BENEFITS OF HYDRO EXCAVATION

ACCURACY

- ◆ Compared to manual shovel or excavators, our hydrovac's pressurized water can be precise in where the excavation is needed reducing the amount of backfill that will need done.

SAFETY

- ◆ The equipment is positioned away from the actual excavation eliminating the amount of clutter at jobsites.
- ◆ Water and vacuum technology eliminates the threat of a laborer hitting a line while digging with a shovel.
- ◆ AEP approved contractor!

COST

- ◆ Reduce the effects of other forms of excavation. Damage to surrounding utilities, pipes, and the environment are greatly lessened. Resulting in fewer repairs backfilling, material costs, and additional labor.
