# National Liberty Museum Makes Low Carbon Commitment with ENGIE

HOUSTON – November xx, 2019 – ENGIE Resources LLC and the National Liberty Museum today announced a five-year energy agreement through 2023 that demonstrates the museum’s commitment to civic responsibility and the environment while achieving budget certainty.

National Liberty Museum will receive Green-e® certified Renewable Energy Credits (RECs) to match 100% of its energy usage, Green-e® RECs are determined by the Center for Resource Solutions to be independently verified to represent the environmental benefits of one MWh of renewable energy. The RECs in this agreement represent the environment benefits equal to either the removal of more than 1.2 million pounds of coal burned.

Located in the heart of historic Philadelphia, the National Liberty Museum opened in 2000 and brings liberty to life through interactive exhibits, contemporary works of art, and stories of heroes whose character and courage have expanded liberty for all.

“Quote from NLM...”

NLM will also achieve budget certainty throughout the term of this agreement with a fixed price structure. “With their unique focus on exhibit lighting, temperature control, and humidity, museums tend to have energy intensity levels that are above average compared to other buildings,” said Brad McIntyre, business development manager at ENGIE Resources. “We have the risk management expertise to help address the volatile commodity markets. We also have a sincere interest to serve this sector because of its vital roles in society, from guardians of history to cultural exchange and mutual understanding to supporting the local business climate through cultural tourism.”

### About the National Liberty Museum

Located in the heart of historic Philadelphia, the 30,000 square foot National Liberty Museum brings liberty to life through stories of people whose character and courage have expanded liberty for all. The Museum’s exhibits, educational experiences and public programs inspire visitors to think about liberty as an ongoing human quest that we all share. NLM is an independent nonprofit organization that brings liberty to life through stories of people whose character and courage have expanded liberty for all.

### **About ENGIE Resources**

ENGIE Resources LLC is a subsidiary of ENGIE North America Inc. and part of the international energy group ENGIE. As a leading electricity supplier to non-residential consumers in the United States, we deliver a combination of products and services, highly rated customer service, and financial strength that provides unique and compelling value to our customers. Now offering solar and other renewable energy options, demand response, and on-bill financing, we assure our customers that they can count on us to create effective, customized plans. Our in-house energy experts work with customers to understand their operations, tailoring products and services specific to their business and budget.
