Monthly Command Report

For October Emergency Response:

For the month of October, there were a total of **30** fire calls.

For the month of October, there were total of **44 911** EMS calls with **26** Transports and **18** non- transports. Of the transports, there were **16** ALS and **10** BLS calls.

In addition, there were **52** facility transfers completed.

For the month of October there were a total of **96** EMS runs.

ALS- Advanced Life Support

BLS- Basic Life Support

Average response time for the month was **06** minutes and **42** seconds. This is a door-to-door time.

Emergency Vehicles:

B-22: Apparatus is being checked daily without any major issues to report. Foam line, and throttle cable were repaired in house.

5-TON: No Change in status since January. We are working on the title work, so that this unit may be taken to auction.

B-21B (New Heavy): Apparatus is being checked daily without any major issues to report. The apparatus is scheduled to go to Rescue Ops the first week of November to have all the electronics installed. Completion is estimated to be by the second week of November.

2 ½ Ton 21C: Apparatus is being checked daily without any major issues to report, and no change in status from last month.

E-22: No change in status since January and is still our reserve. Apparatus still needs to be scheduled for annual PM. We are communicating with several broker agencies for used fire apparatus sales, in order to take the best avenue possible to sell it.

E-21: OOS No change. We will need to make arrangements to have the unit moved from Billy Bob's. If not, we will be charged a monthly storage fee.

Loaner Engine: Apparatus is being checked daily without any major issues to report. Siddons is currently working to exchange our loaner out with one that is less dated.

T-22: Apparatus is being checked daily without any major issues to report.

M-23: Unit is being checked daily. The unit was sent to southwest brakes and alignment to address safety concerns. Unit is operating properly now.

M-22: The medic unit is being checked daily without any major issues to report.

M-21 (New Medic Unit): Unit is being checked daily. The majority of the paint and body work has been completed by Amaro's paint and body. We are waiting for 1 part to come in, but it is not anything that affects the functionality of the unit, and the shop could not justify having an ambulance parked at their shop waiting on the part. They will contact when the part arrives and install it.

Command: OOS. Major repairs are needed for the unit to be safe. It is not worth it to continue putting money into a unit we've already agreed to replace. The unit will be taken to auction with old rescue in October so that a new unit may be ordered.

New Command: unit will be discussed with the acquisition committee.

Rescue 22: Apparatus is being checked daily without any major issues to report. This unit is currently being temporarily utilized as a Command unit.

MISC:

The order for the new pumper/tender has been placed with Siddons.

Personnel:

We are still working to increase our number of local volunteers.

Several new volunteers were on boarded and began training in October.

We would like to welcome the following new Volunteers:

Chestina Urrabas

Desiree Seguin

Damian Hardin

Administration:

Command staff is working with TCDRS to complete our census so that a proposal may be put together. Despite previous belief, we are not required to have all staff in the retirement system. The next step is for TCDRS to meet with board members to answer any questions. This can be accomplished via zoom with 1 or 2 board members.

Rescue 22 being currently utilized as a Command unit as caused a domino effect. This has put the department in a situation without a first responder vehicle for EMS calls. We do still have to send first responders for EMS calls. This has led to heavier equipment such as Engine, Tender, Brush, or an additional ambulance responding to medical calls. This puts more wear and tear on vehicles that cost more to maintain.

Admin staff understands the situation is temporary but did want to ensure that it was brought up for discussion.

Training:

EMS

Crews reviewed and trained on the following:

- Pit Crew CPR
- Whole Blood Administration
- Pharmacology
- Medical Assessment
- Trauma Assessment
- Intravascular Access
- Mega Codes
- Fist of the month check competencies

Fire

Crews reviewed and trained on the following:

- MVC Operations
- Heavy Brush Familiarization
- Wildland Fire Tactics
- Radio operations
- Line training from 1inch to LDH operations
- Water Shuttling
- Scene Size Up
- 4 gas meter familiarization and training

Station:

Any public walk ups to the department are being redirected to the front doors instead on leaving the apparatus bays open. This is to ensure health safety for both the public and the personnel.

Grants/Donations:

The new heavy brush truck is fully in service. All documents for expenditures are being processed with the Forestry Service.

Public Relations:

The department is beginning to sit back down internally as well as with local business owners to discuss and plan how we can safely begin to be more involved in the community with public relation events.

Fire: Our biggest obstacle remains to be the age and condition of apparatus and equipment, leaving more equipment out of service than in service.

EMS:

The Standard Medical Operating Protocols are currently in the review stage. Once thoroughly cleared for any errors or adjustments, we will launch them. A soft launch has already been completed so that the staff may start studying them.

Misc.: A major focus point of the department has been to create a strong professional working relationship with surrounding departments.
