# Who We Are

**GoFaster for Innovative Solutions is a dynamic and forward-thinking JSC company specializing in providing cutting-edge and transformative solutions for businesses across various industries.**

**With a deep understanding of the rapidly evolving technological landscape, we empower organizations to adapt, transform, and thrive in today's digital world.**

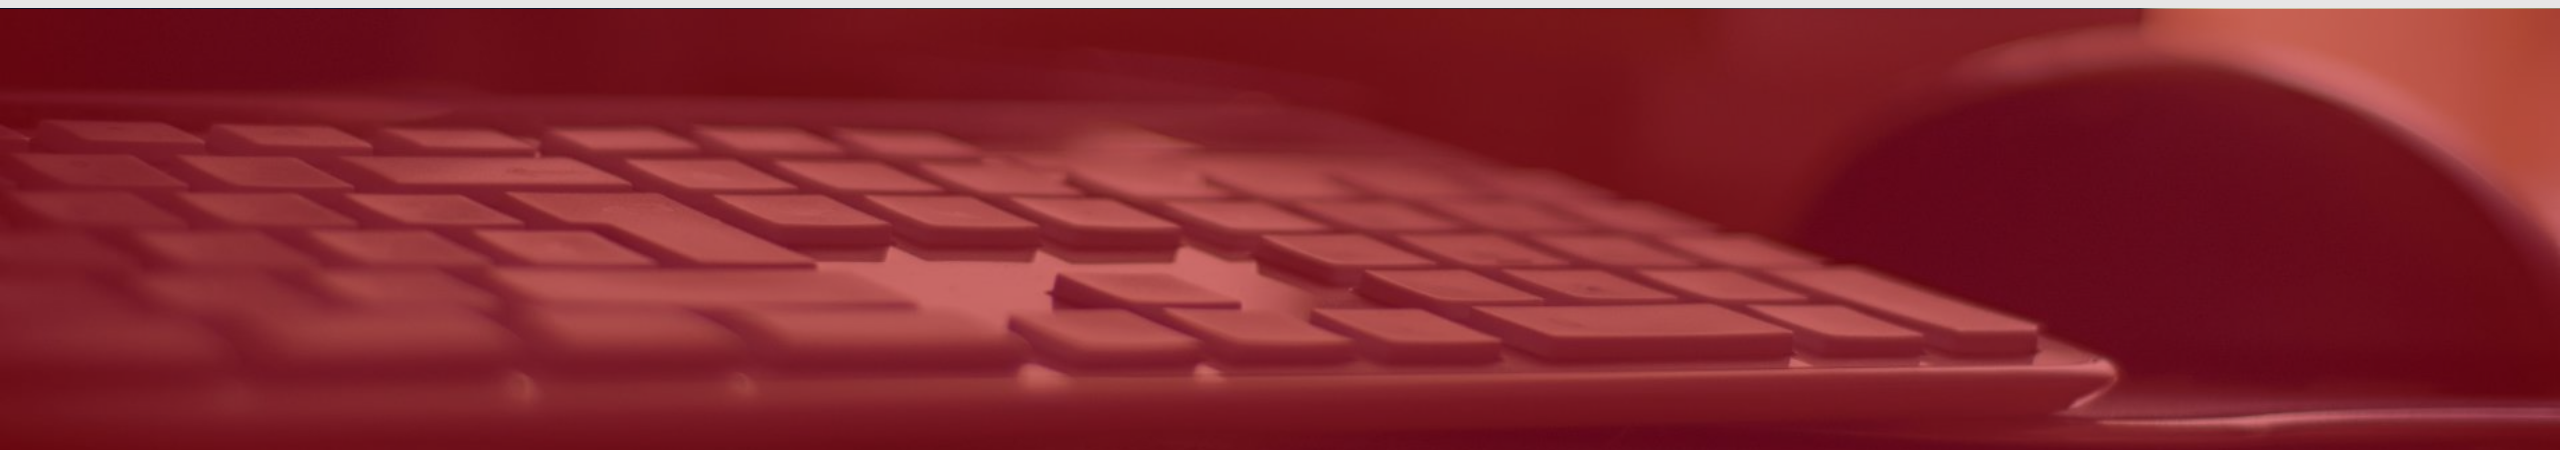

**Our goal is to accelerate business growth, enhance operational efficiency, and drive competitive advantage through advanced technologies and customizable solutions.**

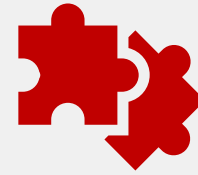

# Our Mission

**At GoFaster, our mission is to revolutionize the way businesses operate by leveraging the power of innovation and technology. We strive to create a future where organizations can stay ahead of the curve, achieve sustainable success, and drive positive change within their industries. Through our comprehensive range of services and solutions, we aim to be the trusted partner that propels businesses toward their goals in the digital era.**

# Our Vision

**Create and maintain strategic alliances with the top ICT vendors in the market to provide state-of-the-art solutions, products, and services.**

**Conduct market analysis periodically, employ experienced professionals, and adopt the latest technologies to enhance the business growth of our customers.**

**Expand our operations to new markets to become the leading solution provider in MEA and the most customer-centric, global leader in the IT industry.**

# Achievements

Provided technology and consultancy for more than 800 customers in various sectors, such as government, real estate, oil and gas, aviation, health care, finance and banking, telecommunications, transportation, and education.

Partner of the year 2022 for both the Middle East and North Africa region by Kaspersky, a global cybersecurity company.

Expanded our operations to Gulf regions as well as North and East Africa, becoming one of the fast-growing ICT service providers and security solutions in the Middle East.

# Key Achievements

**Kaspersky**

Announced as Partner of the Year 2019/2020/2021/2022 for both the Middle East and North Africa.

**Sophos**

Announced as Small Business Partner of the Year in Sophos EMEA Partner Award Winners 2022.

**+11 Awards**

**AmiViz**

Announced as Partner of the Year 2023 in the AmiViz Partner Excellence Awards.

**Fortinet**

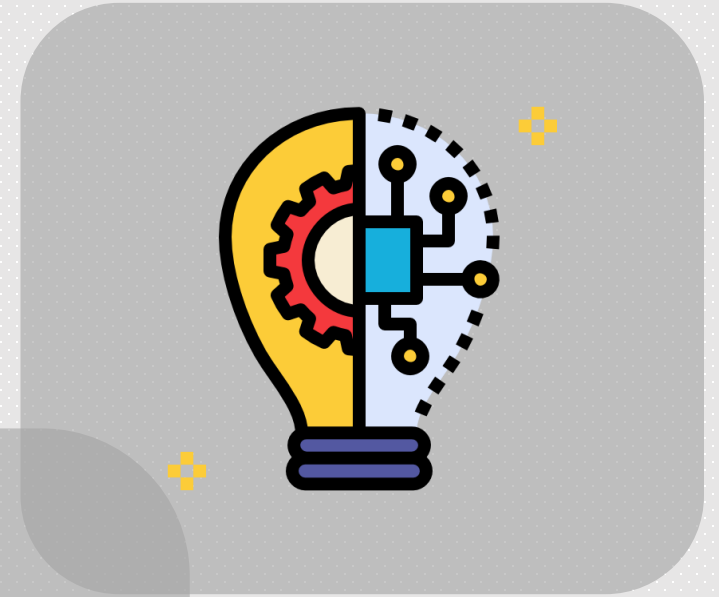

Announced as DLB partner of the year in 2019, 2020 Fortinet Partner of the Year Award Winners.

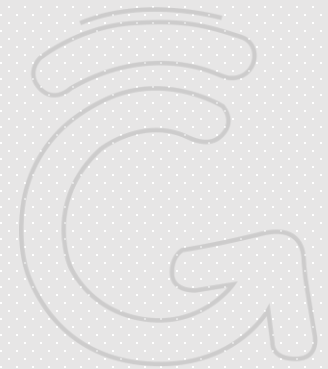

The background is a solid blue color. There are several abstract white line drawings scattered across the page. On the left, there are two overlapping, curved lines that resemble a stylized 'S' or a wave. In the center, there is a larger, more complex line drawing that looks like a hand or a set of fingers. On the right, there are two more overlapping, curved lines, similar to the ones on the left.

# **OUR CORE VALUES**

# 1 Innovation

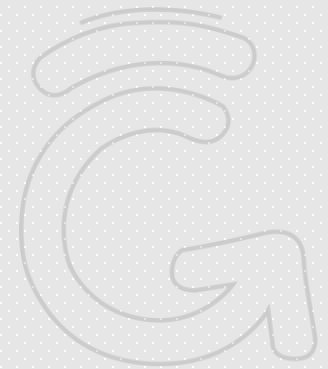

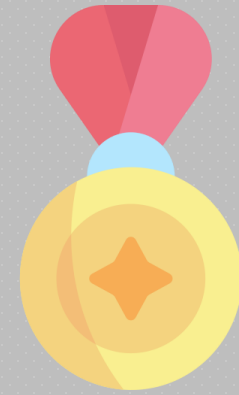

We foster a culture of innovation, encouraging our talented team of professionals to think creatively, explore new ideas, and push the boundaries of what is possible. By staying at the forefront of emerging technologies and industry trends, we deliver groundbreaking solutions that help our clients thrive in a rapidly changing business landscape.

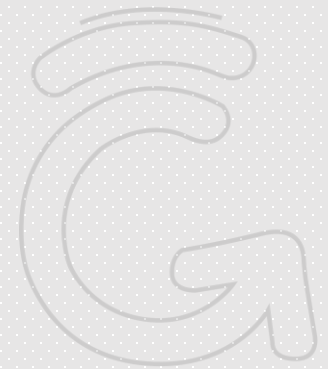

# Excellence

At GoFaster, we are committed to delivering excellence in all aspects of our work. From solution design and development to implementation and ongoing support, we maintain the highest standards to ensure our clients receive top-quality solutions that exceed their expectations. Our attention to detail, rigorous quality control processes, and commitment to continuous improvement set us apart as a trusted provider of innovative solutions.

# 3 Collaboration

We believe in the power of collaboration and teamwork. We foster strong relationships built on trust, transparency, and effective communication by working closely with our clients, partners, and employees. We value open dialogue and active engagement to ensure that our solutions are aligned with our client's goals and requirements. Together, we strive to achieve shared success and drive positive outcomes for all stakeholders involved.

# Customer-Centricity

Our clients are at the heart of everything we do. We place great emphasis on understanding their unique needs, challenges, and aspirations. By deeply understanding their business processes, goals, and pain points, we provide personalized solutions that address their specific requirements and drive their success. We are committed to building long-term partnerships with our clients, acting as their trusted advisors, and enabling them to leverage technology for sustainable growth.

# **Services and Solutions**

1

We help businesses navigate the digital landscape by developing comprehensive strategies and implementing transformative technologies. Our digital transformation solutions encompass cloud computing, data analytics, artificial intelligence, the Internet of Things (IoT), automation, and more. By leveraging these cutting-edge technologies, we empower organizations to streamline operations, improve customer experiences, and unlock new opportunities for growth.

**Digital Transformation**

# 2

Our expert development team creates customizable software solutions that align with our client's unique business objectives. From web and mobile applications to enterprise systems, we leverage the latest technologies and agile methodologies to deliver intuitive, scalable, and secure software solutions. Our custom software development services enable businesses to optimize their processes, enhance productivity, and gain a competitive edge in their respective markets.

# Custom Software Development

# 3

We provide strategic IT consulting services to guide organizations in making informed decisions about their technology investments. Our experienced consultants offer insights, recommendations, and roadmaps to help businesses optimize their IT infrastructure, enhance operational efficiency, and achieve their goals. Whether it is our technology strategy, solution architecture, or digital readiness assessment, we assist our clients in harnessing the full potential of technology to drive business success.

## IT Consulting

4

In today's digital landscape, data protection, and cybersecurity are paramount. We provide comprehensive cybersecurity solutions that safeguard businesses from evolving cyber threats. Our services include vulnerability assessments, penetration testing, security audits, security awareness training, and the implementation of robust security measures. With our cybersecurity expertise, businesses can protect their critical assets, maintain regulatory compliance, and build trust with their stakeholders.

Cybersecurity

# 5

We provide end-to-end managed IT services, ensuring that businesses have a reliable and secure IT infrastructure. Our services encompass network management, system monitoring, data backup and recovery, software updates, and technical support. By outsourcing their IT operations to us, organizations can focus on their core business functions, while we handle the day-to-day management and maintenance of their technology environment.

## Managed IT Services

# The True Driving Forces Behind Our Success

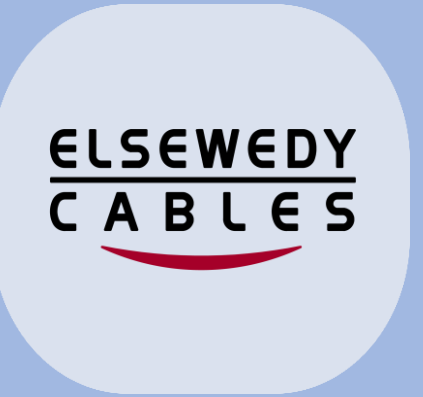

# Clientele

**We served diverse clients, including small and medium-sized enterprises (SMEs), startups, and large corporations. Our expertise spans industries such as finance, healthcare, manufacturing, retail, e-commerce, logistics, and more. We have a proven track record of successfully delivering innovative solutions to clients, helping them overcome challenges, seize opportunities, and achieve sustainable growth in their respective markets.**

MEA Clients

MEA Clients

# GCC Clients

# Our Partners

**In the dynamic landscape of modern business, partnerships play a pivotal role in fostering innovation and driving sustainable growth. At GoFaster, we recognize the immense value our partners bring to the table, as they serve as the driving force behind our pursuit of innovative solutions. Next, we aim to highlight the importance we place on these partnerships and delve into the multifaceted benefits they offer.**

# kaspersky

Kaspersky offers the following cybersecurity solutions for businesses:

1. **Endpoint Security:** Protects desktops, laptops, and mobile devices from malware and other threats.
2. **Security for Virtualization:** Ensures security for virtual machines and virtual desktop infrastructure.
3. **Security for Cloud:** Provides protection for public, private, and hybrid cloud environments.
4. **Threat Intelligence:** Offers real-time threat intelligence and analysis to identify and respond to emerging threats.
5. **Security Awareness Training:** Educates employees to recognize and prevent social engineering attacks.
6. **Industrial CyberSecurity:** Safeguards critical infrastructure in industrial control systems and operational technology environments.
7. **Fraud Prevention:** Helps prevent fraud in financial transactions across various channels.

# veeam

Veeam solutions for business:

1. **Veeam Backup & Replication:** Comprehensive backup, recovery, and replication for virtual, physical, and cloud-based workloads.
2. **Veeam Availability Suite:** Combines Veeam Backup & Replication with monitoring, reporting, and capacity planning tools.
3. **Veeam Agent for Microsoft Windows and Linux:** Extends data protection to physical servers, workstations, and cloud instances running Windows or Linux.
4. **Veeam Backup for Microsoft Office 365:** Protects Office 365 data, including Exchange Online, SharePoint Online, OneDrive for Business, and Microsoft Teams.
5. **Veeam Cloud Data Management:** Manages data across hybrid and multi-cloud environments, including backup, recovery, replication, and cloud-native backup.

Fortinet offers a range of cybersecurity solutions for businesses, including:

1. **FortiGate Next-Generation Firewalls:** Advanced network protection.
2. **FortiAnalyzer and FortiManager:** Centralized device management and log analysis.
3. **FortiWeb Web Application Firewalls:** Protects web applications from threats.
4. **FortiMail Email Security:** Guards against email-based threats.
5. **FortiSandbox:** Detects and analyzes advanced malware.
6. **FortiClient Endpoint Protection:** Comprehensive security for devices.
7. **FortiSIEM:** Real-time security event management.
8. **FortiAuthenticator:** Secure user authentication and access management.
9. **FortiGate Secure SD-WAN:** Optimizes network performance with secure connectivity.

Aruba's solutions for business:

1. **Aruba Wireless LAN:** Enterprise-grade Wi-Fi with high performance and security.
2. **Aruba ClearPass:** Access management for device onboarding and user authentication.
3. **Aruba Central:** Cloud-based network management platform for wired and wireless networks.
4. **Aruba Instant On:** Affordable and easy-to-deploy networking solutions for SMBs.
5. **Aruba SD-Branch:** Simplified branch office network deployment and management.
6. **Aruba ClearPass Device Insight:** Visibility and analytics for IoT and connected devices.
7. **Aruba Central AI Insights:** Cloud-based analytics and assurance for network performance.

Dell Technologies offers the following solutions for businesses:

1. **Infrastructure Solutions:** Servers, storage, networking, and converged/hyper-converged infrastructure.
2. **Data Storage Solutions:** SAN, NAS, and SDS for efficient data management and protection.
3. **Data Protection Solutions:** Backup, recovery, and disaster recovery solutions.
4. **Cloud Solutions:** Private, public, and hybrid cloud options.
5. **Workforce Transformation Solutions:** Laptops, desktops, mobile devices, and device management and security services.
6. **AI and Data Analytics Solutions:** HPC, AI infrastructure, and analytics software.
7. **IoT Solutions:** Secure connectivity, management, and analysis of IoT devices and data.

VMware solutions for business:

1. **vSphere:** Virtualization platform for server consolidation and management.
2. **vCenter Server:** Centralized management for VMware infrastructure.
3. **ESXi:** Bare-metal hypervisor for running virtual machines.
4. **Horizon:** Virtual desktop infrastructure for remote access to desktops and applications.
5. **NSX:** Software-defined networking for virtualized networks and enhanced security.
6. **vSAN:** Software-defined storage for scalable and highly available storage.
7. **Cloud Foundation:** Integrated platform for building and managing private and hybrid clouds.
8. **Workspace ONE:** Digital workspace platform for unified endpoint management and application delivery.
9. **Tanzu:** Products for modern application development and Kubernetes-based container management.

# Microsoft

## Microsoft solutions for business:

1. **Microsoft 365:** Productivity suite with apps like Word, Excel, PowerPoint, and Outlook.
2. **Azure:** Cloud computing platform for building and managing applications.
3. **Dynamics 365:** Intelligent business applications for sales, customer service, finance, and more.
4. **Azure AI:** Artificial intelligence services for vision, speech, language processing, and machine learning.
5. **Azure DevOps:** Development tools for source code management, CI/CD, project management, and monitoring.
6. **Dynamics 365 Business Central:** Business management solution for SMBs, integrating finance, sales, and more.
7. **Power BI:** Business analytics tool for data visualization and analysis.
8. **Intune:** Cloud-based MDM and MAM solution for secure device and app management.

# SOPHOS

## Sophos provides cybersecurity solutions for businesses, including:

1. **Endpoint Protection:** Advanced threat prevention for devices.
2. **Firewall and Network Security:** Next-generation firewalls and UTM appliances.
3. **Secure Email Gateway:** Protection against email threats.
4. **Secure Web Gateway:** Web filtering and protection against web-based threats.
5. **Mobile Security:** Security for mobile devices.
6. **Encryption:** Data protection for endpoints and during transmission.
7. **Centralized Management:** Cloud-based platform for managing security solutions.
8. **Managed Threat Response (MTR):** 24/7 threat monitoring and incident response.

**Note:** This is a condensed summary, and Sophos may have additional offerings and features.

# GROUP-IB

## Group-IB business solutions:

1. **Threat Intelligence:** Real-time info on cyber threats, vulnerabilities, and malicious actors.
2. **Incident Response and Forensics:** Swift response to cyber incidents, and forensic investigations.
3. **Fraud Prevention and AML:** Detection and prevention of fraud and money laundering.
4. **Threat Hunting and Proactive Defense:** Proactive search for and elimination of threats.
5. **Digital Risk Protection:** Monitoring and protection of digital assets, brand reputation, and customer data.
6. **Fraud Investigation and Cybercrime Prevention:** Investigation and prevention of cybercrimes.
7. **Training and Awareness:** Cybersecurity training programs for employees.

# ENTRUST

Entrust specializes in advanced software authentication platforms that enhance security across various identity and transaction networks. Their comprehensive solutions encompass both software and hardware components, enabling tasks such as financial card issuance, e-passport production, user authentication for secure network access, and secure financial transactions. Entrust also offers trust certificates for websites, mobile credentials, and an array of additional services to bolster security measures.

1. ID Issuance
2. Electronic and Digital Signature
3. Database Security
4. PostQuantumCryptography
5. Digital Card Solution
6. IDaaS
7. Cloud Security Management
8. Identity and Access Management
9. Public Key Infrastructure
10. Hardware Security Modules

The Cisco logo is displayed vertically on the left side of the slide. It consists of the word "CISCO" in a bold, sans-serif font, with a blue vertical bar to its right. The bar has several horizontal blue bars of varying lengths extending from it, creating a stylized representation of the word "CISCO".

**CISCO**

**Cisco business solutions:**

- 1. Networking Solutions:** Switches, routers, wireless access points, and network security devices.
- 2. Collaboration and Communication:** Cisco Webex, IP telephony systems, contact center solutions, unified communications.
- 3. Security Solutions:** Network security, threat intelligence, endpoint protection, secure access, cloud security.
- 4. Data Center and Cloud:** Data center networking, virtualization, cloud computing, data storage, and management.
- 5. Internet of Things (IoT):** Networking infrastructure, security, data analytics, and management platforms for IoT.
- 6. Software-defined Networking (SDN):** Cisco ACI, SD-Access for centralized control and programmability.
- 7. Analytics and Insights:** Solutions for data analysis, network performance optimization, and anomaly detection.

The Palo Alto Networks logo is displayed vertically on the left side of the slide. It features a stylized orange and white logo consisting of three slanted rectangular blocks. To the right of the logo, the word "paloalto" is written in a bold, lowercase, sans-serif font, with "NETWORKS" in a smaller, uppercase, sans-serif font above it.

**paloalto**  
NETWORKS

Palo Alto Networks offers a comprehensive range of cybersecurity solutions for businesses, including:

- 1. Next-Generation Firewall**
- 2. Threat Intelligence Cloud**
- 3. Advanced Endpoint Protection**
- 4. Cloud Security**
- 5. Secure Access Service Edge**
- 6. Zero Trust Network Access**
- 7. Network Traffic Analysis**
- 8. Security Operations**
- 9. Security-as-a-Service**
- 10. Threat Prevention and Detection**

# Forcepoint

Forcepoint is a cybersecurity company that provides a range of solutions for businesses to protect their networks, data, and users. Here are some of the key solutions offered by Forcepoint:

1. DLP (Data Loss Prevention)
2. Web Security
3. NGFW (Next-Generation Firewall)
4. CASB (Cloud Access Security Broker)
5. UEBA (User and Entity Behavior Analytics)
6. Email Security
7. Network Security

IBM provides solutions in the following areas:

1. **AI and Analytics:** Watson AI platform for cognitive computing and data analytics.
2. **Cloud Computing:** IBM Cloud for scalable and secure computing resources.
3. **IoT:** IBM Watson IoT platform for device management and data analytics.
4. **Blockchain:** Secure and transparent digital transactions through the IBM Blockchain platform.
5. **Security:** Threat intelligence, identity/access management, and security analytics.
6. **ERP:** Integrated solutions for finance, supply chain, HR, and CRM.
7. **Data Management:** Tools for storing, organizing, and analyzing large volumes of data.
8. **Quantum Computing:** Access to quantum systems for solving complex problems and innovation.

APC provides the following solutions for business:

1. **UPS: Uninterruptible Power Supply** for backup power during outages.
2. **PDU: Power Distribution Units** for efficient power distribution.
3. **Rack Enclosures: Secure housing** for servers and IT equipment.
4. **Cooling Solutions: Precision cooling systems** for data centers.
5. **Power Monitoring Software: Tools** for monitoring and managing power consumption.
6. **Surge Protectors and Power Strips: Protection** against power surges.
7. **Environmental Monitoring: Solutions** for monitoring temperature and humidity.

## Hewlett Packard Enterprise

HPE offers the following business solutions:

1. **Hybrid IT Infrastructure: Combining on-premises and cloud resources.**
  2. **Intelligent Edge: Processing data closer to its source.**
  3. **Data and Analytics: Extracting insights from data.**
  4. **High-Performance Computing (HPC): Powerful computing solutions.**
  5. **Security and Risk Management: Protecting digital assets.**
  6. **Intelligent Storage: Efficient storage solutions.**
  7. **Software-Defined Infrastructure: Flexible and automated IT operations.**
- HPE also provides services like consulting and support.

# netwrix

Netwrix is a software company specializing in data security and information management. It offers solutions for auditing, compliance, user behavior analysis, Active Directory management, and cloud security.

1. **Auditing and Compliance:** Solutions for tracking changes, monitoring user activity, and ensuring compliance with industry regulations.
2. **Data Security and Governance:** Tools to manage and protect sensitive data, including file access monitoring and data loss prevention.
3. **User Behavior Analysis:** Monitoring and analyzing user activities.
4. **Active Directory Management:** Solutions for monitoring changes to Active Directory infrastructure and ensuring security.
5. **Cloud Security:** Tools for monitoring and securing cloud environments.
6. **IT Operations and Automation:** Streamlining IT operations through automation and improving overall efficiency.

# ivanti

Ivanti is a company that provides IT management and security software solutions for businesses. Their solutions are designed to help organizations manage and secure their IT environments effectively. Here are some key areas where Ivanti offers solutions for business:

1. **Unified Endpoint Management (UEM):** UEM solutions help organizations manage and secure devices.
2. **IT Service Management (ITSM):** solutions that help businesses streamline and automate their IT service delivery processes.
3. **Endpoint Security:** security solutions to protect endpoints from various threats, including malware, ransomware, and other cyber threats.
4. **Identity Management:** identity management solutions help organizations manage user identities and access privileges securely.
5. **IT Asset Management (ITAM):** ITAM solutions assist organizations in managing their IT assets throughout their lifecycle.

# EGOSECURE

EgoSecure is a cybersecurity solution provider with a focus on data protection and endpoint security for businesses.

1. **EgoSecure Data Protection:** A comprehensive solution for safeguarding sensitive data through encryption, access controls, and data loss prevention measures.
2. **EgoSecure Endpoint Security:** A product designed to secure endpoints by providing protection against malware, unauthorized access, and other cybersecurity threats.
3. **EgoSecure Compliance Suite:** A solution aimed at helping businesses ensure compliance with data protection regulations and industry standards, providing tools for monitoring and managing compliance-related activities.

## Flowmon

Driving Network Visibility

Flowmon provides network visibility and security solutions for businesses. Their solutions offer real-time monitoring, analysis, and visualization of network traffic, helping organizations detect and mitigate cybersecurity threats, optimize network performance, and ensure compliance with regulations.

1. **Flowmon Collector:** This is a component designed to collect and store network traffic data for analysis.
2. **Flowmon ADS (Anomaly Detection System):** This solution focuses on detecting unusual or anomalous behavior in network traffic, helping organizations identify potential security threats and incidents.
3. **Flowmon DDoS Defender:** Specifically designed to protect against Distributed Denial of Service (DDoS) attacks.

# Attivo

Attivo Networks specializes in cybersecurity solutions, particularly in the field of deception technology. Deception technology is a proactive approach to cybersecurity that involves creating decoy assets and misinformation to mislead and detect attackers within a network.

## 1. Attivo Deception Platform:

- Creates decoy assets to mislead attackers.
- Early threat detection in the attack lifecycle.

## 2. ThreatDefend Detection and Response Platform:

- Integrates with existing security infrastructure.
- Combines deception with advanced detection methods.
- Provides real-time alerts and forensic data for incident response.

## 3. EDR Deception:

- Specialized deception for endpoints.
- Adds an extra layer of security to critical assets.

# VERITAS™

Veritas provides data management and protection solutions for businesses, helping them manage, protect, and gain insights from their data. The company specializes in backup and recovery, data archiving, and data visibility solutions. Here are the top three products offered by Veritas:

1. **NetBackup:** A comprehensive enterprise backup and recovery solution that supports a wide range of platforms and applications, ensuring data protection and availability.

2. **Enterprise Vault:** An archiving solution that helps organizations intelligently store, manage, and discover unstructured information, reducing storage costs and ensuring compliance.

3. **Information Map:** Provides visibility into your data environment, helping organizations understand their data, classify it, and make informed decisions about its management and storage.

LogRhythm offers cybersecurity solutions for businesses, focusing on threat detection, response, and compliance. Their platform provides advanced security analytics and orchestration capabilities. Here are the top three products offered by LogRhythm:

1. **LogRhythm NextGen SIEM (Security Information and Event Management):** A comprehensive SIEM solution that helps organizations detect, respond to, and mitigate security threats through advanced analytics and real-time monitoring.
2. **LogRhythm Network Monitor:** Monitors network traffic in real-time to identify anomalous behavior and potential security threats, enhancing the overall security posture of an organization.
3. **LogRhythm UEBA (User and Entity Behavior Analytics):** Utilizes machine learning to detect abnormal behavior patterns among users and entities, helping organizations identify insider threats and other security risks.

Barracuda provides cybersecurity and data protection solutions for businesses. Here are the top three products offered by Barracuda:

1. **Barracuda Email Security Gateway:** Protects against email-borne threats, including spam, phishing, malware, and other cyber threats, ensuring a secure email communication environment.
2. **Barracuda Web Application Firewall (WAF):** Safeguards web applications against various cyber attacks, including SQL injection, cross-site scripting, and other OWASP Top Ten threats, enhancing the security of online applications.
3. **Barracuda Backup:** Offers comprehensive data backup and recovery solutions for organizations, ensuring the protection and availability of critical business data in the event of data loss or system failure.
