобиля, делая вождение более комфортным. Использование поврежденных датчиков может привести к ошибкам контроля над работой двигателя, а в худшем случае – к его повреждению.

### Mass Airflow Sensors

A growing focus on reducing CO<sub>2</sub> emissions means that mass airflow sensors are becoming increasingly important in ensuring the optimum air fuel ratio. Mass airflow sensors are positioned directly after the air filter in the intake manifold and supply information on temperature, humidity and intake air volume. Despite their highly compact construction they feature precision technology to capture information which – together with other engine data – enables optimum engine management.

This data includes:

- Intake air temperature
- Intake air humidity
- Intake air volume

In gasoline engines, mass airflow measurement is used in conjunction with other sensor readings to regulate the supply of fuel to the engine.

In diesel engines, mass airflow sensors are used to regulate the exhaust gas recirculation rate and calculate the maximum injection quantity.

VDO mass airflow sensors are exceptionally reliable and highly capable of withstanding environmental factors. Their dynamic measurement ability makes an important contribution to reducing vehicle emissions.

### Luftmassenmesser

Mit zunehmender Relevanz der CO<sub>2</sub>-Reduzierung werden auch Luftmassenmesser immer wichtiger für ein optimales Mischungsverhältnis. Luftmassenmesser sitzen direkt hinter dem Luftfilter im Ansaugrohr und liefern Informationen über Temperatur, Luftfeuchtigkeit und die Menge der angesaugten Luft. Trotz ihrer sehr kompakten Bauweise verfügen sie über eine hochpräzise Technik, mit der sich – unter Einbeziehung weiterer Motorkenndaten – wertvolle Informationen für ein perfektes Motormanagement ableiten lassen.

Hierzu gehören:

- Temperatur der Ansaugluft
- Luftfeuchtigkeit der Ansaugluft
- Menge der Ansaugluft

Bei Benzinmotoren wird die Luftmassenmessung in Verbindung mit anderen Sensormessungen zur Regulierung der Kraftstoffzufuhr zum Motor verwendet.

Bei Dieselmotoren dient der Luftmassenmesser zur Regelung der Abgas-Rückführrate (AGR-Rate) und zur Berechnung der maximalen Einspritzmenge.

VDO Luftmassenmesser sind besonders zuverlässig und robust gegenüber Umwelteinflüssen. Durch ihr dynamisches Messvermögen tragen sie entscheidend zur Reduzierung von Fahrzeugemissionen bei.

### Capteurs débit masse

L'intérêt accru pour la réduction des gaz carboniques signifie que les capteurs débit masse sont de plus en plus importants pour assurer un rapport air/carburant optimal. Les capteurs débit masse sont placés juste après le filtre à air dans le collecteur d'air et fournissent des informations sur la température, l'humidité et le volume d'air entrant. Malgré leur taille réduite, ces capteurs sont d'une grande précision technologique et les informations enregistrées sont utilisées avec les autres données moteur pour assurer la gestion optimale du moteur.

Ces données sont :

- Température de l'air entrant
- Humidité de l'air entrant
- Volume d'air entrant

Dans les moteurs à essence, le calcul du débit masse est utilisé avec les données fournies par les autres capteurs pour réguler l'arrivée de carburant dans le moteur.

Dans les moteurs diesel, les capteurs débit masse sont utilisés pour réguler le taux de recirculation des gaz de carter et calculer l'injection optimale.

Les capteurs débit masse VDO sont particulièrement fiables et parfaitement adaptés pour supporter leur environnement. Les données dynamiques qu'ils fournissent, contribuent à la réduction des émissions polluantes.

### Sensores de masa de aire

Como consecuencia de la creciente preocupación por la reducción de las emisiones de CO<sub>2</sub>, los sensores de masa de aire se están convirtiendo en un elemento cada vez

más importante para asegurar una óptima proporción de mezcla combustible. Los sensores de masa de aire se sitúan directamente después del filtro de aire, en el colector de entrada, y proporcionan información de temperatura, humedad y volumen del aire entrante. A pesar de su construcción compacta, utilizan una tecnología muy precisa capaz de capturar información que, junto a otros datos del motor, permite una óptima gestión del motor.

Estos datos incluyen:

- Temperatura del aire de entrada
- Humedad del aire de entrada
- Volumen del aire de entrada

En motores de gasolina, la medición de masa de aire se utiliza en conjunción con los datos de otros sensores para regular el suministro de combustible al motor.

En motores diesel, los sensores de masa de aire se utilizan para regular la tasa de recirculación del gas de salida y calcular la máxima cantidad de inyección.

Los sensores de masa de aire de VDO son excepcionalmente fiables y muy capaces de tolerar factores ambientales.

Su capacidad de medición dinámica constituye un factor importante para reducir las emisiones del vehículo.

### Misuratori massa aria-Debimetri

Una sempre maggiore attenzione al problema dei gas di scarico significa che i misuratori della massa d'aria/debimetri assumono un'importanza crescente nell'assicurare il rapporto aria/carburante ideale. I sensori che misurano la massa e il flusso d'aria sono posti immediatamente dopo il filtro dell'aria nel collettore di aspirazione e forniscono informazioni su temperatura, umidità e volume dell'aria aspirata. Si tratta di dispositivi di dimensioni molto ridotte e che richiedono una tecnologia di estrema precisione per rilevare informazioni che, insieme agli altri dati relativi al motore, permettono la gestione ottimale dello stesso.

I dati specifici comprendono:

- temperatura dell'aria aspirata
- umidità dell'aria aspirata
- volume dell'aria aspirata

Nei motori a benzina, la misurazione del flusso d'aria è usata unitamente ai dati provenienti da altri sensori per regolare la fornitura di carburante al motore.

Nei motori diesel invece, la misurazione della massa d'aria è utilizzata per regolare il tasso di riciccolo dei gas di scarico e calcolare la massima quantità da iniettare.

I misuratori della massa d'aria/debimetri VDO sono eccezionalmente affidabili e in grado di sopportare tutta una serie di fattori ambientali. La loro capacità di misurazione dinamica offre un importante contributo in termini di riduzione dei gas di scarico.

### Датчики массового расхода воздуха

Ввиду повышенного внимания к проблеме снижения выхлопов CO<sub>2</sub>, датчики массового расхода воздуха приобретают особую важность для обеспечения оптимального соотношения воздуха и топлива в смеси. Датчики массового расхода воздуха расположены непосредственно за воздушным фильтром во впускном коллекторе. Эти датчики передают информацию о температуре, влажности и объеме всасываемого воздуха. Несмотря на весьма компактные размеры, в приборах использована технология повышения точности считываемых данных, которая, вместе с использованием других параметров, позволяет прекрасно контролировать работу двигателя.

Используемые данные:

- температура всасываемого воздуха,
- влажность всасываемого воздуха,
- объем всасываемого воздуха.

В бензиновых двигателях измерение массового расхода воздуха используется в комбинации с показаниями других датчиков для регулировки подачи топлива в двигатель.

В дизельных двигателях датчики массового расхода воздуха используются в процессе управления рециркуляцией выхлопных газов и расчета максимального объема впрыска.

Датчики массового расхода воздуха VDO исключительно надежны и невосприимчивы к внешним факторам. Возможность считывания данных в динамике работы двигателя играет важную роль в механизме снижения выхлопов.

### Wheel Speed Sensors

The wheel speed signal is crucial for electronic systems like ABS or ASC.

### Raddrehzahlsensoren

Das Raddrehzahlsignal ist eine wichtige Größe für elektronische Regelsysteme wie ABS oder ASR.

### Capteurs de vitesse de roue

La vitesse de roue est une donnée essentielle pour les systèmes électroniques tels que l'ABS ou l'ASC.

### Sensores de velocidad de la rueda

La señal de velocidad en la rueda es crucial para sistemas electrónicos como el ABS o el ASC.

### Sensori velocità ruote

I sensori di giri misurano la velocità delle ruote ed il relativo segnale, di fondamentale importanza per sistemi elettronici come l'ABS o l'ASC, è trasmesso alla centralina di controllo. In caso di guasto la sicurezza dell'intero sistema viene irrimediabilmente compromessa.

### Датчики скорости вращения колеса

Данные о скорости вращения колеса играют ключевую роль в работе таких электронных систем, как ABS или ASC.

### Camshaft Sensors

The camshaft sensor is located in the cylinder head and reads the camshaft sprocket to determine the position of the camshaft. This information is required for functions such as initiating injection on sequential injection engines, the trigger signal for the magnet valve on pump valve injection systems and for cylinder-specific knock control.

### Nockenwellensensoren

Der Nockenwellensensor sitzt im Zylinderkopf und tastet den Zahnkranz der Nockenwelle ab, um deren Position zu bestimmen. Diese Informationen werden beispielsweise für den Einspritzbeginn bei der sequenziellen Einspritzung, für das Ansteuerungssignal des Magnetventils beim Pumpe-Düse-Einspritzsystem und für die zylinderselektive Klopfregelung benötigt.

### Capteurs d'arbre à cames

Le capteur d'arbre à cames est situé sur la tête de cylindre et lit la position du pignon pour déterminer celle de l'arbre à cames. Ce type de donnée est nécessaire pour des fonctions telles que le lancement de l'injection sur des moteurs à injection séquentielle, le signal du régulateur de pression de la valve électromagnétique de la pompe à injection et le contrôle du cliquetis d'un cylindre particulier.

### Sensores del árbol de levas

El sensor de árbol de levas está colocado en la cabeza del cilindro, y lee la posición del árbol de levas gracias a una rueda dentada. Se necesita esta información para iniciar la inyección en motores de inyección secuencial, o activar la señal para la válvula magnética en sistemas con bomba de inyección con válvula o para el control de la detonación en cada cilindro.

### Sensori albero a camme

Il sensore dell'albero a camme si trova nella testata e ha la funzione di leggere l'ingranaggio per determinare la posizione dell'albero. Questo dato è utilizzato per dare il via all'iniezione in motori a iniezione sequenziale, come segnale per la valvola magnetica nei sistemi pompa-iniettore e per il controllo del battito in testa su ciascun cilindro.

### Датчики распределительного вала

Датчик распределительного вала передает данные о текущем положении распределительного вала. Эта информация необходима для обеспечения таких функций, как инициация впрыска в двигателях последовательного впрыскивания, подачи запускающего сигнала для магнитного клапана в системах впрыскивания со всасывающим клапаном, а также для контроля детонационного сгорания в цилиндрах.

### Crankshaft Sensors

The crankshaft sensor supplies information on the crankshaft's current position, which the engine management system can then use to calculate rpm. These values make it possible to determine the most economical fuel injection and ignition timing for a vehicle.

### Kurbelwellensensoren

Der Kurbelwellensensor liefert Informationen über die aktuelle Kurbelwellenposition, mit denen das Motormanagement-System die Drehzahl berechnen kann. Mit diesen Werten lässt sich der wirtschaftlichste Einspritz- und Zündzeitpunkt des Fahrzeugs berechnen.

### Capteurs de vilebrequin

Le capteur de vilebrequin fournit des informations sur la position du vilebrequin que le système de gestion moteur utilise pour calculer le régime moteur. Ces données permettent de déterminer l'injection de carburant la plus économique et le moment de l'amorçage.

### Sensores del cigüeñal

El sensor del cigüeñal informa de su posición actual, que el sistema de gestión del motor utiliza para calcular las r.p.m. Estos datos hacen posible determinar los tiempos de inyección y encendido más económicos.

### Knock Sensors

Modern engines which allow high compression ratios have a distinct disadvantage: their design leads to increased knocking, which can damage the engine. Knock sensors reliably measure the vibration of the engine block that is characteristic of engine knocking. This allows the firing angle and other parameters to be set such that the engine continues to function correctly close to the knock threshold. This not only protects the engine but also reduces fuel consumption. To ensure maximum precision, VDO knock sensors deploy groundbreaking bandwidth technology.

### Klopfsensoren

Moderne Motoren, die ein hohes Verdichtungsverhältnis ermöglichen, haben einen entscheidenden Nachteil: Ihre Konstruktionsweise führt zu einem verstärkten Klopfen, das dem Motor schaden kann. Klopfsensoren messen zuverlässig die für das Motorklopfen charakteristischen Motorblock-schwingungen. Hierüber können Zündwinkel und andere Betriebsparameter optimal eingestellt werden, damit der Verbrennungsmotor nahe der Klopfgrenze arbeitet. So wird nicht nur der Motor geschützt, sondern auch der Kraftstoffverbrauch reduziert. Für eine maximale Präzision der Messergebnisse nutzen VDO Klopfsensoren bereits heute zukunftsweisende Breitbandtechnologie.

### Capteurs de cliquetis

Les moteurs modernes qui permettent des taux de compression élevés, ont un inconvénient particulier : leur conception augmente les vibrations qui peuvent endommager le moteur. Les capteurs de cliquetis mesurent précisément les vibrations du bloc moteur qui caractérisent les cognées du moteur. Cela permet de configurer l'angle d'amorçage et les autres paramètres de façon que le moteur fonctionne correctement sans dépasser le seuil de vibrations maximum. Cela permet également de protéger le moteur et de réduire la consommation de carburant. Pour assurer une précision optimale, les capteurs de cliquetis VDO renferment toutes les technologies modernes.

### Sensori albero a gomiti

Il sensore dell'albero a gomiti fornisce informazioni sulla posizione attuale dell'albero e i dati trasmessi sono utilizzati dal sistema di gestione del motore per calcolare il regime. Questi valori permettono di calcolare l'iniezione di carburante nei tempi necessari ad una corretta accensione.

### Датчики коленчатого вала

Датчик коленчатого вала передает информацию о текущем положении коленчатого вала, которая используется системой регулирования работы двигателя для расчета оборотов в минуту. Данные показания позволяют установить наиболее экономичный режим впрыскивания топлива и синхронизировать зажигание.

### Sensores de detonación

Los motores modernos que permiten relaciones de compresión elevadas, tienen un claro inconveniente: su diseño incrementa el golpeteo (detonación) y puede dañar el motor. Los sensores de detonación miden de forma fiable la vibración del bloque motor que indica claramente el golpeteo. Esto permite ajustar el ángulo de encendido y otros parámetros para que el motor funcione correctamente sin sobrepasar el umbral de golpeteo. Así no solo se protege el motor, también se reduce el consumo. Para garantizar la precisión, los sensores de detonación de VDO utilizan una tecnología con un ancho de banda puntero.

### Sensori battito in testa

I motori moderni che permettono rapporti di compressione elevati hanno il difetto di far aumentare il battito in testa, che può danneggiare il motore. Questi sensori misurano le vibrazioni del blocco motore, che sono caratteristiche del battito in testa, e permettono di impostare l'angolo di accensione e altri parametri in modo tale che il motore possa continuare a funzionare correttamente in prossimità dei valori soglia. Questo serve non solo a proteggere il motore, ma anche a ridurre il consumo di carburante. Per assicurare la massima precisione, i sensori del battito in testa VDO utilizzano una rivoluzionaria tecnologia basata sulla larghezza di banda.

### Датчики детонационного сгорания

Современные двигатели с высокой степенью сжатия имеют серьезный недостаток: повышенную силу детонации, способную повредить двигатель. Датчики детонационного сгорания с высокой точностью измеряют степень вибрации блока двигателя, характерной для процесса детонации. Это позволяет задать такой угол зажигания, а также другие параметры, что двигатель продолжает исправно работать в режиме близком к детонационному порогу. Данная процедура не только защищает двигатель от повреждения, но и снижает расход топлива.

## Pressure Sensors

MAP and T-MAP sensors measure the air pressure in the intake manifold behind the throttle valve to determine air intake. This information is extremely important for calculating the amount of fuel to be injected to ensure the correct air fuel mix. For this reason, the dynamic measurement capability of these engine management components is crucial in reducing vehicle emissions.

- MAP pressure sensor for turbocharged engines for measuring air pressure behind the turbocharger (measurement range 500–3000 hPa)
- T-MAP pressure sensor with integrated temperature sensor

## Drucksensoren

MAP- und T-MAP-Sensoren messen den Luftdruck im Ansaugkrümmer hinter der Drosselklappe, um die ange-saugte Luftmasse zu bestimmen. Diese Information ist für die Berechnung der einzuspritzenden Kraftstoffmenge besonders wichtig, da mit ihr das richtige Kraftstoff-Luft-Gemisch erreicht wird. So hat das dynamische Messvermögen dieser Motormanagement-Komponenten entscheidenden Einfluss auf die Reduktion der Fahrzeugemission.

- MAP Drucksensor für aufgeladene Motoren zur Messung des Luftdrucks hinter dem Turbolader (Messbereich 500–3000 hPa)
- T-MAP Drucksensor mit integriertem Temperaturfühler

## Capteurs de pression

Les capteurs MAP et T-MAP mesurent la pression de l'air dans le collecteur d'air derrière le papillon des gaz pour déterminer l'arrivée d'air. Ces données sont extrêmement importantes pour calculer la quantité de carburant qui doit être injectée et assurer un mélange gazeux adéquat. Les informations dynamiques fournies par ces composants sont essentielles à la réduction des gaz polluants.

- Le capteur de pression MAP des moteurs turbo mesure la pression de l'air derrière le turbocompresseur (échelle de 500 à 3 000 hPa).
- Le capteur de pression T-MAP est doté d'un capteur de température intégré.

## Sensores de presión

Los sensores MAP y T-MAP miden la presión de aire en el colector de entrada, detrás de la válvula del acelerador, para determinar la entrada de aire. Esta información es muy importante para calcular el combustible que debe inyectarse y garantizar una mezcla correcta. Por esta razón, la capacidad de medida dinámica de este elemento de gestión del motor es crítica para reducir las emisiones.

- Sensor de presión MAP para motores turbo para la medición de la presión de aire detrás del turbocompresor (rango de medida 500–3000 hPa)
- Sensor de presión T-MAP con sensor de temperatura integrado

## Sensori di pressione

Il sensore pressione aria collettore (MAP) e il sensore pressione/temperatura aria collettore (T-MAP) misurano la pressione dell'aria nel collettore di aspirazione dietro alla valvola a farfalla per determinare l'apporto d'aria. Questo permette di calcolare la quantità di carburante da iniettare per assicurare la miscela corretta di aria e carburante. La capacità di misurazione dinamica di questi componenti della gestione del motore è quindi cruciale ai fini della riduzione delle emissioni.

- Sensore pressione aria collettore (MAP) per motori turbocompressi per la misurazione della pressione dell'aria dietro il turbocompressore (gamma misurazione: 500–3000 hPa)
- Sensore pressione aria collettore con sensore di temperatura integrato (T-MAP)

## Датчики давления

Датчики MAP и T-MAP измеряют давление воздуха во впускном коллекторе после дроссельного клапана, позволяя определить объем всасываемого воздуха. Данная информация чрезвычайно важна для расчета объема впрыскиваемого топлива, для достижения правильного соотношения воздуха и топлива в смеси. Возможность измерять данные параметры функционирования двигателя в динамике работы играет ключевую роль в механизме снижения выхлопа.

- Датчик давления MAP для двигателей с турбонаддувом для измерения давления воздуха за турбокомпрессором (диапазон измерений 500–3000 гПа)
- Датчик давления T-MAP с интегрированным датчиком температуры

VDO – A Trademark of the Continental Corporation

The information provided in this brochure contains only general descriptions or performance characteristics, which do not always apply as described in case of actual use or which may change as a result of further development of the products. This information is merely a technical description of the product. This information is not meant or intended to be a special guarantee for a particular quality or a particular durability. An obligation to provide the respective characteristics shall only exist if expressly agreed in the terms of contract. We reserve the right to make changes in availability as well as technical changes without prior notice.

**Please note:**

**Application** – The products described in this catalogue are designed for use in land vehicles, engines and equipment.

**Disclaimer** – The data in this replacement parts catalogue has been compiled and processed for the purpose of presenting our replacement parts range and is correct to the best of our knowledge. Subject to technical alterations, errors and omissions.

Availability is not guaranteed. We cannot be held liable with regard to any information contained in the Continental Trading replacement parts catalogue except in case of intent, gross negligence or where mandatory liability is borne in accordance with German product liability law.

The VDO logo consists of the letters 'V', 'D', and 'O' in a bold, blue, sans-serif font. The 'V' and 'D' are connected at the top, and the 'O' is positioned to the right of the 'D'. The letters are set against a white background.
