

Safe Office Chairs

For people who have difficulty sitting down in a chair with control, office chairs with wheels can be very dangerous. Below are some office chair options that still provide good lumbar support but that don't have wheels to make them safer for your loved one!

Okeysen Office Desk Chair - No Wheels

- <http://tinyurl.com/4ehbpkc3>
- Comes in brown leather and black leather options.
- Has armrests for added safety
- The height of the chair is adjustable from 17.7 inches to 23.6 inches
- \$140.00

Ergonomic Desk Chair - No Wheels

- <https://tinyurl.com/ywr2m2kr>
- Comes in dark brown, cream, and caramel options
- Has armrests for added safety
- The height of the chair is adjustable from 15.75 inches to 21.75 inches
- \$140.00

If neither of these options are appealing, you can also try to use a regular desk chair and leave the wheels off when building. This will decrease the overall height of the chair by about 2 Inches.
