

## Veterans' Day 2020

Today November 11 is Armistice Day. A day which is still observed by Canada, England, Scotland, France and Australia and other countries to mark the end of WWI. The United States renamed it to Veterans Day under President Eisenhower to honor the veterans of all wars. This single act was to make sure we do not forget the sacrifices the men and women in the military have made on behalf of not only our country, but also our allies. Everyone in the USA owes so much to these brave men and women who gave their life and limb to preserve our way of life. Their families deserve our honor and respect as well. Especially spouses who have to carry a heavy load as a single parent while their spouse is absent and keep a brave front in hopes their loved one returns home safely.

It is an embarrassment this year when the traditional Poppy Flower was for the most part absent from view in the USA. Watching Rugby matches in Australia, the Poppy was highly visible in the fans and even the sportscasters. They have endured the pandemic as well as the USA, but they found the courage to continue on with life and pay tribute to their fallen heroes. In the USA not so much. Many US citizens hid in their basements. Glad our military does not take that attitude.

There is no kneeling during the Australian Anthem at a rugby match. Nope, they came to play ball. They played a match on Nov. 11 to a crowd of 40,000. Players and spectators happy to celebrate life and enjoy a day of remembrance with their friends and family. Australians have maintained respect for their country's values and traditions. In the USA, not so much.

Now Australia is not a panacea for liberties, remember they did a gun confiscation (aka as a gun buyback) in the late 1990s. A knee jerk reaction to some killing sprees across their country. So, I am not holding them as a model for anything other than their continued loyalty to their country's values. They have government whackos as much as we do in the USA.

This Veteran's Day we are in the midst of a national election debacle. The Socialist Democrats illegally implemented, in most states, mass voting by mail. This was an effective way to introduce mass cheating in the election process. The vote-by-mail was already known to be a fraught with problems. The USA criticized the elections in Ukraine and other countries for using vote by mail as it was determined to be a fiasco. Great Britain and France stopped using the system as it was determined that it was a fraudulent method for national voting. Our military in other countries oversaw election processes to enforce discipline and ensure security of the voting process. Maybe the military should be doing the same in PA, MI, WI, GA, AZ and other states. It is apparent that these states treat the voting process with the same respect as they do Veteran's Day. It is just a day off from work to many.

Our family members and friends sacrificed a lot to make sure we maintain our country's values and laws. To have our election process resemble, in any way, the election process of Venezuela is an embarrassment. We have become a subject of ridicule and hypocrisy; rightly so. We promote democracy and yet we cheated in our elections. There is no way that hundreds of thousands voted for China Joe Biden and did not vote for the socialist-democrat downline ticket. To say these are voting missteps stretches the word credulity to such great length that the word becomes criminal. Remarkable that every voting anomaly only goes in one direction - to the socialist party.

The Federal Elections Commission said there is obvious fraud in certain states and counties. But they take no action. AG Barr made a public statement prior to the election that he would not tolerate voting impropriety. He has done nothing. Oh, I forgot. He told local AGs to pursue any irregularities if they

## Veterans' Day 2020

think there is evidence of voting manipulation. This is lip service. The FBI should have been dispatched on the first sign of tampering. By waiting Barr has given the cheaters a head start to cover their tracks.

The Dominion Software is at the heart of the problem where votes were already found to be switched from Trump to Biden illegally. Why would the AG not jump on this as a smoking gun? It is obvious he does not care. Let's review some steps that Dominion software has in its operation. Set aside that the company is owned by socialist-democrat party leaders and their family. Some of these Dominion executives supported antifa and Black Lives Matters. Others are affiliated with the same firm as Robert Mueller, of the infamous Russia Hoax investigation. Do you think these people would be allowed to implement casino software with these kinds of connections without being investigated first? But they are allowed to manage our countries national election?

It was reported that a software update was installed the night of Nov.2 just before the election. There are many things wrong with this action. No reputable software company would install last minutes updates right before going live with a system. Yet Nov. 3<sup>rd</sup> was not the only day of voting. Some states started voting early with this software which means people voted using multiple versions of the software. Where is the Quality Assurance? Where are the audits of who voted with which version of the software? Where is the audit that the micro-barcode in fact represents the scanned voter selection? There is no transparency as to what was recorded as a vote.

Is this software run at the local level on a server or is it cloud based (to a common server)? Who ensured that all local polling places were updating all the machines or rolling out all the fixes for a cloud solution? Where are the security measures documented that the cloud is secure from hacking? Or even the local servers. This is a sham and congress is responsible for not ensuring local states did not take adequate steps to secure the national election. The national election is a federal election.

Yes, my dearly departed veterans our government let you and your families down again. They spit on your sacrifices. They allowed politics to make shambles of our election process. An election process that many countries admired for over 200 years. Does congress care? Does SCOTUS care? Not so much. President Trump cares.

Home of the Free, because of the Brave. Let's pray we deserve their sacrifice.
