

April 18, 2024

Industrial Energy and Engie have worked with Philadelphia Visitor Center Corporation to setup a green energy solution for The Independence Visitor Center. Priddy Wind was chosen to power the site, as the product continues to be the most viable option in the marketplace for organizations looking for site-specific green energy, that does not require an extensive contract or a settlement for differences.

The Independence Visitor Center is the official visitor center of Independence National Historical Park and the Philadelphia region.

Here, visitors can speak with knowledgeable Park Rangers about Independence Hall, the Liberty Bell Center, and other Park sites. Visitors can also enjoy interactive exhibits and historic films at no cost.

At the Philadelphia Information Desk, visitors can speak with friendly, multilingual Visitor Experience Associates for expert advice planning their time, or to purchase tickets for attractions and museums.

Additional amenities available at the Independence Visitor Center include free maps and brochures, WiFi access, public restrooms and grab-and-go cafe.
