Shaman/Wanderer Mystery School

Ascension ~ Love ~ Service

Class Synopsis

SHAMAN/WANDERER MYSTERY SCHOOL – Ascension, Love & Service --- a journey to awaken, accept & activate our inter-density mission. We have traveled from a higher vibration to integrate our Love/Light into 3-D Earth. Our service to others will elevate humanity's collective experience for the "harvest" or Ascension. It is time to align with our abilities & fulfill our destiny as Inter-Density Shamans/Wanderers of Aloha.

SHAMAN/WANDERER MYSTERY SCHOOL will bolster our mission as Wanderers. We will explore a big picture view of humanity's role as we read excerpts from the "Law of One" & watch videos about our Matrix/Confederation relationships.

Performance Objectives

- Examine Wanderer & Law of One concepts.
- Discuss Ascension/Harvest & the future of humanity.

Goal of SMS: accept, acknowledge & activate your unique expression of our One Infinite Creator . . . "To know your unique flow" . . . & "To know your role of our Soul" . . . & to Be Conscious, Be Mindful, Be Heartful . . . Be the authentic You, cause you are one of a kind!

Shaman Mystery School Mantra

“Everything is Light & All is Love!”

- **L/L Research** – 1970: Don Elkins (1930-1984) & Carla Rueckert (1943-2015)
 - Jim McCarty (1947-) joined 1981 – 3 weeks later, Ra contact
 - 5 books of channeling: January 1981 – March 1984

- **Ra & Law of one**

“I am Ra. I greet you in the love & in the light of the One Infinite Creator.”

“The Law of One, although beyond all words, may be approximated by saying that all things are one, there is no polarity, no right or wrong, no disharmony, but only one identity. All is one; and that one is love/light, light/love, the Infinite Creator.”

“You are every thing, every being, every emotion, every situation.
You are unity. You are infinity.
You are love/light, light/love.
You are.
This is the Law of One.”

“We are those who are of the Law of One, of Unity. In our vibration the polarities are harmonized; the paradoxes have a solution. We are one. We have walked your planet and seen the faces of your peoples. We now feel a great responsibility of helping remove certain distortions that have been given to the law of One.”

“You speak with Ra. There is no separation. You would call it a social memory complex thus indicating many-ness. To our understanding, you are speaking to an individualized portion of consciousness.”

“I am part of the social memory complex that voyaged outward from a planet in your solar system, the one you call Venus. We are a race old in your measures. (2.6 billion yrs) When we were at the 6th dimension our physical beings were what you call golden. We were tall and somewhat delicate. The covering of our physical body complex had a golden luster. In this form we decided to come among your peoples. Your peoples were much unlike us in physical appearance. Thus we did not mix well with the population and were obviously other than they. Our visit was relatively short. This was when we built the pyramids.

“When we chose this mission among your peoples, we would have been perceived as light had we arrived on earth in our natural form.”

“From the 6th dimension we are capable of manipulating energy with thought which is the intelligent infinity present in each particle of light, or distorted light, so that we were able to clothe ourselves in a replica of our 6th density mind/body/spirit complexes which were visible in the third density. We were allowed this experiment by the council that guards this planet.”

“I am Ra. The path of our learning is graven in the present moment. There is no history, as we understand your concept. Picture, if you will, a circle of being. We know the alpha and omega as infinite intelligence. The circle never ceases. It is present.”

Ra Contact w/Earth

- 75,000 years ago – helped Martians come to Earth
- 58,000 years ago – Mu
- 13,000 years ago – Atlantis
- 11,000 years ago – Egypt, Pyramids w/Thoth & South America
- 7500 years ago – South America again
- 2300 years ago – Egypt (by other Confederation members)
- 2300 yrs ago – Now: 5-D only & preparing for harvest (Corey Goode)

Ra: near end of channeling work (Session 104, B5, p 175, July 27, 1983)

“We leave you in appreciation of the circumstances of the great illusion in which you now choose to play the pipe and timbrel and move in rhythm. We are also players upon a stage. The stage changes. The acts ring down. The lights come up once again. And throughout the grand illusion and the following and the following there is the undergirding majesty of the One Infinite Creator. All is well. Nothing is lost. Go forth rejoicing in the love and light, the peace and the power of the One Infinite Creator. I am Ra. Adonai.”

- **WANDERER** - higher-density soul who has volunteered to be human & serve others in Love/Light

“Imagine, if you will, the sands of your shores. As countless as the grains of sand are the sources of intelligent infinity. When a social memory complex has achieved a complete understanding of its desire, it may conclude that its desire is to serve any entities who call for aid. These entities whom you may call the Brothers & Sisters of Sorrow move toward this calling of sorrow. They come from all reaches of the infinite creation. They are not sorrowful themselves, but come to aid those that are in sorrow. They are the Wanderers. There are approximately 65 million on Earth.”

“Each Wanderer has unique abilities, biases, specialties so that from each portion of each D represented among Wanderers come array of pre-incarnative talents which may be expressed so that each Wanderer, in offering itself before incarnation, has some special service to offer in addition to the doubling effect of planetary love/light and basic function of serving as beacon or shepherd.”

“There are those of 5D whose abilities to express wisdom are great. There are 4D & 6D Wanderers whose ability to serve as passive radiators or broadcasters of love & love/light are immense. There are many others whose talents brought into 3D are quite varied.”

“The best way of service to others is the constant attempt to seek to share the love of the Creator as it is known to the inner self. This involves self-knowledge & the ability to open the self to the other without hesitation & radiate that which is the essence, or the Heart.”

Wanderer Questionnaire

-- THE NEW ET QUESTIONNAIRE --
Scott Mandelker, Ph.D.

Based upon From Elsewhere: Being ET in America, this questionnaire will help you determine if you are a Star Person or ET Soul on Earth. Answer “yes” or “no” to each question: give yourself **5 points for every “yes”**, then tally your score. Most Wanderers fit the following profile:

A. YOUR CHILDHOOD

1. Did you often think about, daydream, or fantasize about ETs, UFOs, and other worlds?
2. Did you feel like ordinary things around you were somehow strange, like the human body, the color of the sky, gravity, trees and nature, human architecture, and the adults around you?
3. Did you ever feel as if your parents were not your true family, that you had a missing brother or sister, or a home someplace far away? You may have felt like an orphan or a lost child.
4. Did you have magical dreams of flying, invisible spirit friends, and receiving special guidance?
5. Did you look up at the night sky with longing and say: “Take me home...Why am I here? or Why am I so alone? The night sky may have fascinated you with a sense of infinity and endless life.

B. YOUR PERSONALITY

6. Are you kind, gentle, peaceful, and non-aggressive -- not just sometimes, but almost always?
7. Are you hurt, saddened, and confused by human evil, injustice, and cruelty in the world?
8. Do you feel that money, possessions, and a successful career are not really all that important?
9. Do you sometimes feel more comfortable with plants and animals than being with other people?
10. Are you usually sensitive, considerate, generous, and aware of the needs of those around you?

C. YOUR EXPERIENCES

11. Have you felt somewhat different, out-of-place, and alienated from society all your life?
12. Have you had dreams, visions, or sightings of UFOs that inspired real spiritual growth?
13. Are you logical, scientific, non-emotional, and sometimes confused by passion and desire?
14. Have you had dramatic dreams of Earth Changes, the end of the world, and the future?
15. Have you had a clear and uplifting contact with benevolent, respectful, highly-evolved ETs?

D. YOUR INTERESTS

16. Are you interested in science fiction, epic fantasy, angels, high-tech, and a utopian future?
17. Are you interested in Atlantis, Lemuria, channeling, pyramids, New Age books and UFOs?
18. Are you interested in meditation, alternative healing, peace, justice, equality, and freedom?
19. Do you believe human society is ignorant of the basic spiritual truths that you know are true?
20. Do you have a strong sense of purpose and mission to help the Earth and humanity in some way?

SCORING YOUR ET IDENTITY

- 100-75 points: In my opinion, you definitely are an ET soul, but perhaps you are not surprised!
75-25 points: You may or may not be a Star Person; so take more time to look a little deeper.
25-00 points: You are probably not an ET soul, but why are you interested in cosmic matters?

Wanderer Living

“The heart of the discipline of the personality is threefold.

(1) One, know your self.

(2) Two, accept your self.

(3) Three, become the Creator . . . The 3rd step, when accomplished, renders one the most humble servant of all, transparent in personality & completely able to know & accept other-selves.”

“Gaze at the stunning mystery of the One Infinite Creator. Behold the glory, the majesty, the mystery and the peace of oneness. Let no consideration of bird or beast, darkness or light, shape or shadow keep any which seeks from the central consideration of unity.”

“The proper role of the entity in this density is to experience all things desired & then to analyze understand & accept all experiences, distilling from them the Love/Light within them. That which is not needed falls away.”

“We suggest that you attempt to become aware of the other-self as self. Become aware of the intelligent energy expressed in nature and expressed in self-love shared when appropriate.”

Wanderer Wonderings & Worries (common Life Coaching questions)

- 1) Living your dreams . . . Purpose . . . More
- 2) Happy . . . "In" love . . . Fulfilled
- 3) Living happiest, highest or most loving expressions everyday
- 4) Supposed to Be/Do . . . What want to Be/Do?
- 5) Choosing different thoughts, feelings or actions
- 6) Boredom-Motivation --- lack of service to others
- 7) Support – How support others – How others support you?
 - Taking things for granted

"Due to the extreme difference between the vibratory distortions of 3rd density & the higher densities, they generally have some kind of handicap or feeling of alienation which is severe, for example, allergies."

"The desire to serve must be distorted towards a great deal of purity of mind & what you call foolhardiness or bravery. The challenge & danger to the Wanderer is that it will forget its mission, become karmically involved, & thus be swept into the maelstrom & turbulence which it had intended to avert."

Carla Rueckert: "It is no wonder that Wanderers have some difficulty waking up within the illusion we call consensus reality. There is always the fear, as one enters incarnation, that one will not awaken at all, but be lost for the whole life experience

High Vibration: Thoughts – Words – Actions – Food

- Aware of what makes you feel good/bad

Wanderer Meditations & Exercises

“Let us remember that we are all one. This is the great learning & teaching. In this unity lies love. In this unity lies light. This is the fundamental teaching of all planes of existence in materialization: unity, love, light & joy. The 2nd ranking lessons are in meditation & service.”

“The passive meditation involving clearing the mind, the emptying of the mental jumble, is useful for those who wish to achieve an inner silence as a base from which to listen to the Creator.”

“The other type of meditation which may be called visualization has a different goal . . . When the ability has become crystallized, one can effect planetary consciousness.”

Meditation Practice (Calm, Peace, Stillness)

Physical: any physical activity that creates peace, crafts/hobbies, exercise, nature/outdoor

Mental: abstract/critical thinking, daydreaming, dream work, imagery/visualization, journaling, puzzles, reading, reflection

Emotional: acts of loving, compassion, connecting w/others, relationships, reflection

Spiritual: Angels, connection/expansion beyond Ego/Self, God, guides, Higher/Future Self, Infinite Intelligence, Love, Oneness, Past Lives, Stillness of Mind/Heart, Universal Mind/Heart

Exercise 1: "Realize that the moment contains love. That is the lesson of this density. Consciously see that love in awareness & in understanding distortions."

6 words: See the Love in every moment. (Hear/Feel/Sense)

Be the Love in every moment.

Live the Aloha in every moment.

(Huna: Create Love when Love is absent . . . Enhance Love when Love is present.)

Exercise 2: "The Universe is one being. When you view another, see the Creator."

Exercise 3: "Gaze within a mirror. See the Creator." (Smile/Self-Talk)

Exercise 4: "Gaze at the creation, which lies about the mind/body/spirit of each entity. See the Creator."

Pains/Tones: Left/Service to Self – Right/Service to Others

Balance – Love/Light – Harmony

Choice: 3-D (Calm – Balance)

Love: 4-D/5-D (Light)

Unity: 6-D (Harmony)

- **Confederation & Wanderer Contact**

“I am one of the members of the Confederation of Planets in the Service of the Infinite Creator. There are approximately 53 civilizations, comprising approximately 500 planetary consciousness complexes in this Confederation. This Confederation contains those from your own planet who have attained dimensions beyond your third. It contains planetary entities within your solar system & planetary entities from other galaxies (solar systems). It is a true Confederation in that its members are not alike, but allied in service according to the Law of One. They are available to you through your thought.”

Purpose of Confederation: “The desire to serve begins, in the dimension of Love or Understanding (4D), to be an overwhelming goal of the social memory complex.”

“Methods used to awaken Wanderers are varied . . . Many such occur in sleep, others in the midst of many activities during waking hours. Approach is flexible, does not necessarily include Close Encounters.”

“ . . . infringement upon free will is greatly undesired. Wanderers are the only subjects for thought projections which make up “Close Encounters” & meetings between positively oriented social memory complexes & Wanderers. Feeling of being awakened or activated is the goal of this type of contact . . . ”

Council of Saturn

“They are representatives from the Confederation and also those from those vibratory levels of your inner planes bearing responsibility for your 3rd density. The names are not important because there are no names. The name concept is not part of the Council. If names are requested, we will attempt them. However, not all have chosen names. To back up this council, there are twenty-four entities which offer services as requested & are called the Guardians.”

“This Council is located in the 8th dimension of the planet Saturn, taking place, in 3rd dimensional terms, in the rings of Saturn.”

“The Council has not allowed the breaking of quarantine in the time/space continuum. But permission has been granted to appear in thought form capacity for those who have eyes to see. However, there is a certain amount of landing taking place. Some are the entities known to you as the group of Orion.”

Ra & Eisenhower meeting in 1950s: “The one of which you speak met with thought-forms which are indistinguishable from 3rd density. This was a test. We, the Confederation, wished to see what would occur if this extremely positive oriented and simple congenial person with no significant distortion towards power happened across peaceful information from the Confederation. We discovered that this entity did not feel that those under his care could deal with the concepts of other beings and other philosophies . . . ”

- **Catalyst**

challenges, choice points, growth opportunities & possibilities to learn lessons
Reflections --- pings, stings & zings --- knocks off center-love - AFGE

“All catalysts are designed to offer a challenge or lesson. In your density such experience may be loved & accepted or it may be controlled. These are the two paths. When neither path is chosen, the catalyst fails in its design & the entity proceeds until some catalyst strikes it which causes it to form a bias toward acceptance & love or toward separation & control.”

“The quickest way to learn is to deal with other-selves. This is a much greater catalyst than dealing with the self. Dealing with the self without otherselves is akin to living without mirrors. Then the self cannot see the fruits of its beingness.”

“If one opportunity is missed, another will appear until the student of the life experience grasps that a lesson is being offered & undertakes to learn it.”

Pain – Trauma – Sickness

“A catalyst not used fully by the mind & spirit is given to the body.”

“Contagious diseases are those entities of 2nd density which offer an opportunity for this type of catalyst. If this catalyst is unneeded, then the 2nd density creatures as you would call them, do not have an effect

- **Density**

Density of Light or consciousness/vibration . . . Ra analogy of "dimensions" - Octave system, higher the octave, higher the density or consciousness

"The term density is a, what you call, mathematical one. The closest analogy is that of music, whereby after seven notes on your western type of scale, if you will, the eighth note begins a new octave. Within your great octave of experience which we share with you, there are seven octaves or densities. Within each density there are seven sub-densities. Within each sub-density, there are seven sub-sub-densities. Within each sub-sub-density, seven sub-sub-sub-densities and so on infinitely.

1st Density: Cycle of Awareness

Elements: Fire – Air – Water – Earth

"The 1st or red ray density, though attracted towards growth, is not in the proper vibration for those conditions conducive to the spark of awareness."

"The air & fire of that which is formless literally illuminates & forms the formless, for earth & water were, in the timeless state, unformed. As the active principles of fire & air blow & burn incandescently about that which nurtures that which is to come, the water learns to become sea, lake & river, & the earth learns to be shaped, both offering opportunity for viable life."

2nd Density: Cycle of Growth

Length of Cycle: infinite # to awareness

"There are three types of second-density entities which become, shall we say, enspirited. The first is the **animal**. This is the most predominant. The second is the **vegetable**, most especially that which you call sound

vibration complex "tree." These entities are capable of giving & receiving enough love to become individualized. The third category is mineral."

Progressing from 2-D to 3-D: "so do your third-density beings invest or clothe some second-density beings with self-awareness. This is often done through the opportunity of what you call pets."

3rd Density: Cycle of Self-Awareness -- "Choice"

Length of Cycle = 75,000 years (Three 25,000 yr cycles)

(As humans, we are currently in the last years of this cycle.)

"The 3rd density is a choice . . . The remainder of the densities is continuous refining of the choice. The choice is, as you put it, the work of a moment but is the axis upon which the creation turns.

"The purpose of incarnation in 3rd density is to learn the ways of love."

"The 3rd density has an infinite number of levels."

"There is one necessity for 3rd density, namely, self-awareness or self-consciousness. The body must be capable of abstract thought. The fundamental necessity is the combination of rational & intuitive thinking."

4th Density: Cycle of Love

Length of Cycle = 30 million years (1 lifetime/90,000 yrs)

"The necessity for graduation to 4th density is an ability to use, welcome and enjoy a certain intensity of the white light of the One Infinite Creator."

Life in 4-D (Positive Service to Others)

- Bipedal body, much denser in consciousness & more full of life
- 4th density is not of words, unless chosen . . . aware of the thoughts & vibrations of otherselves
- Compassion & understanding
- Striving towards wisdom or light (5-D)
- Individual differences are pronounced & automatically harmonized by group consensus
- "There is no disharmony within the self or within other peoples. It is not within the limits of possibility to cause disharmony in any way."

"The 4th density is one of revealed information. Selves are not hidden to self or otherselves."

5th Density: Cycle of Light (Wisdom)

Length of Cycle = 50 million years

"The wisdom density is an extremely free density whereas the **lessons of compassion leading to wisdom necessarily have to do with otherselves.**"

"5th density is **extremely white** in vibration."

"The 5th density harvest is of those who accept the **honor & duty of the Law of One.**"

"In 5th density the manifestation of the physical complex is more and more under the control of the conscious mind complex. Therefore the 5th density entity may **dissolve one manifestation & create another.**"

6th Density: Cycle of Unity

Compassionate Wisdom – Length of Cycle = 75 million yrs

“6th density is white with a golden quality. This quality relates to the blending into wisdom of the compassion learned in 4th density.”

“I am 6th density with a strong seeking towards 7th density. The harvest for us will be in only (approximately) 2.5 million of your years and it is our desire to be ready for harvest as it approaches our space/time continuum.”

“We seek without polarity. Thus we do not invoke any power from without, but our search has become internalized as we become light/love and love/light. We seek balances between love and wisdom which more and more allow our understanding of experience to be informed that we may come closer and closer to the unity with the One Creator which we so joyfully seek.”

“The Higher Self is a manifestation given to the late 6th density entity as a gift from its future selfness. This 6th density self offers its living bank of memory of experience to the Higher Self. Knowing this, you may see your self, your Higher self, and your mind/body/spirit totality as one. They are the same being.”

“When the magical personality is properly invoked the self has invoked its Higher Self. The magical personality is a being of unity, a being of 6th density, & the equivalent of what you call your Higher Self & at the same time is a personality enormously rich in variety of experience and subtlety of emotion.”

7th Density: Gateway Cycle

Sacramental nature of all things

“At the 7th level or dimension, we shall, if our humble efforts are sufficient, become one with all, thus having no memory, no identity, no past or future, but existing in the all.”

“The 7th density being, the completed being, the Creator who knows Itself, accumulates mass (i.e. spiritual mass) and compacts into the One Creator once again (presumably as it enters 8th density).”

8th Density: Moves into the Mystery

“The 8th density functions also as the beginning density or 1st density of the next octave of densities.”

“We can not speak in firm knowledge of all the creations. We only know that they are infinite. We assume an infinite number of octaves . . .” which all consciousness periodically coalesces and again begins. We understand it is cyclical in nature.”

- **Distortion**

- A perspective or any concept/idea seen as individual/separate (since all is One), not necessarily a negative term
- "Only One, One Light, One Love"

1st Distortion: Free Will

Q: ". . . the first distortion of intelligent infinity is the distortion of what we call free will. Can you give me a definition of this distortion?"

Ra: "In this distortion of the Law of One it is recognized that the Creator will know Itself."

Q: ". . . the Creator then grants for this knowing the concept of total freedom in choice in the ways of knowing?" . . . Ra: "This is quite correct."

2nd Distortion: Love

"The 1st distortion, free will, finds a focus which is known to you as logos, the Creative Principle or love. The second distortion is the distortion of love."

"The distortion love is the great activator & primal co-Creator of various creations using intelligent infinity. Love uses Its intelligent energy to create a certain pattern of illusions or densities in order to satisfy Its own intelligent estimate of a method of knowing itself."

3rd Distortion: Light (energy/movement of Love)

"This intelligent energy thus creates a distortion known as Light. From these 3 distortions come many, many hierarchies of distortions each having its own paradoxes to be synthesized, no one being any more important than another."

"The origin of all energy is the action of free will upon love. The nature of all energy is light, including the inner light which is the guiding star of the self."

- **Polarity & Service**

“The positive polarity attempts to see through the illusion to the Creator in each mind/body/spirit complex, but for the greater part is concerned with behaviors and thoughts directed toward otherselves in order to be of service.” (Service to Others)

“The negative polarity depends more heavily upon the illusory separation between the self & all other mind/body/spirit complexes.” (Service to Self - “control others”) (SS is service to others – Unity)

“In truth there is no right or wrong. There is no polarity for all will be reconciled at some point in your dance through the mind/body/spirit complex with which you amuse yourself. This belief in polarity is chosen instead of understanding the complete unity of thought that binds all things together.”

- **Archetypes**

Astrology – Tarot – Kabbalah

Astrology: each sign has unique expressions of the Creator

- Ex. Body – each organ is specialized, yet part of body
 - each cell in organ is specialized, yet part of organ

- Elemental influences

- Fire: ignites & lights
- Earth: grounds & pounds
- Air: drifts & lifts
- Water: smooths & soothes

- **Harvest & Cycles**

Ascension/Graduation/Harvest: progressing to another density

“One major cycle is approximately 25,000 of your years. There are 3 cycles of this nature. Those who have progressed sufficiently may be harvested at the end of any of these 3 major cycles. After this is completed (75,000 years) all are harvested regardless of their progress, for during that time the planet itself has moved through the useful part of that dimension & begins to cease being useful for the lower levels of vibration within that density.”

“Your planet is 3rd density in the beingness of its peoples, but the planet is now in a 4th density space/time continuum.” (Aquarius – 2012)

“The 4th density is as regularized in its approach as the striking of a clock upon the hour. Your planetary sphere has spiraled into space/time of a different vibrational configuration. This causes the planetary sphere to be molded by these new distortions -- many will repeat the 3rd density cycle.”

“The harvest is now. There is at this time no reason to aim for longevity, but rather to encourage efforts toward seeking the heart of the self, for this which resides clearly in the violet-ray energy field will determine the harvesting of each person.”

3-way Split of Harvest

- Harvestable entities of positive polarity: remain on 4-D Earth
- Harvestable entities of negative polarity: go to another 4-D planet
- Unharvestable entities: go to another 3-D planet to repeat cycle

QUESTION: "As this transition continues into 4th density activation, in order to inhabit this 4th density earth it will be necessary for all 3rd density physical bodies to go through the process which we refer to as death. Is this correct?" --- RA: "This is correct."

QUESTION: "The book Oahspe says that if an entity is over 51% service to others & less than 50% service to self, then the entity is harvestable for the positive 4th dimensional level."

--- RA: "This is correct."

"In time of harvest there are always harvesters. There is some supervision necessary to ensure that this bounty is placed as it should be without bruise or blemish. There are 3 levels watching over the harvest."

"The 1st type is planetary and that which may be called angelic. This type of helper includes the Higher Self of an entity & those inner plane entities which have been attracted to this entity through its inner seeking."

"The 2nd class are those of the of the Confederation who stand at the edge of the steps of light/love so that those entities harvested will not, no matter how confused or unable to make contact with their Higher Self, stumble & fall away for any reason other than the strength of the light. These Confederation entities catch those who stumble & set them aright so that they may continue into the light."

"The 3rd group is called the Guardians. This group is from the octave above our own & serve as light bringers. They provide the precise emissions of light/love in exquisitely fastidious disseminations of discrimination so that the precise light/love vibration of each entity may be ascertained."

“We do not seek for the success of added numbers to the harvest for this would not be appropriate. We are servants. If we are called, we shall serve with all our strength. To count the numbers is without virtue.”

“The 4th density is a vibrational spectrum. Your time/space continuum has spiraled your solar system into this vibration. This will cause the planet itself to electromagnetically realign its vortices of reception of the in-streaming of cosmic forces expressing themselves as vibrational webs so that the Earth will be 4th density magnetized . . . This will cause your planet to have some ruptures in its outer garment while making it appropriately magnetized for 4th density. Those who remain in 4th density on Earth will be of positive orientation.”
