

Greater
Pine Island
Water Association, Inc.

NEW INSTALLATION / WATER SERVICE REQUEST

Once it is determined water is available at your requested property, a water availability letter will be issued at owner request. Meters shall be installed at the Association's decided location inside the property line, in an easement, or at the edge of public right-of way. In recorded and platted subdivisions, meters and stub-outs will be installed on the appropriate property lines so that two lots may be serviced from one location. Once the water meter is installed, legal owners will be billed monthly base rates and usage fees. In addition to the check payment, permit, site plan with boundary survey, a signed Water User's Agreement is required prior to installation, along with a copy of owners Driver License.
