- There is More to Discover About the Akashic Records

## **Akashic Records: Exploring the Science and Nature**

At Armichi Wellness we knew very little about the Akashic Records and wanted to discover more about them. We wanted to gain more precise information about their nature and how they affect levels of consciousness.

### **What Are the Akashic Records?**

The **Akashic records** (from Akasha or Eckasha) are described in many ways by different sources. Wikipedia states that they are considered by certain religious or philosophical schools as being *"a compendium of all universal events, thoughts, words, emotions and intent ever to have occurred in the past, present, or future in terms of all entities and life forms, not just human. They are believed by theosophists to be encoded in a non-physical plane of existence known as the mental plane."*

### **How We Conducted Research on the Akashic Records**

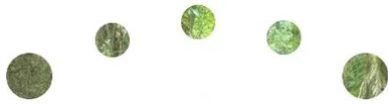

When we conduct Resonance Tests we have found that the best results are obtained with no prior knowledge so that a completely neutral expectation of results (no bias) can be maintained during testing. However in a case like this one, when we approach a subject with almost minimal knowledge, there is some research that needs to be done in order that the right questions can be asked. We have found that it is best when researching neither to accept or reject any new information until it can be verified using Resonance Testing. We have also discovered that only a small amount of research is needed in order to create a framework for the questions since many of the questions about detail become evident during testing. So we have read the Wikipedia article [Akashic Records](#) and parts of an article by Lisa Renee: [Emergence of Christ-Michael](#).

### **Akashic Records Resonance Tests**

We started with the most basic question: *Do the Akashic Records exist?* and then continued with further questions.

Here is what we discovered (ie, these statements tested positive.)

### **Do The Akashic Records Exist?**

- *Yes, the Akashic Records do exist.*

### **Where are the Akashic Records Held?**

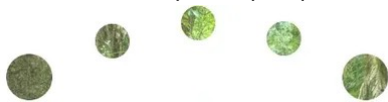

- *The Akashic Records are imprinted into in every cell in our body.*

As we know, it is our DNA that creates every living cell so we wanted to know if the Akashic Records originate in our DNA:

- *The Akashic Records are not held in our physical DNA.*
- *The Akashic Records are held in the geometry (space) our DNA occupies.*

We intuited that geometry is key so we asked more questions to expand on this:

- *It is this geometry that defines the Akashic Record.*
- *Geometry affects the imprint (of charge) on consciousness.*
- *The imprint perpetuates the Akashic Records through all cells.*

### **What Form are the Akashic Records?**

- *The Akashic Records have a charge.*
- *They are not in the pure form of a transverse or longitudinal field.*

This result surprised us so we wanted to know more:

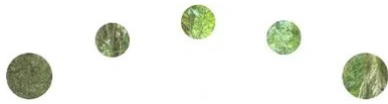

- *The Akashic Records have a corresponding longitudinal wave associated with them.*
- *The Akashic Records are in the form of plasma.*

### **What Does an Individual's Akashic Record Hold?**

- *The Akashic Records hold a record of every action we have taken in all lifetimes (in all dimensions).*
- *The Akashic Records hold a record of every word we have spoken in all lifetimes (in all dimensions).*
- *The Akashic Records hold a record of every intention we have held in all lifetimes (in all dimensions).*
- *The Akashic Records do not hold a record of our thoughts in these lifetimes.*

This was an interesting result and examining the physics we can see that both actions and intention (focused thought) are or originate from longitudinal compression waves, whereas thoughts are transverse waves (not yet in a form that can be transformed into negentropy / consciousness).

## What Does an Individual's Akashic Records Hold Relating to the Collective?

It has often been written that the Akashic Records also hold all information experienced by the collective so we wanted to investigate this further:

- *An individual's Akashic Records do not hold a record of every action the collective has taken in all lifetimes (in all dimensions).*
- *This was also the case for words, intentions and thoughts.*

So if our individual Akashic Record do not hold information about the collective, we wanted to find out if there are records that hold collective information and where are they held?

## Akashic Records for the Collective

- *There are records that hold information about the collective.*

These are held by the following:

- *Whales*
- *Elephants (this group tested positive but less strongly so than the others)*
- *Giant tortoises*
- *Trees*
- *Crystals*
- *Water*

We have not tested to determine which types or species within these groups are those that hold the records.

## Relationship Between Akashic Records and Miasms

We were interested to discover the relationship between miasms and an individual's Akashic Record.

- *The Akashic Record of an individual determines their miasm(s).*
- *An individual's miasm(s) change(s) as their Akashic Record changes.*

Since miasms have been considered as being inheritable, we wanted to find out if this was true and if the same was true for Akashic records and got very interesting results:

- *It is possible for miasms to be inherited - negative result*

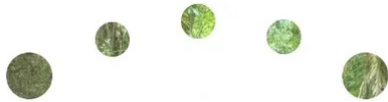

AND...

- *It is not possible for miasms to be inherited - negative result*

ie, these are subjective statements, formed from opinion not formed from fact, that cannot ever have a right or wrong answer. This is a bit like testing the statement 'blue is a nice colour'. We can only test how much an individual likes the colour blue on an assigned scale (0-10).

We wanted to know if the same applied to the Akashic Records.

### **Is it Possible for An Individual's Akashic Record be Inherited?**

- *An individual's Akashic Record is not inherited in entirety*
- *An individual's Akashic Record is not inherited in part.*
- *The term inherited is not applicable to the Akashic Record*
- *An individual's Akashic Record is unique to that person*

However we feel that there is more to this subject than we have discovered so we will continue to work on finding out more.

### **Do the Akashic Records Affect an Individual's Level of Consciousness**

- *An individual's Akashic Record does affect their level of consciousness.*
- *An individual's level of consciousness does not affect their Akashic Record.*
- *An individual's consciousness does affect their Akashic Record.*

This means that the Akashic Record is a subsequence of consciousness and does not shape levels of consciousness.

### **There is More to Discover About the Akashic Records**

We have only just touched the surface of this subject because our level of understanding is limited by our connectivity with the universal field. This connectivity is partly due to the establishment and expansion of our DNA into 144 fully connected strands of light. The tester's DNA has only just developed into the full 144 strands.
