

## Misdirection and Lies

I've been asked about abortion before, and while I touch on it very lightly, this week's piece is meant to focus on the Democrat's playbook for 2024. Vice President Harris was in Wisconsin yesterday (January 22, 2024) to tout the Biden/Harris "Reproductive Freedoms" circus. She was in Waukesha on what is the 51st anniversary of the Supreme Court decision *Roe v Wade* to talk up the only issue that the Dems have beaten the Republicans on across the nation. She was propped up by Senator Baldwin, the Democrat Congresswoman from Milwaukee Gwen Moore, and Wisconsin's Lt. Governor Sara Rodriguez. The optics were not in error, their only intent is to frame this issue as to push back against the Republicans by using hyperbole, claiming President Trump snatched away women's freedoms, and that our very democracy is on the chopping block in 2024 as Biden/Harris and Baldwin attempt to lead the misdirection that has served them so effectively. Let's unpack this!

The inflation rate hovered between 1% and 3% for most of President Trump's term in office. According to the Department of Labor's data published last week, three months after Biden was sworn in, inflation soared to an average of 7% in 2021, 6.5% in 2022 and was at 4.1% in 2023. This is a real issue that affects the pocketbook and financial health and well-being of most Americans. But Trump is coming after their freedoms. Misdirection.

We were told that the COVID vaccine was going to help us and that once inoculated, we would not catch it again. That children couldn't attend school for the very real risk of dying in huge numbers. We were told to shelter in place, that we couldn't even worship with our church outside and distanced. Well, now we know that the COVID vaccine wouldn't prevent future infections. We know that the effects on children were falling to an alarming depth for academic achievement, especially in math and reading scores, while suffering a plethora of social, mental well-being, and emotional issues. But Trump is coming after their freedoms. Misdirection.

From the unsecured southern border, far too many Americans dying from fentanyl deaths, a further divided America along racial lines, and an eroded trust in our whole system, the Biden/Harris/Baldwin plan only has one play in their 2024 playbook. I call it misdirection to be kind, but in all actuality, they are intentionally deceiving us. Here in western Wisconsin, we grew up calling them lies. Most people I speak with as I travel Wisconsin have much stronger terms for the games the Dems play with our lives. The Dems lie to us about the truth around abortion because that is the only play they have. As the election cycle ramps up for 2024, please remember the misdirection, the lies, the scores of victims from their handling of COVID, the families hurting from their reckless economic policies, and the school kids who are fighting to catch up on their reading comprehension, their math skills, and finding a way to deal with the emotional scars inflicted upon them by Biden. By Harris. By Baldwin. You can reach out to Staceyforwisconsin and help take back Wisconsin, take back our nation, and support sensible solutions to create a restored republic. Our future is quite literally at stake. Please join me!
