Discover your potential

Saturday School

About Bright Young Minds

At Bright Young Minds Tuition Centre we specialise in English, Afrikaans & Mathematics Tuition from Grade R to Matric. Our remedial programs are designed to close the gap between what a student knows and what he/she is expected to know. Students are taken back to a level that they understand. The work will gradually build up and become more challenging as time progresses, until your child is fully caught up.

Saturday School Remedial Lessons Special Offer

We are currently running a Saturday School special offer. Students attend English, Mathematics and Afrikaans remedial lessons every Saturday for 2 hours (40 minutes per subject). The fee is R1800 per month. Limited spaces are available - booked on a first come first served basis.

Our Teachers

Our friendly tutors will make your child feel at home. We employ specialist subject experts and qualified teachers who offer a child-centered approach based around your child's unique learning needs.

Individualised Learning Programmes

The full assessment in Reading, Comprehension, Spelling and Mathematics that we carry out on students prior to admission, together with regular reviews of progress, enables our tutors to target their teaching to learner's strengths and work to remediate areas of weakness. Every child is working on an individualised learning programme based on their academic needs.
