Monthly Command Report

For August 2021

Emergency Response:

For the month of August, there were a total of **36** fire calls. Average response time for the month was **05** minutes and **54** seconds. This is a door-to-door time.

For the month of August, there were total of **57 911** EMS calls with **31** Transports and **26** non- transports. Of the transports, there were **28** ALS and **03** BLS calls.

In addition, there were **61** facility transfers completed.

For the month of August there were a total of **118** EMS runs.

ALS- Advanced Life Support

BLS- Basic Life Support

Emergency Vehicles:

B-22(91)- Apparatus is being checked daily without any major issues to report. The hose reel failed and was replaced in house.

5-TON/B92: No Change in status since January. Apparatus will go to auction soon.

2 ½ Ton 21 B (93): Apparatus is being checked daily without any major issues to report, and no change in status from last month.

E-22(90): No change in status since January. Apparatus still needs to be scheduled for annual PM.

E-21(91): Apparatus is currently out of service and at Billy Bob's repair shop. Siddons has agreed to allow us to postpone repair until we are closer to taking receipt of the new engine.

Loaner Engine: Due to the situation with E21, Siddons Martin was kind enough to provide the department with a loaner engine, free of charge. It is our responsibility to maintain the engine while it is in service. Siddons is allowing us to keep the loaner engine in service until we take delivery of a replacement engine for E21. Engine is in good working order.

T-22(90): Apparatus is being checked daily without any major issues to report.

M-23(90): Unit is being checked daily without any major issues to report.

M-22(91): The medic unit is being checked daily without any major issues to report.

M-21 (New Medic Unit): Unit is being checked daily. There was a minor accident involving this unit, and there was some minor damage to the passenger side. Weston's pain and body is working directly with Siddons for the repairs.

Command: The unit is being checked daily. As our other aged equipment, our maintenance cost is becoming substantial. Just like any of our frontline equipment, it must be reliable. Once local dealers begin receiving more inventory, we will start working on acquiring its replacement.

Rescue 22 (90): Apparatus is being checked daily without any major issues to report.

MISC:

There has still been no progress towards acquiring a new frontline engine. The price increase that we were made aware of, did take affect August 1st. In addition, the pre-pay discount will drop off at the end of September, and Siddons will be required to put together a new proposal. If we place the order before the end of September, Siddons will honor the full discount.

Personnel:

We are still working to increase our number of local volunteers.

Volunteer Bobby Blankenship III successfully earned his TCFP and is fully dual certified in the state of Texas.

Administration:

Command staff is working with TCDRS to complete our census so that a proposal may be put together. Despite previous belief, we are not required to have all staff in the retirement system.

Training:

EMS

Crews reviewed and trained on the following:

- EMS Operations
- 12 Lead Placement
- Hospital locations & level of care
- Lucas, stair chair, backboard & stretcher operations
- Waveform Capnography
- BLS & Advanced airways

Fire

Crews reviewed and trained on the following:

- Hose advancement
- Pump ops
- Fire ground ops
- Radio ops
- Area familiarization
- Apparatus familiarization
- Ladder ops
- Hydrant ops
- Drafting
- Wildland ops
- Brush truck ops
- CAD Training

Station:

Any public walk ups to the department are being redirected to the front doors instead on leaving the apparatus bays open. This is to ensure health safety for both the public and the personnel.

Grants/Donations:

The new heavy brush truck is operational and able to respond to calls. The lights and siren will be installed the week of September 12th.

Public Relations:

The department is beginning to sit back down internally as well as with local business owners to discuss and plan how we can safely begin to be more involved in the community with public relation events.

Fire: Our biggest obstacle remains to be the age and condition of apparatus and equipment, leaving more equipment out of service than in service. Annual SCBA flow tests were completed on August 13th.

EMS:

The Standard Medical Operating Protocols are currently in the review stage. Once thoroughly cleared for any errors or adjustments, we will launch them. A soft launch has already been completed so that the staff may start studying them.

Misc.: A major focus point of the department has been to create a strong professional working relationship with surrounding departments.
