

32"- 84" Interactive Coffee Table

HIRE me today

The Interactive Coffee Table makes any room a talking point. It's a great way to display products, information and even play games. You can have different height legs so you can either sit or stand around the table. Using the latest IR interactive touch screen technology this takes your digital advertising to the next level.

These displays are ideal for advertising new products and offers and informing people about certain aspects of your business.

Locations for this type of display include lobbies, concourses, exhibitions and reception areas.

Each display comes with an inbuilt media player either Plug and Play, Android or Windows depending on your preference. The displays have inbuilt high-powered speakers. The displays used are designed for 24/7 use and are the latest 1080p LED high-end panels.

Available in a wide range of sizes 32", 42", 47", 55", 65", 75" and 84"
