National Constitution Center, ENGIE Add Green to the Red, White, and Blue of America's Town Hall in Energy Deal

HOUSTON, Texas – March 19, 2019 – ENGIE Resources and the National Constitution Center have reached a six-year agreement for retail electricity supply that includes Green-e® certified Renewable Energy Credits (RECs). Advisory services were provided by Industrial Energy Inc.

The RECs on behalf of this agreement equate to the displacement of more than 27 million pounds of coal burned, or the greenhouse gas emissions of 5,400 passenger cars. Green-e® RECs are administered by the Center for Resource Solutions and help build a market for renewable electricity.

“As museums become high tech entertainment and educational centers, their energy profile has changed,” said Brad McIntyre, Business Development Director of the National Constitution Center. “Today, the energy use profile of museums is often well above other buildings, and there is an opportunity for energy partners like ENGIE to deliver sophisticated supply solutions, efficiency projects, and project finance.”

“The National Constitution Center is a national treasure,” said Graham Leith, Senior Vice President, Head of Retail, ENGIE Resources. “It’s an honor to serve a museum that not only inspires citizenship but demonstrates it by supporting clean, renewable energy.”

About the National Constitution Center

The National Constitution Center in Philadelphia inspires citizenship as the only place where people across America and around the world can come together to learn about, debate, and celebrate the greatest vision of human freedom in history, the U.S. Constitution. A private, nonprofit organization, the Center serves as America’s leading platform for constitutional education and debate, fulfilling its Congressional charter “to disseminate information about the U.S. Constitution on a nonpartisan basis.” As the Museum of We the People, the Center brings the Constitution to life for visitors of all ages through interactive programs and exhibits. As America’s Town Hall, the Center brings the leading conservative and liberal thought leaders together to debate the Constitution on all media platforms. As a center for Civic Education, the Center delivers the best educational programs and online resources that inspire, excite, and engage citizens about the U.S. Constitution. For more information, call 215-409- 6700 or visit constitutioncenter.org.

About ENGIE Resources LLC

ENGIE Resources is a subsidiary of ENGIE North America Inc. and part of the international energy group ENGIE. As a leading electricity supplier to non-residential consumers in the United States, we deliver a combination of products and

services, highly rated customer service, and financial strength that provides unique and compelling value to our customers. Offering solar and other renewable energy options, demand response, and on-bill financing, we assure our customers that they can count on us to create effective, customized plans for them. Our in-house energy experts work with customers to understand their operations, tailoring products and services specific to their business and budget.
