Greetings.

We would like to collaborate wrt **AAF**; for which, we are progressing information for your kind update; in this document.

It is our immense pleasure to introduce American Air Filter (AAF), the World's No. 1 air filtration company. AAF holds a dominant position in the Pharmaceutical industry for its clean-room range of products and is recognized globally for its quality, expertise and innovation in air filtration. The company has led the industry for 100 years and is still dominating the air filtration industry with a turnover of over 150 crores in this region.

With a very humble beginning in 1921, AAF International today stands tall as a world leader in the air filtration industry. It is headquartered in Louisville, Kentucky, USA and has operations in 23 countries, 6 R&D centres and has 260 sales offices worldwide. Daikin Industries Ltd, a global leader in air-conditioning having revenue of US\$ 23Bn, acquired AAF in the year 2006.

AAF International entered the Indian market in 2006. It consolidated its presences by establishing 2 state-of-art manufacturing facilities in Bengaluru & Noida and is headquartered at Bengaluru. AAF India is the Centre of Excellence for EEMEA, CIS and SAARC countries. Over the past 14 years, AAF has occupied an advantageous position in the Indian market and has maintained the leading position in the filter industry.

The Bengaluru facility has India's first auto-scan tested HEPA and ULPA filters compliant with international standard EN 1822. All HEPA and ULPA filters produced by AAF are manufactured, tested and packed in an ISO Class 7 (100,000) clean-room environment.

AAF provides solutions for improving Indoor Air Quality (IAQ) (healthcare facilities, airports, control rooms & data centres & commercial complexes), cleanroom filtration and gas-phase products.

In the wake of the COVID-19 situation, there is enhanced emphasis on better IAQ to reduce the menace of viruses and pathogens for the health & safety of the occupants and below are the links to some of our solutions.

We have already bagged major orders in this region with many institutions for COVID-19 control systems wrt Air Purity and Virus Control Systems enhancing human safety.

Nevertheless to state that both **International Space Station (ISS)** and **ISRO** rely **exclusively on AAF**.

Already active segments are: Pharma Industry, Sensitive Electronics Industry, Hospital, Dental clinics, cosmetic surgery clinics, salons and many more like PVR, Citibank etc.

With your expertise, we would like to explore your in-house requirements and your associations with Private and Govt. Organisations wrt more application segments:

- Commercial spaces like offices, restaurants, malls, gyms
- Manufacturing companies – Offices and factories
- Schools and universities- <https://www.aafintl.com/en/commercial/market-insights/filtration-for-schools-and-universities>
- Government buildings, embassies and banks + more.
