Monthly Command Report

For July 2021

Emergency Response:

For the month of July, there were a total of **36** fire calls. Average response time for the month was **6** minutes and **04** seconds. This is a door-to-door time.

For the month of July, there were total of **39 911** EMS calls with **20** Transports and **19** non-transports. Of the transports, there were **18** ALS and **02** BLS calls.

In addition, there were **43** facility transfers completed.

For the month of June there were a total of **82** EMS runs.

ALS- Advanced Life Support

BLS- Basic Life Support

Emergency Vehicles:

B-21(91)- Apparatus is being checked daily without any major issues to report.

5-TON/B92: No Change in status since January.

2 ½ Ton/B 21(93): Apparatus is being checked daily without any major issues to report, and no change in status from last month.

E-22(90): No change in status since January. Apparatus still needs to be scheduled for annual PM.

E-21(91): Apparatus is currently out of service and at Billy Bob's repair shop. Siddons has agreed to allow us to postpone repair until we are closer to taking receipt of the new engine.

Loaner Engine: Due to the situation with E21, Siddons Martin was kind enough to provide the department with a loaner engine, free of charge. It is our responsibility to maintain the engine while it is in service. Siddons is allowing us to keep the loaner engine in service until we take delivery of a replacement engine for E21. Engine is in good working order.

T-21(90): Apparatus is being checked daily without any major issues to report.

M-23(90): Unit is being checked daily without any major issues to report.

M-22(91): The medic unit is being checked daily without any major issues to report.

M-21 (New Medic Unit): Unit is being checked daily. The programming issue has been corrected by Siddons. There was a minor accident involving this unit, and there was some minor damage to the passenger side. The insurance claim has already been filed. The body shop is awaiting information back on parts from Demers. Once the information is received, the work will be completed, less our deductible.

Command: The unit is being checked daily. As our other aged equipment, our maintenance cost is becoming substantial. Just like any of our frontline equipment, it must be reliable. Once local dealers begin receiving more inventory, we will start working on acquiring its replacement.

Rescue 21 (90): Apparatus is being checked daily without any major issues to report.

MISC:

There has still been no progress towards acquiring a new frontline engine. The price increase that we were made aware of, did take affect August 1st.

Personnel:

We are still working to increase our number of local volunteers.

One of our full time Medics, Cesar Pena, put himself through an out of state critical care paramedic course. Cesar is now a Nationally and State certified Critical Care Paramedic.

Administration:

Command staff is working with TCDRS to complete our census so that a proposal may be put together. Despite previous belief, we are not required to have all staff in the retirement system.

Training:

EMS

Crews reviewed and trained on the following:

- IV Therapy
- Respiratory Care
- Response to community spread illness
- Chart documentation

Fire

Crews reviewed and trained on the following:

- Bunker Drills
- Area Familiarization
- Hose advancement techniques
- Radio communications
- Apparatus familiarization
- Safe driving operations
- Drafting operations
- Pump operations with different water sources

Station:

Any public walk ups to the department are being redirected to the front doors instead on leaving the apparatus bays open. This is to ensure health safety for both the public and the personnel.

Grants/Donations:

The grant truck from the Forestry Service that will serve as our new heavy brush truck is nearing completion. We are expecting to be complete in mid-August.

Public Relations:

The department is beginning to sit back down internally as well as with local business owners to discuss and plan how we can safely begin to be more involved in the community with public relation events.

Fire: Our biggest obstacle remains to be the age and condition of apparatus and equipment, leaving more equipment out of service than in service.

Annual SCBA flow tests have been scheduled for August 13th.

EMS:

The Standard Medical Operating Protocols are currently in the review stage. Once thoroughly cleared for any errors or adjustments, we will launch them. A soft launch has already been completed so that the staff may start reading through them.

Misc.: A major focus point of the department has been to create a strong professional working relationship with surrounding departments.
