

Levels of Consciousness: Actresses - May 2023

The souls of actresses.

Below are the average levels of consciousness (Dr David Hawkins' Scale of Consciousness from 0 - 1000) for various actresses and performers, as at May 2023.

Levels of Consciousness: Actresses - May 2023

This month the biggest increase in actresses is with Zoe Saldana whose level of consciousness have jumped from 562 to 622. Conversely, both we have observed falls in both Doutzen Kroes from 432 to 364 and Samaire Armstrong from 677 to 634. We are continuing to witness variability of levels of consciousness as we each of us try to establish a new, higher vibrational set point and struggle to hold the light levels. As a result we find ourselves vibrating up and down until the new higher light levels become established within our bodies. We noted in the last publication that this is a bit like trying

to hit the right note when learning to sing - we may wander above and below the note until we find a way to hold the perfect pitch.

- Alicia Silverstone 552
- Angelina Jolie (reading not possible)
- Catherine Zeta Jones (reading not possible)
- Doutzen Kroes 364
- Jennifer Anniston (reading not possible)
- Jennifer Lopez 2
- Jessica Biel 682
- Katy Perry (reading not possible)
- Kerry Washington (reading not possible)
- Letitia Wright 324
- Mayim Bialik 645
- Rosanne Barr 562
- Salma Hayek 322
- Samaire Armstrong 634
- Zoe Saldana 622

Please note that the readings that were not possible obtained the following results:

- Levels of consciousness zero - negative
- Level of consciousness more than zero - negative.

We would typically see this kind of reading when the soul has left the body. However, since there have been no reports of the deaths of Angelina Jolie, Catherine Zeta Jones, Jennifer Anniston, Katy Perry or Kerry Washington, we don't understand this result.

Please see our Article Not Everything is As it Seems: People that lists other well known people whose levels of consciousness do not resonate, despite being seen in the public eye.
