

Personal Property Values 2023

The values reflect market activity resulting from the COVID-19 pandemic. Fewer new models are available because of decreased production in the auto plants. The lack of new cars on the market has pushed up the demand and price of used vehicles. Basic supply and demand.

The values correctly reflect the market value which we are required by law to use. Our values are generated from sales data from NADA "National Auto Dealers Association" the most credible source for vehicle values. We use the clean trade in value of those listed. You can access the NADA website and find your vehicles value. Bear in mind that your value might be slightly different because we are required to assess all vehicles on January 1 of each year. If you have any more questions, please feel free to email the county assessor.
