RISKS AND RELEASES OF LIABILITY ACKNOWLEDGEMENT

Extreme Cleans technicians are well trained in the equipment used in the cleaning industry and take extreme precautions in making sure the company does not cause harm to your investment. Extreme Clean uses safe techniques with the use of low pressure on delicate surfaces such as siding. However, damage can still occur to any delicate surface due to poor maintenance, neglect to the property and or low grade building materials. Routine maintenance per manufacturer's recommendations on the homes surfaces, should be implemented by homeowners to avoid any potential defects. Prior to washing the home any areas of concern need to be addressed by the homeowner to insure a watertight seal. This will prevent damage from occurring. The homeowner assumes all the risks and takes responsibility for any damage that occurs due to improper maintenance.

On the date of service, Extreme Clean will note any pre-existing damage on the field hand checklist sheet with the client and have them sign. If client is unable to sign at time of noted damage, an Extreme Clean employee will note the absence on the field hand check list sheet and take photos of noted damage. Homeowner will have to sign off on the checklist sheet to note they have been informed of any damage once work is complete. If homeowner is unavailable at time of completion, the office manager will notify client of any damage before work along with supporting documentation. If any new damage is found during the cleaning process, the company will cease all cleaning efforts until the client can see the damage and acknowledge its existence.

Client understands that Extreme Clean has set procedures to ensure plant life around the area of cleaning is protected. Client understands that their wash could be scheduled during midday sun and there could be potential for leaf burn as water can get on and around the plant during the cleaning process. If any issues arise with plant life around the area of cleaning, the company will evaluate to see if plant life suffered from leaf burn and will recover or if it has been killed. Company will then determine plan of action after evaluation of plant life.
