

Levels of Consciousness: Actresses - March 2023

The souls of actresses.

Below are the average levels of consciousness (Dr David Hawkins' Scale of Consciousness from 0 - 1000) for various actresses and performers, as at March 2023.

Levels of Consciousness: Actresses - March 2023

This month the biggest increase is in Samaire Armstrong whose levels have jumped from 621 to 677. Several actresses have had small increases or decreases. The most significant has been with Letitia Wright whose levels of consciousness had previously increased significantly from 339 in November 2022 to 391 in January 2023, but this month her levels have dropped down to 345; almost back to her November level. This is a result typical of many that we have noticed and which we mentioned in our September 2022 edition. Effectively we we are all trying to establish a new vibrational set point and

we are finding ourselves wavering above and below it until the consciousness that we are managing to hold stabilises at a particular level. This is a bit like trying to hit the right note when learning to sing - we may wander above and below the note until we find a way to hold the perfect pitch.

Please note that the readings that were not possible obtained the following results:

- Levels of consciousness zero - negative
- Level of consciousness more than zero - negative.

However, since there have been no reports of the deaths of Angelina Jolie, Catherine Zeta Jones, Jennifer Anniston, Katy Perry or Kerry Washington, we don't understand this result.

Please see our Article Not Everything is As it Seems: People that lists other well known people whose levels of consciousness do not resonate, despite being seen in the public eye.
