

22" - 84" Dual Sided Freestanding Digital Display

HIRE me today

The Dual Sided Freestanding Digital Display is basically 2 screens back to back, allowing the flow of people from both directions to view the display. It is a great way to present, advertise or interact. The displays come in various sizes from 22" - 84" using the latest LED commercial grade screen technology.

These displays are ideal for welcoming visitors, advertising new products and offers and informing people about certain aspects of your business.

Locations for this type of display include lobbies, concourses, exhibitions and reception areas and retail shopping centres.

Each display comes with an inbuilt media player either Plug and Play, Android or Windows depending on your preference. The displays have inbuilt high-powered speakers. The displays used are designed for 24/7 use and are the latest 1080p LED high-end panels.

Available in a wide range of sizes 22", 26", 32", 42", 47", 55", 65", 75" and 84"
