SATURDAY COURSES - AM

COPE pending G Caldwell 1hr

Thyroid and Thyroid Eye Disease

This course unravels and illustrates the close association between the eye and thyroid dysfunction. Clinical features, laboratory testing, clinical examination, and therapeutic options will be reviewed. The ocular manifestations and management of this condition will be discussed.

COPE pending – G Caldwell 1hr

Carotenoid Levels in Ocular Disease and Systemic Health

Carotenoids are nutrients that have been proven to protect the eye from light damage and several ocular pathologies. This course will review carotenoids, how to assess their levels, and identify the patients that would benefit from diet, lifestyle, and supplementation.

COPE 80296-PH Pharmaceutical Update - G Caldwell 2hr

COPE 82613-PH Complications of Pharmaceuticals - G Caldwell 1hr

This course will review the recently approved pharmaceuticals that are pertinent to optometric patient care. Pharmaceuticals covered will include but not limited to endocrinology, cardiology, vascular disease, infections, neurology, optometry, psychology, and urology. Indication of use, mechanism of action, and ocular side effects will be reviewed.

SATURDAY COURSES - PM

COPE pending – P Perrino

Everything You Want to Know About Diagnosing Glaucoma – 2hr

This interactive course will summarize the risk factors for glaucoma and talk in detail about the clinical evaluation of the patient suspected of having glaucoma. It will include a discussion of optic nerve analysis, nerve fiber layer evaluation, and visual field testing.

COPE 82926 – GL P Perrino

Treatment Considerations and Guidelines for Glaucoma – 2hr

This course reviews the different clinical decisions that face the optometrist managing glaucoma and discusses alternatives for each decision. It will discuss both the medical and surgical options available to patients who demonstrate progression of the disease.

SUNDAY COURSES - AM

COPE 82328-CL Mile Brujic – 1hr

What's New in Contact Lenses?

With the speed at which contact lens technologies are changing, it is critical to understand new developments. This course will assist the eye care professional to gain knowledge on the new options available to help improve their patients wearing experience.

COPE 78751-TD Mile Brujic – 2hr

Anterior Segment Updates

As Optometry's scope continues to increase, so do the technologies that allow us to diagnose and management anterior segment conditions. This course will review anterior segment conditions and optometry's role in managing these conditions.

COPE 79245 - GO M Brujic 2hr

Twelve New Treatments in Eye Care That You Need to Know

With the advancements in eye care, it is critical that the clinician understands these advancements and also how to incorporate them into clinical practice. This course will discuss ten new treatments in eye care that are important to understand and how to incorporate them into clinical practice

SUNDAY COURSES - PM

COPE 82256-PO D Gupta 2hr

An Optometrist's Guide to Surgery

This course will present a detailed discussion of common ocular surgeries such as cataract, LASIK, corneal cross-linking, and more. For each, we will discuss the criteria for surgery, overview of procedures, and the optometrist's role in post-op care.

COPE 81870-TD D Gupta 2hr

Clinical Pearls in Disease Management

This live course will provide a comprehensive review and update on properly diagnosing and managing patients with common ocular and systemic conditions.
