

Herr Biden's Address to Nobody

The president of the United States addressed the audience of MSNBC and CNN with his vitriolic address. If anyone ever wondered what Hitler's speech in 1939 was, Biden just gave you that interpretation, in English. He just replaced Jews with MAGA Trump voters. (Once again, China Joe plagiarized another speech).

Herr Biden resplendent in front of Lucifer's wall of fire, vilified half the country. He promoted the idea of civil war. His speech was to be an accounting of the state of the union, not a campaign speech. But, think about it being a campaign speech. It was, once again, no substance except anti-Trump. No policies were addressed.

Der Fuhrer did not mention inflation, economic price chaos in the supermarket, diesel fuel prices that are strangling farmers and truckers, illegal immigration causing increased tax burdens on states and cities, rampant crime in the cities and pathetic performance in our schools. Why? Because his policies have brought our domestic livelihood to a standstill. His destructive policies and his willingness to be a useful idiot by promoting the destruction of our economy, security and political philosophy.

Knucklehead Biden has given more money to Ukraine (a separate discussion) to protect their borders from invasion and ignores the invasion at our southern border. His dereliction of duty at the southern border, by partnering with the Mexican Cartel in drug and human trafficking is treasonous. His contempt for the rule of law is killing Americans.

Nothing China Joe said in his speech addressed the plight of the USA. His speech was doom and gloom. He told the country to suck it up as he was embracing the "green agenda" even if it meant starvation and death this winter. People have to choose between heat, food and rent. The citizens have been put into an economic straight jacket. Inflation is robbing fixed income senior citizens of cash putting them into decisions of medical expenses versus food. Low and middle-income people cannot afford gas to get to their jobs.

The Delaware Moron does not understand economics. Raising the debt, spending cash we don't have on non-essential programs, like student loan write-offs, will bury this country. His administration is comprised of illiterate people in terms of how businesses operate. They are ignorant of the cost of complying with government regulations, the essential foundation of our economy (oil), and the effort to maintain qualified employees. Sixty-two percent of the administration have never owned or worked for private business, including the president.

Hunter Biden's father has not had success in any endeavor he undertook. He hid in his basement and relied on election interference to get him installed as president. Drug-addled Hunter's father has always been a loud-mouthed second-class politician with zero accomplishments. He was an apparent poor parent and poor father-figure and he uses the same lack of skill to run the country.

The country was warned by ex-president Obama and ex-Secretary of Defense Robert Gates, that Biden was not competent. Yet, here we are with a buffoon in the White House.

Another thing we did not hear was a "Joey" story. Thank God. One more cockamamie story from Lyin' Biden and even Hunter will be embarrassed. Not Jill Biden, as she has no shame much like Hunter.
