

Smart Dual Illumination

The Homaxi Smart Illumination technology using smart algorithm to detect targets accurately. The IR illuminator is always on at night, and the warm light turns on when a target enters into the monitored area, delivering full-color images.

Features

Smart Dual Illuminator

- IR Mode
- Warm Light Mode
- Smart Illumination

Custom Illumination Schedule

- 7 days, Monday-Sunday
- 24 hours

Strobe Light Warning

- Warning light in IR mode

Lite AI

- Human
- Vehicle

Real-time Alarms

- Mobile device instant alarm notifications

Built-in Mic

- Audio and video synchro-nous recording

Smart Illumination

Automatically switching between IR Illuminator and warm light when a target is detected.

Beyond Smart Illumination

The Smart Dual Light product integrates strobe light deterrence with intelligent human and vehicle recognition, enhancing its proactive defense and precise alarm capabilities for versatile applications.
