

Solutions and Incentives for Small Commercial and Industrial Customers

A dollar saved is a dollar earned, especially for small and medium-sized commercial and industrial facilities where profit margins can be thin. PECO can help you reduce your energy costs while improving employee and customer comfort—and freshen up the look of your space and products.

Reduce Overhead and Operating Costs

Lighting, heating and cooling account for more than half of the energy use in many small commercial and industrial facilities, including office buildings and retailers. For grocery stores, merchandising trends are commanding even more energy use to meet the growing demand for fresh, prepared and frozen foods. As such, these areas represent important opportunities for making energy efficiency improvements.

At PECO, we have the technical expertise and financial incentives to help your facility save energy and money.

Incentives for Energy-Saving Measures

Whether you're looking to reduce the operating costs in your existing facility, constructing a new facility or planning a major renovation, we offer incentives for dozens of proven energy efficiency measures to make your upgrade projects hassle-free and affordable.

We know you're busy, and we're here to make increasing your energy efficiency easy. We can help you find smart solutions to control your energy costs and improve your bottom line.

See the chart on the back for typical energy efficiency solutions for small commercial and industrial facilities.

PECO. The future is on.

Typical Energy Efficiency Solutions for Small Commercial and Industrial Facilities

Interior Lighting Equipment Type	
ENERGY STAR® Screw-In LED Bulbs	LED Replacement Lamps (Tubes)
LED Accent/Track Lighting Fixtures	LED Refrigeration Case Lighting (Reach-In)
LED Low-Bay/Troffer/Surface and Suspended Linear Fixtures	LED Refrigeration Case Lighting (Open Case)

HVAC	Exterior Fixtures
Air-Cooled or Water-Cooled Air Conditioner	LED Wall-Mount Fixtures and Retrofit Kits

Refrigeration and Food Services	
Anti-Sweat Heater Controls	Evaporator Fan Controls
Evaporator Coil Defrost Controls	Evaporator Fan Electronically Commutated Motors for Refrigerated Cases
Select ENERGY STAR Commercial Freezers, Beverage Machines	Refrigerators and Cooking Equipment

Why Improve Your Facility's Energy Efficiency?

Nearly 30% of the energy consumed by buildings is used inefficiently or unnecessarily.* By improving your facility's energy efficiency or integrating energy efficiency into plans for renovations or new construction, you can save on operating costs and create a more comfortable, safer environment for employees and customers. You'll also differentiate yourself as an environmental steward by reducing energy use and greenhouse gas emissions.

Savings for All

PECO offers solutions and incentives for businesses and organizations large and small. Our solutions cross every sector from commercial and industrial to nonprofits and government to retail and real estate.

In addition to standard incentives for energy-efficient heating and cooling systems, refrigeration equipment, lighting, variable frequency drives and custom measures, we offer incentives for whole building systems and new construction.

Four Easy Steps to Get Started

Contact the PECO team, and we'll help you:

1. Evaluate your energy efficiency opportunities.
2. Choose qualifying equipment and measures.
3. Apply for your incentives.
4. Enjoy all the benefits of energy efficiency.
