iCICI bank building, Lane 7 Koregaon  
Park, Pune

The advanced clinical facial course includes several popular and effective facial treatments, we provide complete support to our students in terms of product selection, purchase and application.

Duration-2 days  
Fees-35000

ISCA

## What Are Advance Facials

At ISCA, advanced clinical facials go beyond traditional treatments and focus on specific skin concerns. These facials, performed by experienced professionals, utilize techniques like hydrafacial, chemical peels, microneedling, LED light therapy, microdermabrasion, and oxygen facials. The treatments are customized to address individual needs and provide noticeable results

# what you will learn

- 1. Carbon Meso Facial:** This treatment involves the application of a carbon-based mask to the skin, followed by laser therapy. It helps to exfoliate and rejuvenate the skin, reducing the appearance of pores, acne, and oiliness. This facial is beneficial for improving skin texture and overall complexion.
- 2. RF Anti-aging Facial:** RF (Radiofrequency) is used in this facial to stimulate collagen production and tighten the skin. This helps to reduce the signs of aging, such as wrinkles and sagging skin. RF energy is delivered into the skin to promote firmness and improve skin elasticity.
- 3. Hydration Facial:** This facial treatment focuses on deeply hydrating the skin. It involves cleansing, exfoliating, and applying hydrating masks or serums to replenish moisture levels in the skin. Hydration facials can be beneficial for individuals with dry or dehydrated skin, leaving it plump, radiant, and nourished.

**4. Meso Hifu Facial:** This facial combines the benefits of Meso Therapy and High-Intensity Focused Ultrasound (HIFU). Meso Therapy involves the injection of vitamins, enzymes, and other beneficial substances into the skin to rejuvenate and promote collagen production. HIFU uses ultrasound energy to lift and tighten the skin, reducing sagging and wrinkles.

**5. Pumpkin Peel Facial:** This facial treatment involves the application of a pumpkin-based mask containing enzymes that exfoliate and brighten the skin. It gently removes dead skin cells, reduces hyperpigmentation, and improves overall skin texture. Pumpkin is rich in antioxidants and vitamins, making it beneficial for skin health.

**6. Vitamin C Hydra Facial:** This facial is focused on delivering the benefits of vitamin C to the skin. Vitamin C helps to brighten and even out the complexion, reduce hyperpigmentation, and promote collagen synthesis. It provides antioxidant protection and leaves the skin looking radiant and healthy.

## How to improve Medi-Facial Results

- 1. Customize the treatment:** Tailor the treatment to each client's specific skin concerns and needs. This can be done through an initial consultation and skin analysis. Understanding their concerns will allow you to use specific serums and solutions that target their individual issues.
- 2. Add-on treatments:** Offer add-on treatments that can complement the Medifacial and further address specific concerns. These may include LED light therapy, microcurrent, chemical peels, or lymphatic drainage massage. These additional treatments can enhance the overall results and provide a more personalized experience for clients.
- 3. Education and aftercare:** Educate clients about the importance of skincare and provide them with personalized aftercare advice. This can include recommending specific skincare products and routines to maintain the results achieved through treatments. Encourage them to follow a consistent skincare routine and protect their skin from sun exposure.
- 4. Continuous training:** Stay up to date with the latest HydraFacial techniques and advancements in the industry. Attend workshops and training sessions to enhance your skills and knowledge. This will enable you to offer the best possible treatment and stay ahead of the competition.
- 5. Gather feedback:** Regularly seek feedback from clients to understand their experience and satisfaction with the HydraFacial treatment. This feedback can help you identify areas for improvement and make necessary adjustments to enhance the client's experience.
- 6. Enhance the ambience:** Create a relaxing and soothing environment during the treatment. Consider playing calming music, providing soft lighting, and ensuring the treatment room is clean and comfortable. This will contribute to a more enjoyable experience for clients.
- 7. Incorporate additional skincare benefits:** Offer additional skincare benefits during the treatment, such as the application of a hydrating sheet mask or a massage with luxurious facial oils. These small additions can make the treatment feel more indulgent and provide extra skin nourishment.
