

Global Levels of Consciousness by Country: January 2023

The collective souls of each country.

In this article we use Resonance Testing to measure the average levels of consciousness (Dr David Hawkins' Scale of Consciousness from 0 - 1000) for the entire global population and for most larger countries and regions, as at 29th January 2023.

Global Levels of Consciousness by Country: January 2023

Global Average is 785 (the level of sages)

In January 2019 before everything appeared to turn upside down in the world, the average level of consciousness on the planet was 212.

By Continent/Region and by Country

Please note:

1. Averages are not equivalent to a standard mean but a weighted mean. As people's levels of consciousness increases, their influence increases on a non-linear scale (like an exponential relationship).
2. Also worth noting is that the increases in levels of consciousness both in the individual and collective are observed as being non-linear, meaning that a test result may increase by several points or even more from one day to the next.
3. In this publication, there has been just a slight increase overall compared with the last publication with a few exceptions as follows:
4. Hawaii, South Korea and Turkmenistan are now resonating at over 500, the level of love.
5. The UK, Ukraine, Belarus and Taiwan have all reached over 600 which is the level of peace, along with Sardinia. It will be interesting to see how this change affects these countries.
6. Afghanistan and Ghana are now resonating over 700, the level of sages.
7. For transparency, the results currently test as being accurate for all countries to within 3 points on 29th January 6.40pm.
8. The tester's average level of consciousness when conducting these tests was 1000, now back to previous levels, having dropped a few points over Christmas.
