

In January 2019 before everything appeared to turn upside down in the world, the average level of consciousness on the planet was 212.

By Continent/Region and by Country

Any countries whose average levels of consciousness is 100 more or less than the average for the whole continent/region is highlighted by ***

Please note:

1. Averages are not equivalent to a standard mean but a weighted mean. As people's levels of consciousness increases, their influence increases on a non-linear scale (like an exponential relationship).
2. Also worth noting is that the increases in levels of consciousness both in the individual and collective are observed as being non-linear, meaning that a test result may increase by several points or even more from one day to the next.
3. In this July publication there has been a significant recorded increase in levels of consciousness from 633 in May 2022 to 735 in July. Most of this increase happened over the summer solstice as Resonance Tests show that the levels were 642 on June 20th and then 725 on June 22nd.
4. What's really incredible is that we now have a country whose average level of consciousness is over 900! Take a look at Bhutan and you will see that it is resonating at 902. Zambia is not far behind at 899 and both Sri Lanka at 800 and Djibouti at 825 also have incredibly high levels of consciousness.

5. Note how Canada has suddenly jumped from 448 in May to 702 (the level of sages). All the suppression has finally encouraged people to become sovereign beings and to hold their own light. We have noted that there seems to be a direct correlation between oppression and low levels of consciousness.
6. The other change we have noticed is that this month, there are a lot more countries with levels of consciousness of at least 100 points above or below the average for the continent. It would seem that some countries are leading the way towards Ascension and others have yet to hold the light collectively. Let's take Asia: Average level of consciousness are currently 679 with Vietnam, Cambodia, Nepal, Bhutan and Sri Lanka at least 100 points higher and Myanmar, Brunei, North Korea all at least 400 points below.
7. For transparency, the results currently test as being accurate for all countries to within 0 points as at 24th July 19.12pm.
8. The tester's average level of consciousness when conducting these tests was 1000.
