

# SULPHUR SUPPLY & INDUSTRIAL SOLUTIONS

Reliable Product. Controlled Quality. Global Execution.

Granular | Lump | Powder Sulphur

# Industrial Sulphur, Delivered with Precision

---

A structured supply approach built around consistency, control, and execution discipline.

TUAY GROUP supplies sulphur solutions for industrial and agricultural applications with a strong focus on product consistency, quality control awareness, handling discipline, and execution reliability.

Our commercial approach is built not only around supplying product, but also around reducing uncertainty throughout the transaction cycle. From product review and documentation alignment to loading coordination and customer-specific delivery planning, we work with a clear understanding of what professional buyers expect from a serious

In sulphur supply, trust is not created by claims. It is created by clarity, preparation, realistic communication, and disciplined follow-through. That is the approach TUAY GROUP brings to every transaction.

---

## What defines our approach

- Product consistency mindset
  - Inspection awareness
  - Structured communication
  - Loading discipline
  - Commercial responsiveness
  - Long-term supply orientation
- 

# Sulphur Grades for Diverse Needs

---

A comprehensive range of sulphur grades to match your application requirements.

TUAY GROUP provides a full spectrum of sulphur grades, each tested and verified to meet industry-specific needs and international standards.

## Granular Sulphur

Uniformly sized and shaped, ideal for various industrial and agricultural uses.

## Lump Sulphur

Suitable for industries that require larger pieces for specific processing needs.

## Powder Sulphur

Finely ground for applications demanding ~~low~~ reactivity and rapid dissolution.

Each grade is processed to the highest standards of clarity, purity, and consistency, ensuring optimal performance in their respective applications.

# Who We Are

---

A commercially disciplined supplier with an execution-focused approach.

TUAY GROUP operates with a commercially disciplined and execution-focused approach in industrial raw materials supply. In sulphur, our priority is to combine reliable product-presentation with clear communication, practical coordination, and professional transaction management.

We understand that professional buyers do not evaluate a supplier on price alone. They evaluate consistency, responsiveness, documentation clarity, and the ability to align product, inspection, loading, and delivery in a controlled manner.

Our role is not limited to offering product. Our role is to support a smoother, clearer and more dependable supply process from the first discussion to final execution.

## Core supply principles

### Clarity

Clear and structured communication at every stage.

### Control

Attention to product condition, inspection logic, and loading process.

### Execution

Practical coordination that supports reliable performance,

### Continuity

A business mindset built for long-term cooperation.

# Disciplined Logistics, Structured Operation

Reliability ensured by a meticulously managed sulphur logistics process.

At TUAY GROUP, operational excellence is ensured through a well-defined, meticulously executed logistics process. Key aspects of our structured operation include:

## Pre-loading inspection

Every shipment begins with a thorough inspection of product quality, packaging, and the loading environment.

## Documentation alignment

Detailed, accurate documentation ensures traceability and conformity with international shipment standards.

## Loading discipline

Precise handling methods to maintain product integrity, ensure proper containment, and avoid contamination.

## Commercial execution

Professional transaction management ensures contracts are carried out smoothly and exactly as agreed.

Our focus is to minimize risk and maximize consistency, making sure shipments are punctual and precise. This disciplined approach shows our unwavering commitment to quality and reliability.

# Measured Quality. Verified Consistency.

Inspection-driven.

Data-supported. Execution-aligned.

At TUAY GROUP, quality is not a promise — it is a controlled process. We ensure consistency and reliability through disciplined quality assurance measures at each stage of the sulphur supply chain.

At TUAY GROUP, quality is not a promise—it is a **controlled process**. We ensure consistency and reliability through disciplined quality assurance measures at each stage of the sulphur supply chain.

## Laboratory Analysis

Key parameters are verified through controlled testing environments.

## Physical Inspection

Product form and condition are reviewed for operational suitability.

## Documentation & Reporting

Clear reporting ensures transparency and commercial alignment.

## Global Standards

Testing procedures aligned with ASTM, ISO, and international trade expectations.

**Quality is not a claim.**

It is a controlled process applied at every stage.

# Strategic Supply Capability for Long-Term Decisions.

---

**Structured. Reliable. Built for continuity.**

TUAY GROUP operates with a structured approach to sulphur supply, designed for consistency, adaptability, and long-term execution.

We support professional buyers with reliable sourcing, clear communication, and disciplined operational coordination.

## Reliable Infrastructure

Sustained supply supported by structured logistics and sourcing stability.

## Regional Coverage

Operational flexibility across multiple supply and delivery zones.

## Adaptive Execution

Responsive coordination aligned with evolving buyer requirements.

**A long-term partner for structured sulphur supply decisions.**

# Technical Specifications.

Defined • Measured • Verified.

TUAY GROUP supplies sulphur products aligned with international industrial standards. Each parameter is defined, tested, and controlled to ensure consistent performance across all shipments.

## Product Specification – Industrial Sulphur

PARAMETER	UNIT	VALUE	TEST METHOD
Purity (Sulphur Content)	%	99.80 min	ASTM D4239
Moisture	%	0.5 max	ASTM E203
Ash Content	%	0.05 max	ASTM D3174
Acidity (as H <sub>2</sub> SO <sub>4</sub> )	%	0.02 max	ASTM D3702
Particle Size (Granular)	mm	2–7	ASTM E11 (Sieve Analysis)
Size Distribution:			
• 2~8 mm	%	min 90	ASTM E11
• ≤2 mm	%	max 10	ASTM E11
• >7 mm	%	max 10	ASTM E11

### Physical Characteristics

- Stable under normal storage conditions
- Low moisture sensitivity
- Free-flowing granular structure
- Non-toxic, industrial-grade material

### Standards & Compliance

- ASTM-compliant testing procedures
- ISO-aligned quality control systems
- Third-party inspection (SGS or equivalent)
- Batch-based verification and reporting
- Full documentation aligned with international trade standards

All specifications are subject to agreed tolerances and may vary slightly depending on product form (granular or lump).

Final values are confirmed through pre-shipment inspection and certification issued by an independent inspection company (SGS or equivalent).

# Execution, Structured and Controlled.

Each stage is defined, measurable, and aligned with operational realities.

Reliable sulphur transactions are not just about product availability—they depend on how time, coordination, and risk are controlled across each stage.

TUAY GROUP applies a structured, end-to-end execution process, ensuring clarity, discipline, and execution control across the entire supply chain.

Clarity in **timing** reduces risk.  
Clarity in **process** builds trust.

# Structured Trade. Secure Transactions.

---

Trade execution requires more than commercial agreement—it requires structure, discipline, and financial clarity.

At TUAY GROUP, contracts are designed with precision, ensuring that payment mechanisms, delivery obligations, and risk allocation are clearly defined and aligned with international trade practices.

From contract signature to final settlement, every transaction is supported by structured processes that ensure transparency, control, and execution reliability.

## Contract Structuring

Commercial terms are defined with clarity, ensuring alignment between contractual obligations and execution capability.

## Payment Security

Transactions are secured through structured financial instruments, ensuring reliability and protection for all parties.

## Banking Coordination

Close coordination with banking partners ensures seamless execution of financial processes across transactions.

## Global Trade Compliance

All transactions are aligned with international trade regulations and compliance UCP 600 • ICC Standards

## Risk-Controlled Transactions

Each trade is executed under predefined risk control measures, minimizing exposure and uncertainty. • Multi-layer risk structure

## Counterparty Confidence

Transparent processes and disciplined execution build long-term trust with global partners. Verified counterparties.

Discipline in trade builds confidence.  
Structure in execution ensures security.

# Execution Excellence. Operational Control.

---

## Execution defines reliability.

At TUAY GROUP, operations are managed with strict control procedures, ensuring that every stage—from material handling to vessel loading—is executed with precision and consistency.

Through coordinated field supervision, standardized workflows, and disciplined operational protocols, we ensure that execution aligns fully with contractual commitments.

## Field Supervision

On-site teams monitor operations continuously, ensuring alignment with defined procedures and execution standards.

## Loading Precision

Material handling and loading operations are executed with controlled methodologies to ensure consistency and cargo integrity.

## Execution Continuity

Operational flow is maintained without interruption, ensuring efficiency across all stages of execution.

## Operational Standardization

All processes follow structured operational frameworks designed to ensure repeatability and control.

Standard Operating Procedures

## Process Control

Each operational step is monitored and verified to ensure adherence to defined parameters.

Multi-stage verification

## Delivery Assurance

Final delivery performance is aligned with contractual expectations and operational benchmarks.

Control in **execution** ensures consistency.  
Consistency in **operations** ensures trust.

# Operating Across Global Trade Corridors.

---

TUAY GROUP operates across key global trade corridors, ensuring seamless coordination between origin, transit, and destination points.

Our network is built on strategic partnerships, port access, and operational presence in critical markets.

## Strategic Locations

Presence across major ports and tradehubs ensures operational efficiency and global accessibility.

## Integrated Logistics Flow

Coordinated movement across regions ensures consistency from origin to destination.

## Regional Expertise

Understanding of local regulations and operational environment strengthens execution reliability.

Middle East • Europe • Asia  
Primary Trade Corridors  
Multi-port access network

# Real Trade Flows. Proven Execution.

---

TUAY GROUP manages real trade flows across multiple origins, ensuring consistent movement of sulphur through established logistics routes.

## Origin Coordination

Sourcing from established producers ensures consistency in quality and availability.

---

## Poti • Jubail • Yanbu

Active Loading Ports

Multi-origin supply structure

A large industrial ship is docked at a port at night. A crane on the ship is lifting a large bucket filled with a bright yellow substance, likely sulphur, and dumping it into a barge. The scene is illuminated by the ship's lights and the bright yellow substance, creating a dramatic contrast against the dark night sky and water. The water reflects the lights from the ship and the crane.

Real trade builds credibility.  
Execution builds trust.

# Verified Quality. Controlled Assurance.

---

Quality control is embedded at every stage of TUAY GROUP operations, ensuring that sulphur shipments meet defined specifications and contractual standards.

Independent inspection and verification procedures are applied systematically, providing transparency and confidence across all transactions.

From sampling to certification, each step follows structured protocols aligned with international inspection practices.

## Inspection Coordination

Independent inspection agencies are engaged to verify quality and quantity at the point of loading.

## Sampling Procedures

Standardized sampling methodologies ensure accurate and representative analysis of cargo.

## Analytical Verification

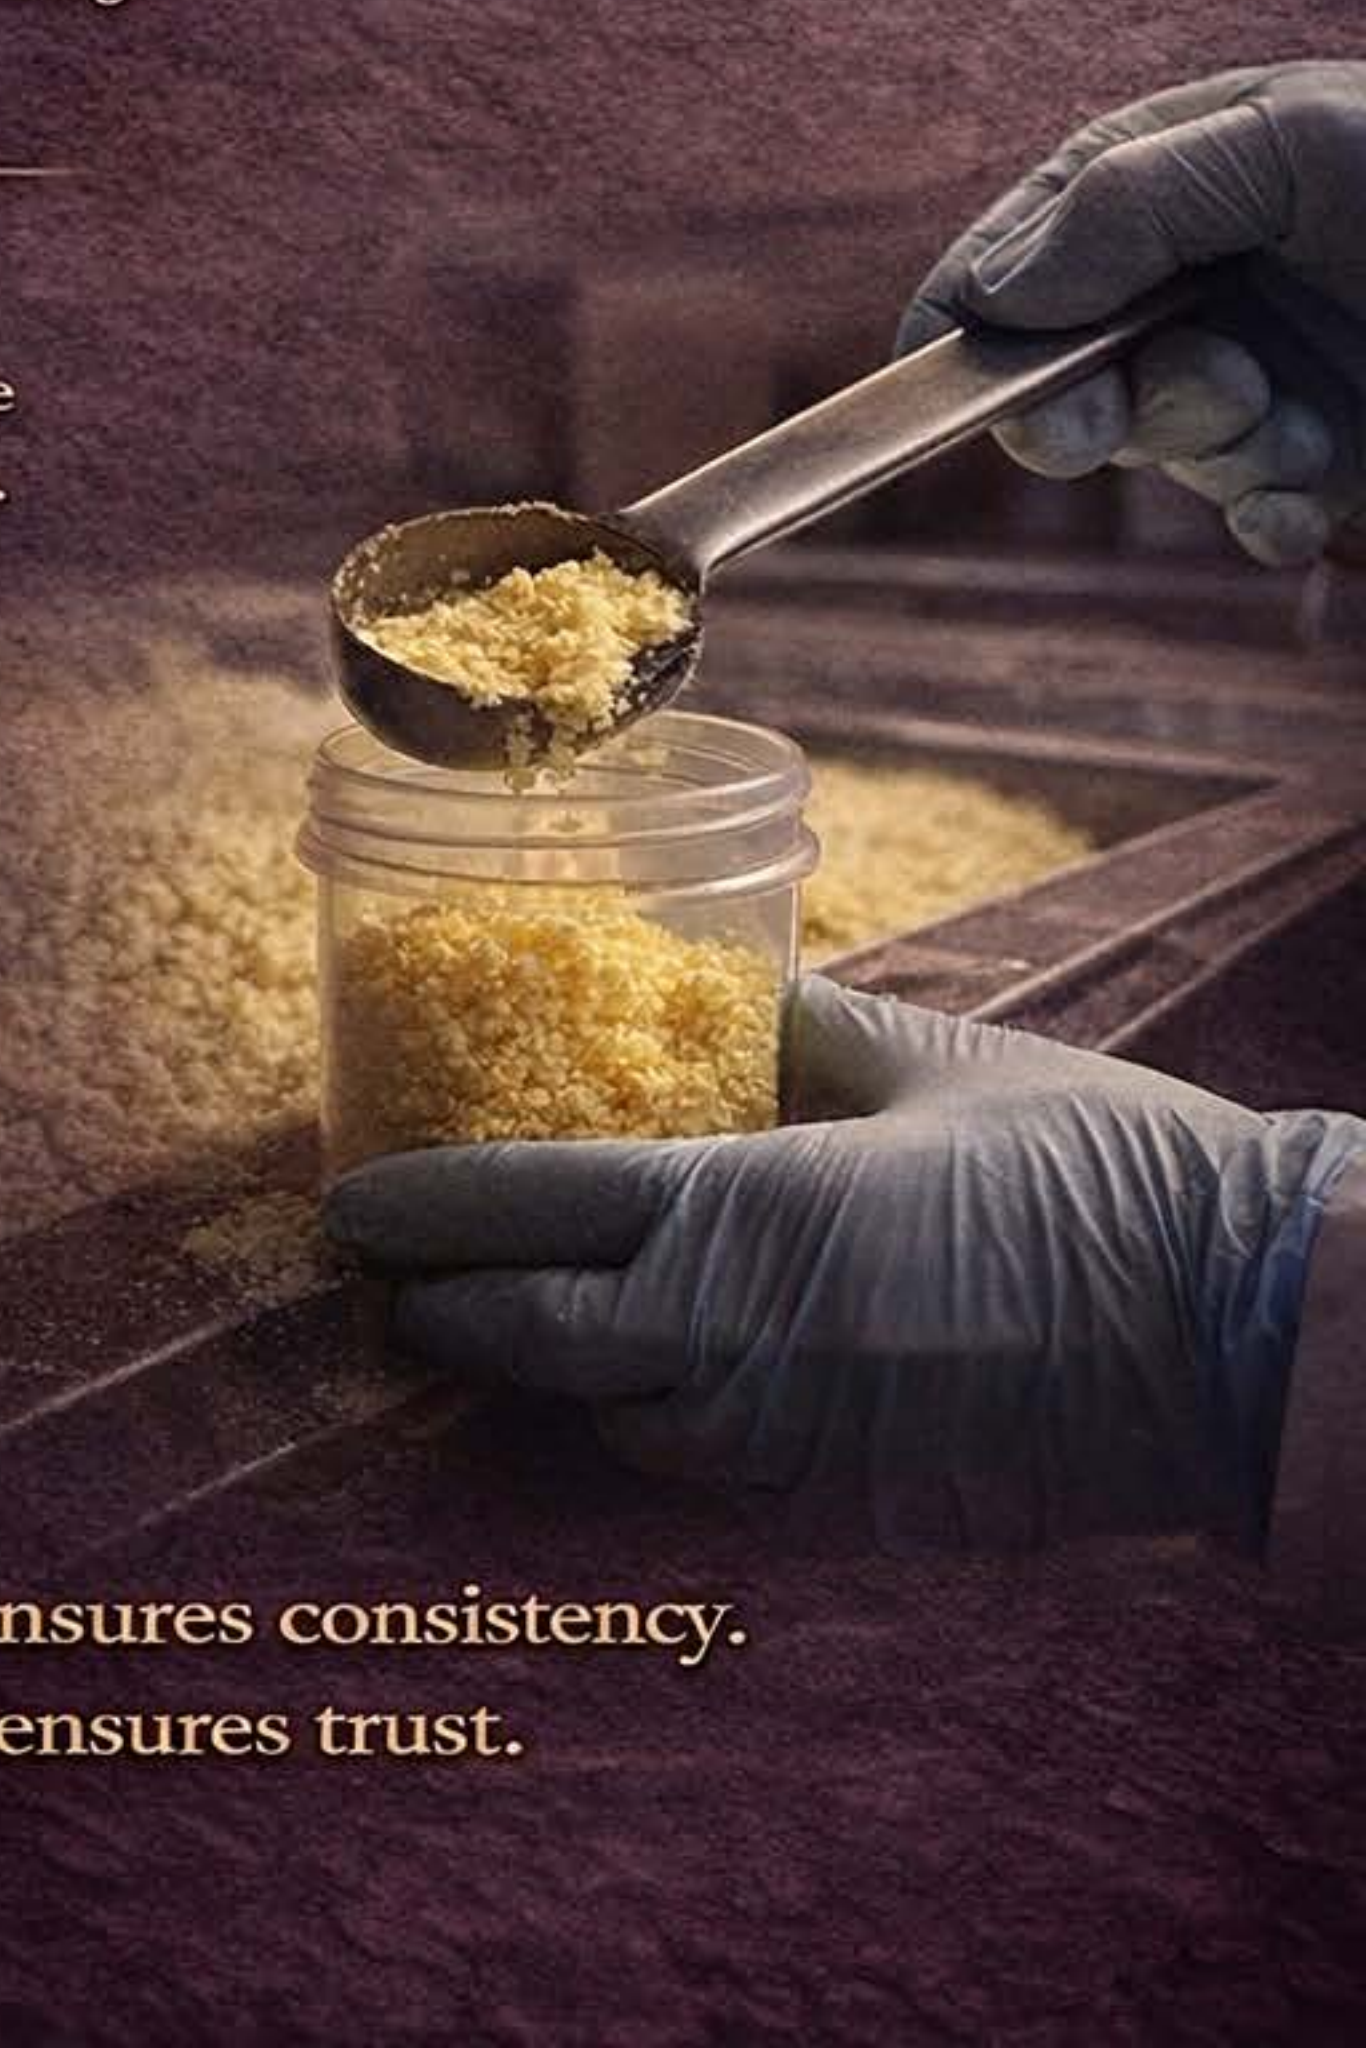

Laboratory analysis confirms compliance with agreed product specifications.

SGS or Equivalent

Independent Inspection

COA • Quality Reports

**Quality assurance ensures consistency.  
Verification ensures trust.**
