VINES

Trumpet Vine
Honeysuckle, various flavors
Cardinal Vine
Hummingbird Vine

You can also attract the hummingbirds with a feeder and the right sugar water formula (1 part sugar, 4 parts water) and a organic red color dye, also available pre packaged at your neighborhood hardware store.

If you don't mind some fruit fly's on the property, try a banana peel, ripe fruit on a bowl next to your hummingbird feeder or a water source for the birds on your property.
