

**Ehab Hasan**  
**Partnering Facilitator-Account Manager**

Ehab is a highly regarded engineer with bachelor's degree in Civil Engineer and a minor in Engineering Management. He started his career as a site and office engineer on two unique heavy infrastructure projects: The Dubai Tram Project and The Dubai Canal Project. This motivated him to pursue and obtain a law Master of Dispute Resolution. From this, he acquired a multidisciplinary knowledge experience and skillset as a facilitator and dispute resolution provider. As the Construction Partnering Director at GLA, Ehab specializes in Construction Partnering Services and other Alternative Dispute Resolution and Dispute Prevention services. Since joining GLA, Ehab

has helped develop and utilize a fully inclusive construction partnering software tool DashTech. DashTech is a tool that streamlines construction project risk management, collects important partnering metrics, and documents the value of partnering on projects.
