

April 9, 2024

Industrial Energy and Engie have secured another Priddy Wind deal, as a renewable energy source for the Museum of the American Revolution in Philadelphia. The museum, which is a LEED Gold certified building, will be powered 100% by wind energy by 2026.

The Museum of the American Revolution uncovers and shares compelling stories about the diverse people and complex events that sparked America's ongoing experiment in liberty, equality, and self-government. Through the Museum's unmatched collection, immersive galleries, powerful theater experiences, and interactive elements, visitors gain a deeper appreciation for how this nation came to be and feel inspired to consider their role in ensuring that the promise of the American Revolution endures.

Located just steps away from Independence Hall, the Museum serves as a portal to the region's many Revolutionary sites, sparking interest, providing context, and encouraging exploration. The Museum, which opened on April 19, 2017, is a private, non-profit, and non-partisan organization. For more information, visit www.AmRevMuseum.org or call 877.740.1776.

Industrial Energy is one of the longest tenured energy advisors in the industry. We represent supply of energy for businesses, via strategic partnerships, which have afforded us access to proprietary solutions and contractual arrangements for our clients.

Our company leadership has over 35 years of experience in providing supply, strategy, and full coverage, and we function in the form of on-staff energy advisors, to best assist our customers and end users.

Our group has also led in the area of renewable energy supply, with site-specific PPAs and VPPAs. (Power Purchasing Agreements and Virtual Power Purchasing Agreements). Industrial Energy has renewable supply availability across the country.
