

## Bye 2023

Well it's 12:01 am and the fireworks announce the changing of the year. Not sure whether we are to celebrate the advent of a new year or the leaving of 2023 behind. Nothing notably good happened in 2023, at least that I can think of. Looking in the bottom of my now empty glass of scotch, I ask myself as to what made me happy in 2023, was the same as asking a liberal what accomplishments did the Biden Administration provide that helped American citizens. Nothing comes to mind. Perhaps as I write I will recall an event that says "that's the ticket".

In 2023 we experienced the continuing erosion of our country's greatest asset – freedom. Yes, we were freed from the tyrannical lockdowns of the pandemic, but we continued to lose our ability to speak freely. It is true Mr. Musk salvaged Twitter (now X – stupid name) to put a dent in censorship. But, the Mediocre Media is still manipulating the news to spread Lenin-like propaganda. The mentally challenged group known as the LGBTQ community has provided the new religion of the left - transgenderism. Of course you ask any "democrat" why they support the idea of child mutilation and they say they don't, but they continue to elect weak-minded libs to office.

The socialist democratic party is so concerned about saving our democracy that they have expended time and money to do just the opposite. Their all-out war on religion – yes the FBI did spy on Catholics, and now their acceptance of antisemitism by not arresting those who chant "kill the Jews". If the same crowd chanted "kill the blacks" or "kill the Muslims" there would be overflowing jail cells. The moronic terrorists who are now blocking traffic to support Palestinians, claim Jesus was a Palestinian. God our education system sucks. Palestine was not even a thing until 200 years after Jesus was crucified. Even then Palestinians lived in Jordan.

In 2023 we have seen the justice system continue to wield unprecedented abuse of power. The DOJ/FBI and state justices display a complete lack of jurisprudence as they attack a presidential candidate to keep him from being president again. TDS (Trump Derangement Syndrome) is a real mental health condition. Those currently in power, not the elected folks, but the Deep State echelon that runs our government fear President Trump. They know he will not be so naïve this time around to trust those federal bureaucrats – Fauci, Wray immediately come to mind. There are a host of alphabet departments that need to be stripped or razed, IRS, CIA, DOJ, FBI, DOEd, DOE.

The second amendment continues to be attacked, more so now than ever. Why? Gun sales are going through the roof. Most notable among those purchasing firearms for their protection are black women. SCOTUS is really weak on defending the 2A. They have not made clear their position, that the right to bear arms is not to be infringed. States and the president using fiats, permits, taxes, magazine and ammo restrictions, where you cannot carry your firearm for protection are all infringements. SCOTUS has made worthy decisions to protect 2A, but they fail to hold the violators accountable.

Several States are trying to usurp the right to vote from half the country by trying to keep President Trump from being on the ballot. Their foolishness of citing the 14<sup>th</sup> Amendment, Section 3, is proof the D.C. establishment is scared of losing RICO-Joe as president. States citing Trump for being an insurrectionist when there has been no declaration of insurrection leads me to believe the judges are graduates from Harvard law school. They are not serious observers of our Constitution.

Still can't think of anything good in 2023. I'll keep going maybe it will come to me.

Let's see, drag queen day in elementary school? Nope. Military paying for sex change surgery? Nope. Military paying for abortion in violation of the Hyde Amendment? Nope. Prisons paying for sex changes? Nope. Men masquerading as women to use the women's locker room or compete in women sports? Once again not good news.

## Bye 2023

The Ukraine-Russian war has just about come to a stalemate. The Ukrainian Government has been able to suck billions in aid from not only the U.S., but also NATO countries. Initially the goal was to push Putin back across the border. That didn't work as feckless NATO, led by the U.S. and the UK, could not muster the balls to stop the invasion by Russia. We sanctioned Russia financially to try and thwart Putin, but we just helped to raise the value of the ruble. The lost oil revenue never materialized as China and India took up the slack. They also traded in their native currencies, not US dollars. Oops another hit on our economy.

The Hamas-Gaza attack on Israel was a horrendous act on October 7. Israel's response to the attack was swift and on target. They have shown tremendous restraint in the face of international – including Biden – pressure to minimize civilian casualties. Why? Those Gazans voted for Hamas. They allowed them to build an entire infrastructure under their cities at the expense of their schools, water and electric supply. The timing of this attack is suspicious. Was it because Saudia Arabia was about to join the Abrham Accord? Iran and not only their satellite henchman – Syria & Yemen need to be addressed militarily.

Of course a 2023 comment could not be complete without mentioning Bidenomics. The economic disaster perpetrated on the country by not only the Doofus-Lyin-Biden, but congress as well. Congress is the collective that meets to figure out ways to waste our tax dollars and put the country and its citizens in debt. Do you know how many members there are in congress? 535. That is also the sum total of all their IQs. Only an idiot would agree to spend trillions of dollars to get us out of a trillion-dollar debt. That's no joke. The White House Keepers keep saying the economy is improving, but credit card debt has grown to over a trillion dollars, food, gas, interest rates, medical insurance, vehicles, insurance rates have all increased over the last 3 years. Note the number of businesses and doctors now tacking on the cost of using credit cards – a hidden tax on the customer.

Five million illegal aliens, five million illegals, take one down and pass them around, 4,999,999 immigrants left at the wall or in a city near you. The invasion of our country at the southern border is worthy of treason for not protecting us. The Biden-Cartel Crime Organization is doing well in the human and drug trafficking business. All that is good news for the crime syndicate it is not good news for America. The tax burden put on states, cities and the taxpayer is tremendous. Now the Veterans Hospitals are providing healthcare to the illegals. Spending tax dollars on illegals while jeopardizing the care of our veterans beckons the firing squad.

I give up. The only good thing about 2023 that comes to mind is that it is over. Pathetically I do not see 2024 bringing any good news, at least not until November – maybe.
