

Australian Aerospace Corporation becomes Molico Dynamics™

Molico's wholly owned subsidiary, Australian Aerospace Corporation, has become Molico Dynamics™ to better service Australia's robotics market across air, land, sea and space domains.

As global markets expand rapidly with growing demand for autonomous and semi-autonomous systems, Molico® is seeking to fill a relevant void in the market by providing integrated cross domain expertise – operational advisory services, payload and data sciences, all bought together in single and/or swarming platforms, across all domains.

Group CEO Mike Johnson said the integration of complimentary attributes creates more than the sum of each piece: "What our customers seek is an end-to-end solution from a single supplier, with a single invoice. Molico has acquired and organically developed market expertise across a range of complimentary verticals which, when integrated, can offer a more timely, highly coordinated and better value solution."

Molico Dynamics™ will continue to develop its SEAT™ and STUART™ platforms, which may also be integrated into larger solutions to meet client demands across multiple industries in Australia and globally.
