

Global Levels of Consciousness by Country: November 2022

The collective souls of each country.

In this article we use Resonance Testing to measure the average levels of consciousness (Dr David Hawkins' Scale of Consciousness from 0 - 1000) for the entire global population and for most larger countries and regions, as at 28th November 2022.

Global Levels of Consciousness by Country: November 2022

Global Average is 783 (the level of sages)

In January 2019 before everything appeared to turn upside down in the world, the average level of consciousness on the planet was 212.

By Continent/Region and by Country

Any countries whose average levels of consciousness is 100 more or less than the average for the whole continent/region is highlighted by ***

Please note:

1. *Averages are not equivalent to a standard mean but a weighted mean. As people's levels of consciousness increases, their influence increases on a non-linear scale (like an exponential relationship).*
2. *Also worth noting is that the increases in levels of consciousness both in the individual and collective are observed as being non-linear, meaning that a test result may increase by several points or even more from one day to the next.*
3. *In this publication, there have been some significant increases of individual countries which we detail below.*
4. *The change in North America has been slight but interestingly, the USA has now collectively reached the level of sages at 703 from 695 in September.*
5. *In Europe, there has been a bigger collective increase of 34 points from 588 in September to 622 in November. The most notable change has been in the Ukraine which has jumped up from 505 to 599, almost at the level of peace! However, just look at Greece whose light levels have also jumped from 500 to 581.*
6. *Asia has now collectively reached 700 (was 683) with some amazing increases in Pakistan from 243 to 343, Myanmar 182 to 244, North Korea 202 to 323, South Korea 426 to 495 and Brunei 262 to 335.*
7. *The Middle East has experienced a small change of 12 points this month but two notable countries are Palestine which has moved into the level of sages collectively from 699 to 706 and the UAE which has reached the level of love at 501 from 491.*
8. *Africa now moved into the 800s at 820 collectively with notable increases in Tunisia from 449 to 544, Sierra Leone 687 to 774 and Rwanda 439 to 532.*
9. *In South America we see that Venezuela has jumped from 634 to 697, Ecuador from 712 to 774 and Chile 688 to 755; increases that are all well above the 28 point South American continent increase this month.*
10. *The Australasian continent light levels have increased hugely this month from 602 to 673, thanks due to the massive increase in levels in Australia from 531 to 586, Fiji 600 to 726, Papua New Guinea 602 to 672 and Vanuatu 786 to 866.*
11. *For transparency, the results currently test as being accurate for all countries to within 0 points on 28th November 7.40pm.*
12. *The tester's average level of consciousness when conducting these tests was 1001* (see note below).*

** We did not think it was possible to carry more light than 1000. However, the tester, Sarah Diggins has, on one occasion recently and without intention, reached level 10,000, which coincided with reaching a state of the all-that-is (being one with all where the I no longer exists). This was just a fleeting glimpse of this state and since then she has reached just a few points over 1000 on just a couple of occasions. However, at this level she receives the Resonance Test results instantaneously and before testing.*
