

Continue working towards the long-term vision of making GDR a universally accepted and stable digital currency.

GDR ROADMAP

FUTURE OF GDR

Conduct regular audits and provide transparency reports.

Engage in continuous research and development to improve the platform and adapt to changing need and trends

Q1-2024

Beta launch of the GDR platform.

Collect feedback from early adopters.

Continue refining the platform based on user feedback

Q4-2023

Refine the developed components based on feedback from initial testing.

Conduct advanced testing for stability, security, and scalability.

Complete 2023

Developed and launched the GDR's website www.gdr.world.

Published the white paper detailing GDR's concept, design, and technical implementation on the GDR website and SSRN.com.

Already Complete 2023

Formulated the hybrid governance model. Designed the Global Currency Basket Peg system. Planned the Custom Consensus Algorithm. Developed the AI-Enhanced Security Measures concept.

Please note that this is a high-level roadmap and specific tasks within each quarter may vary depending on the project's progress and feedback from various stakeholders. The timeline may also adjust based on technical challenges, regulatory considerations, and market conditions.

Q2-2024

Official Launch of GDR Token

Officially launch the GDR platform.

Continue refinement and addition of features based on ongoing user feedback.

Q4-2023

Further develop economic modeling and long-term vision for the GDR.

Gather feedback from the community and make necessary revisions.

Q3 2023

Conduct initial testing of developed components for improvement

Evaluate the effectiveness of AI security measures and refine as necessary.

Already Complete 2023

Developed AI files, Blockchain Consensus Algorithm, Cryptography, Currency Basket, Custom Consensus, Governance, Main, Network, Smart Contract, Transaction, and Wallet in Python.

GDR token development in Solidity programming language.

Already Complete 2023

Conceptualization and Research

Identified the need for a new digital currency.

Defined the vision and purpose of the Global Digital Reserve (GDR).
