

Global Levels of Consciousness by Country: May 2022

The collective souls of each country.

In this article we use Resonance Testing to measure the average levels of consciousness (Dr David Hawkins' Scale of Consciousness from 0 - 1000) for the entire global population and for most larger countries and regions, as at May 2022.

Global Levels of Consciousness by Country: May 2022

Global Average is 633 (the level of peace)

In January 2019 before everything appeared to turn upside down in the world, the average level of consciousness on the planet was 212.

By Continent/Region and by Country

Please note:

1. Averages are not equivalent to a standard mean but a weighted mean. As people's levels of consciousness increases, their influence increases on a non-linear scale (like an exponential relationship).
2. Also worth noting is that the increases in levels of consciousness both in the individual and collective are observed as being non-linear, meaning that a test result may increase by several points or even more from one day to the next.
3. For the May publication, we can see that there has been just a small increase in levels of consciousness from March 2022. Interestingly we are seeing a lot of ups and downs in the world; a pushing and pulling of the energies; a battle of the light and dark. We can all help the light by shining extra brightly from within, whatever we see going on around us in the third dimensional projection.
4. For transparency, the results currently test as being accurate for all countries to within 0 points as at 16th May 20.26pm.
5. The tester's average level of consciousness when conducting these tests was 1000.
