B. _____

VIII

From the top of the site, some of the old road

a. curving around,
curving angle,
curving mound
North
B

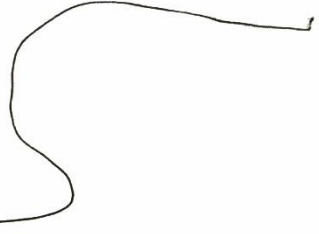

IX

AOL DRIVE

Impression that structure is
some sort of UFO ^{dark} figure seated
a circular control panel, another
light figure in background

The person at the circular panel was rather friendly
suggested I move to a position behind and observe. The
circular panel looked a lot like an organ. And he appeared
to be playing at it like someone would an organ.

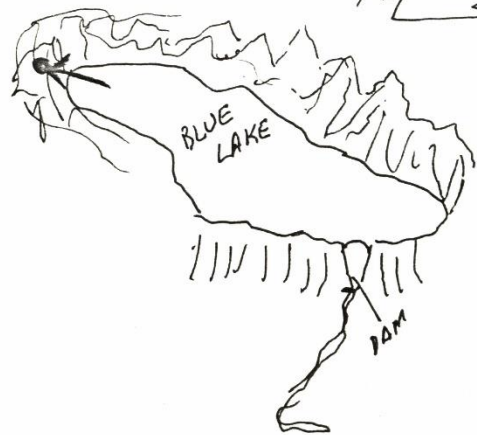

from WML ~~up~~ something should be visible

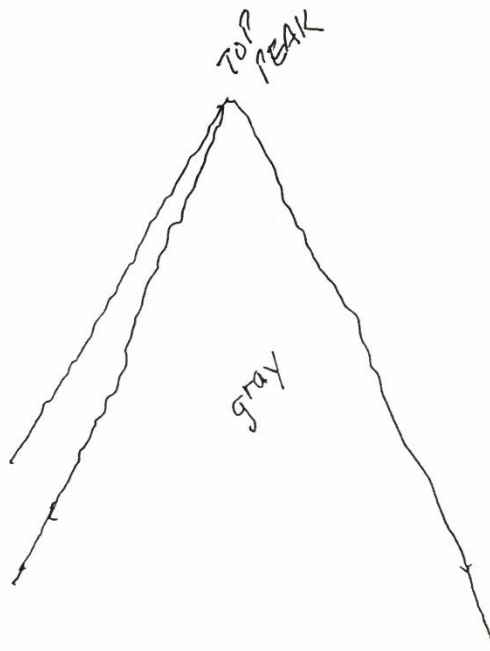

a. across curving
around curving
around hand

B _____

As of sketch

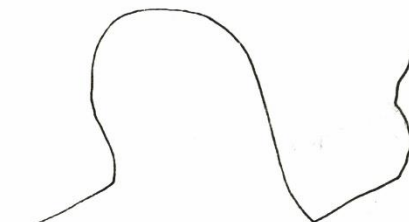

X

END
1509 hrs

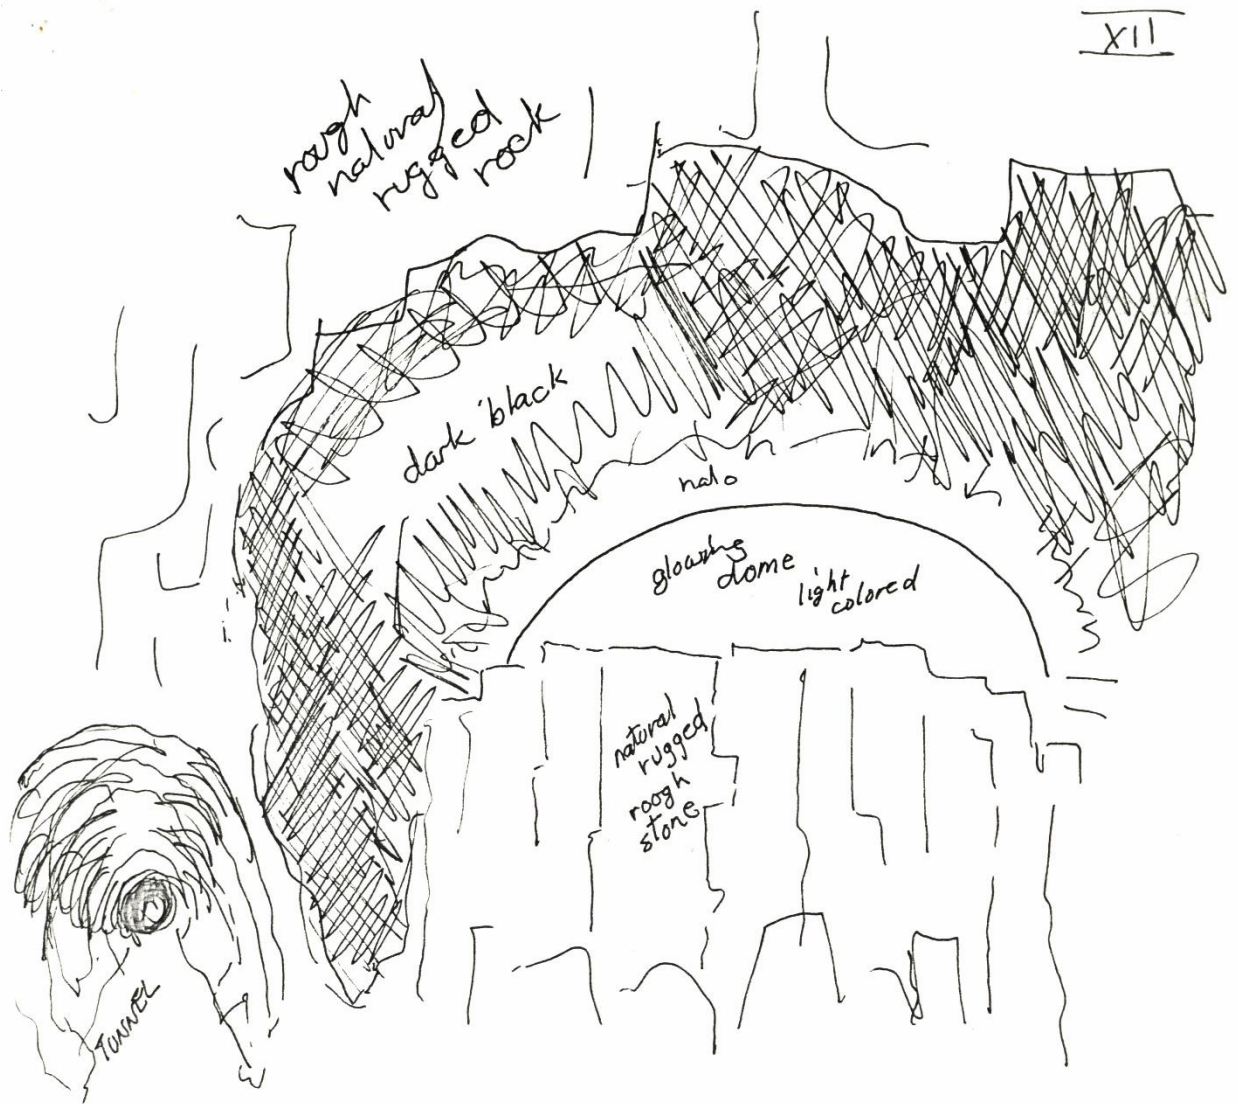

minid structure south should be perceived

AOL break
cavernous - like a cave
with tunnels, rough natural
- perceive a very large dome

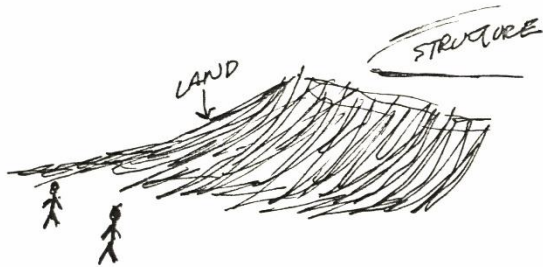

a. across, set up
incline up,
curving up, over
curving down
across incline
up, curve up

b. structure

AOL BREAK-like
being inside NORAD
at Cheyenne Mtn., Colo

floor of Dome should be small

an across, angle up,
across, incline up,
angle across, incline
down, curve up
angle across,
hard

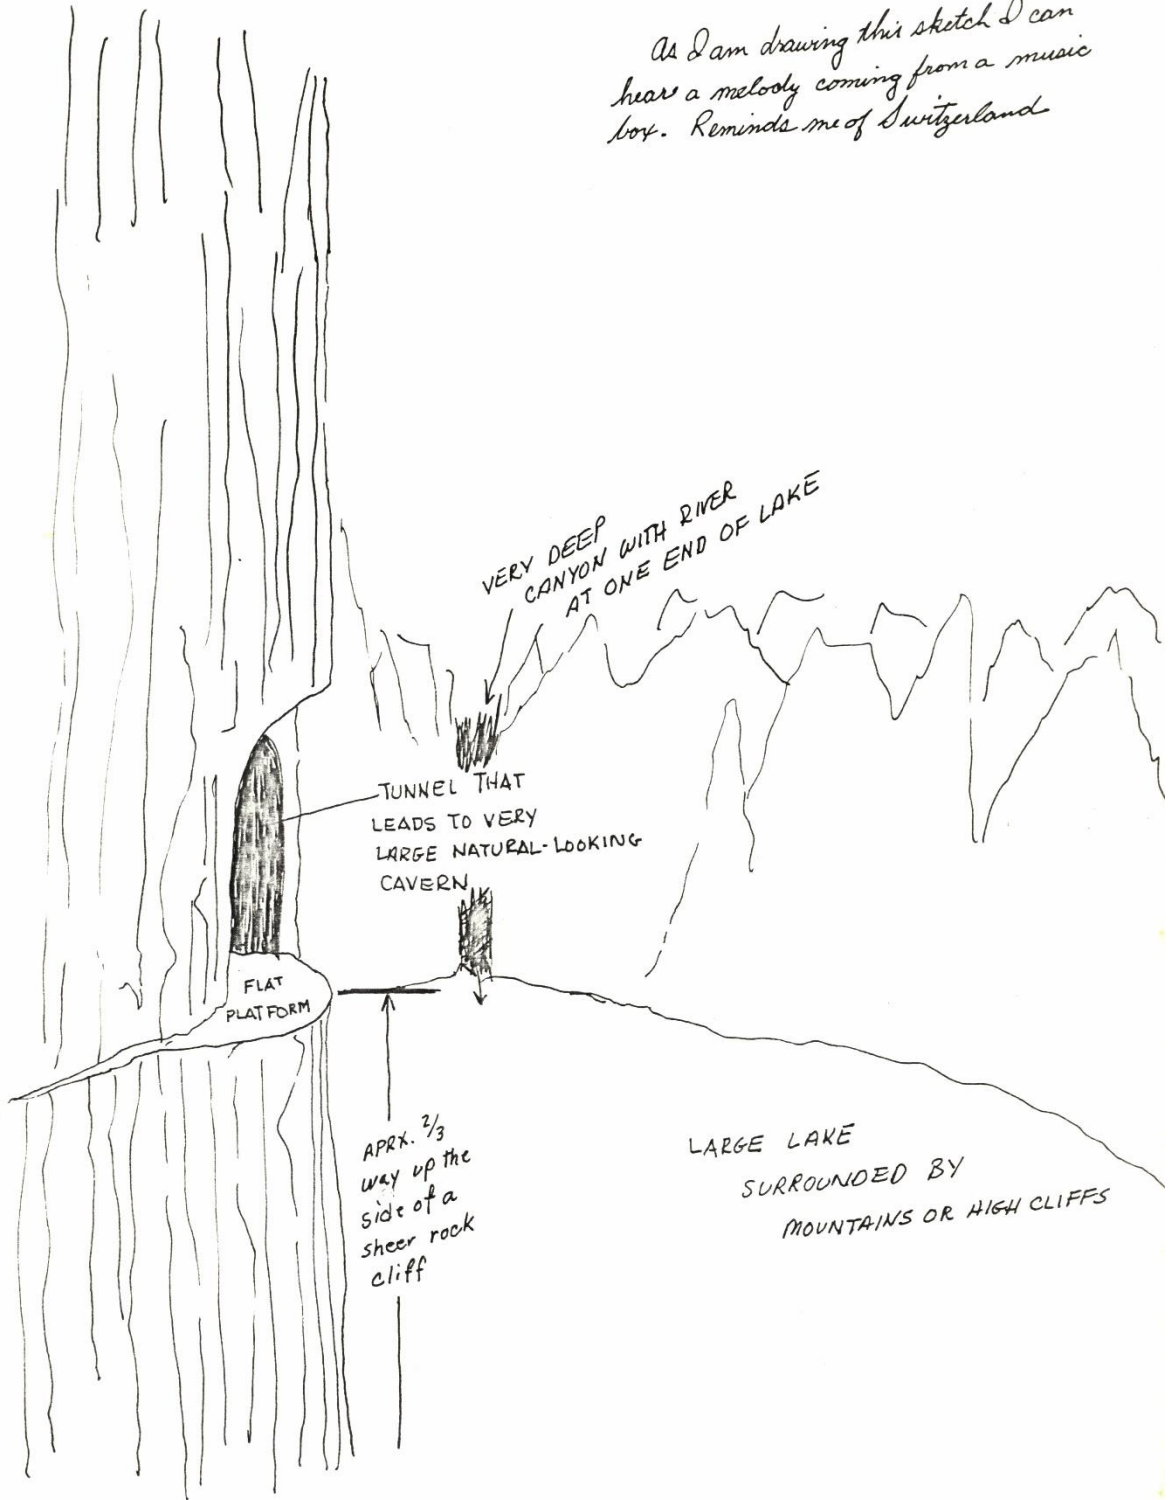

~~b. structure~~

teeth
fossils
dinosaur-like creatures

POST SESSION IMPRESSIONS

Iq.

As I am drawing this sketch I can hear a melody coming from a music box. Reminds me of Switzerland

POST SESSION SUMMARY

IIa.

Summary - site appears to be a structure located within a mountain which has a triangular peak. There is a large lake at the base of this mountain which is surrounded by high rugged mountains or cliffs, it seems fairly impenetrable. There were two people walking around outside of the structure and two people inside the structure. One of the people inside the structure sat at a circular position which appeared to look similar to an organ because of the keys, buttons and switches (the word "OBSERVING" comes to mind). The appeared to be some sort of screen or monitor, but could not make it out clearly.
