

MRC Pontiac concludes public meetings on initial business case for the Energy-from-Waste project

Litchfield, QC – April 11th, 2024

Last night, the Pontiac MRC concluded its series of five public meetings to present the initial business analysis for the Energy-from-Waste (EFW) project. These MRC-initiated public presentations had been announced on March 21st and were held in Isle-aux-Allumettes (March 25th), Fort-Coulonge (March 27th), Shawville (April 3rd), Campbell's Bay (April 9th) and Otter Lake (April 10th). At these sessions, Corey Spence, mayor of Isle-aux-Allumettes and Jane Toller, Warden of the MRC Pontiac, presented the project's initial business analysis, prepared by Deloitte and Ramboll. The many participants in the public meetings had the opportunity to ask several questions, and the MRC would like to thank them for their contribution to the discussion on the project.

In accordance with its commitment made when announcing the public presentations, the MRC is making public the initial business analysis for the EFW project, prepared by Deloitte, and the feasibility study prepared by Ramboll. These two documents were prepared following the adoption by the Council of Mayors on October 25th, 2023, of Resolution C. M. EX-2023-10-05. Finally, a document prepared by the MRC summarizing the background to the process, the MRC's priorities and the highlights of the initial analysis is also made available online. This document was handed out to participants at the public presentations.
