HAZARDOUS SUBSTANCE SPILLS

Who to Contact:

- South Western PA Fish and Boat Commission: (814) 445-8974
- South Western PA Fish and Boat Commission 24 Hour Hotline: (800) 854-7365
- PaDEP Emergency Hotline: (800) 541-2050

- Homer City Generating Station: (724) 479-6189
- McCutcheon Enterprise (Spill Response Contractor): (724) 568-3623

Special Instructions:

- **CAUTION** – *gasoline spills pose both an environmental and flammability concern. The fumes from a spill will travel downwind from the spill increasing the area where ignition of the fumes could occur. Do not start your engine. Row or push your boat / PWC from the area of the spill. Extinguish all smoking materials. Eliminate any and all ignition sources such as charcoal / propane grills.*
- 
- If the spill occurs on land, make every attempt to contain the spill and eliminate the possibility of the spill reaching the water. Use towels, sand, dirt, and ditching to either absorb the spill or re-direct it from reaching the water. Contaminated soil will have to be removed and disposed of properly.
 - If the spill occurs on the water, exercise extreme caution. Again, do not start your engine to escape the area. Row the boat a safe distant from, and upwind of, the spill before starting the engine. Keep other boaters away from the area.

Additional Information:

- Collect a sample of the spilled material if possible.
 - Timely notification and response to a spill that occurs on the water is extremely important. Both the Pennsylvania American Water Company and the Homer City Station withdraw water from Two Lick Creek for drinking water purposes and with proper notification, can initiate protective measures at their intake facilities. **WARNING:** Significant agency fines are imposed for not responding responsibly to a hazardous material spill.

TWO LICK DAM RELATED EMERGENCIES

Should you observe an abnormal event associated with the Two Lick Reservoir Dam, it is imperative that you contact the Homer City Generating Station immediately. An abnormal event may include, but is not limited to, an indication of slope movement on the earthen section of the dam, fast moving or whirl pooling of water in front of the dam, turbid water localized in front of the dam, and/or suspicious behavior by a person or persons on or about the dam.

Who to Contact:

- Homer City Generating Station (24 Hour Number): (724) 479-6189

Special Instructions:

- Immediately leave the area of the dam.
- Notify other boaters in the main body of the reservoir and proceed directly to the boat launch area.
