

## Halleluiah 2021 is behind us – almost

At the end of each year, we look back as to what has transpired to affect our world and look forward to, hopefully, a better year. This year we have a lot of head hanging to do in America. Our crime rate has gone up exponentially in the major cities across the USA, almost exclusively in democratic run cities. Our southern border has been turned into a Mexican Cartel Disneyland permitting drug and human trafficking to run rampant. Our military has become “woke” worrying more about pronouns and so-called white privilege, while our adversaries are beefing up their military to probably invade Ukraine and Taiwan. Our economy is suffering with near 15% inflation, clearly a result of poor economic policies enacted by petty government leaders.

All this turmoil is compounded by the divisive nature of our current White House occupants. They not only stoke the fire of racism to separate us, but use the elements of the Chinese Flu Pandemic to pit citizen against citizen, family against family and of course race against race. The government has been totally dishonest with the public on the Chinese Flu and the measures taken to confront the pandemic. First, we were told not to worry about the flu (Dr. Fauci), then told we don't need to wear masks, then to wear masks, then to wear multiple masks (Dr. Fauci). Then we were told to shut everything down for two weeks in 2020 to help control the curve of hospital bed demand. Two years later lockdowns of business and schools are still occurring. **No leadership.** At least Trump confronted the pandemic head on with shutting down immigration, establishing Warp Speed to get a vaccine to market in record time and encouraging the public to wash their hands and stay six feet apart.

Today we have a menagerie of draconian controls across states, within states, within counties. Sheer madness. Government officials say the mask provides minimal, at best, protection. Even the N95 masks can only constrain a molecule 5 microns or greater, while the virus is 3 microns. Forced vaccines and multiple shots, when the original claim of efficacy was 90% or better. Now after 3 dosages, the morons in the CDC are still touting wearing masks. Does the vaccine work or not? Even now they are pushing vaccines on children, whose natural resistance to the virus is strong, when a therapeutic pill is in the production mill. **Poor leadership.** The medical community has the largest element of blame for

## Halleluiah 2021 is behind us – almost

the pandemic mess. When known therapeutics were available, they acquiesced to political pressure and withheld them from their patients.

In August 2020 the **Weasel House** abandoned thousand of citizens and allies behind enemy lines when we ran from Afghanistan. Yes, we ran. **WH** gave the enemy billions of dollars which included military equipment, airplanes, helicopters, firearms and night vision goggles. The **WH** hasty pack and run cost 13 Marines their lives. We killed an innocent family with a drone strike to give the appearance that we were retaliating against the terrorist who killed the Marines. We gave them an airbase damn near the size of Delaware. Nobody has been fired, court martialed or resigned for this debacle. **Piss-poor leadership** in the **Weasel House** and in the military.

Congress has convened an investigation as to what happened on Jan.6, 2020. The North Korea style committee, your guilty first and now we have to establish why, is more concerned about trespassers in the Capitol building. We have held the trespassers as political prisoners in a Washington D.C. jail longer than the BLM/antifa terrorists who burned down Minneapolis. Meanwhile no concern over the rising crime rate due to a Soros fueled justice system that does not punish criminals. **Criminal leadership.** Petty theft has now been defined in liberal cities as \$950 or less per instance. This is even more criminal than health insurance companies taxing smoking enrollees a \$25 per week surcharge. **Unjust leadership.**

Inflation is the direct result of the illogical policy of the **WH**. The outright shutting down U.S. pipelines to transport fuel, their cancelling permits on federal land to drill for oil is the trigger event. Most people in the U.S. realize that oil is the life blood of our economy and our pursuit of happiness with which I include heat and air conditioning. Oil is the engine that fuels our planes, trains and automobiles. It is how we move things around the country and the world. It is also used in the manufacturing of plastics and clothing. Obviously, the **Weasel House** occupants are ignorant of how our economy works. Lumber jumped by over 300% in one year. Milk went up 8% - almost 50 cents per gallon. Bread went up nearly 6% or 25 cents a loaf. The big one is gas at the pump went up \$1.50 a gallon. Home heating oil is going to strangle households in the Northeast and Midwest- up

## Halleluiah 2021 is behind us – almost

almost 1.25 per gallon. **Insane Leadership.** Add all the other items that a household, school or business purchases and inflation has pushed those items up so that choices have to be made as to whether one eats, goes to the doctor or drives to work, they are not easy decisions. School expenses go up? So do the school taxes; even on low and middle-income families.

Enough gloom over the stupidity of the **WH** occupants. There was a few bright spots that make some optimistic views for 2022. Virginia schoolboard held accountable by parents for their total negligence in their racist curriculum for the children. Also, for the criminal actions by the school president by not reporting a rape inside a girls bathroom by a transgender boy. Then passing the boy off to another school. Parents learned via the pandemic school shutdowns that schools were indoctrination camps for the Marxist woke crowd that engenders discrimination against white people. **Praise the Parents!**

Texas building the wall to control the invasion by illegal aliens. The wall started by President Trump and halted by President Magoo. Thank you to the Florida governor, and other governors, for sending security forces to help Texas combat the invasion that threatens the lives of citizens who live on the border. **Praise those State Leaders.**

I'm sure there is another bright spot that occurred. Com'on man think!

Oh yeah. Two Smart Farts attained their 125th podcast this year. We started in 2017. Hard to believe we were so young then. But 2020 and 2021 took its toll and we aged dramatically.

Don't be stupid by voting stupid!
