

“People should talk less and draw more”
Goethe, J.W. Von

Low Tech, High Touch

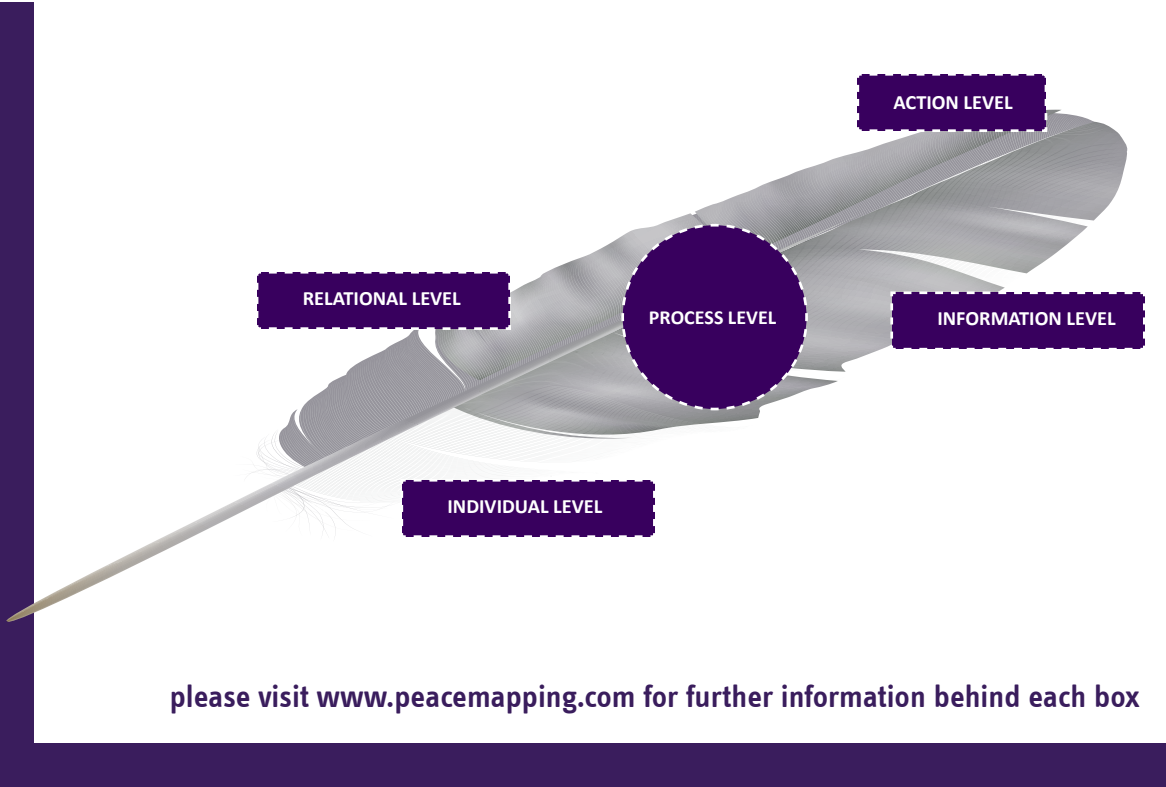

**VISUAL FACILITATION FOR THE
CONFLICT RESOLUTION COMMUNITY**

Peace Mapping

PEACEMAPPING.COM

- Provides interactive visual facilitation for mediation and peacebuilding sessions.
 - The visual facilitator closely collaborates with the mediator(s), by graphically mapping out the process in different stages.
 - Peacemapping supports the group thinking in gathering information, strategic visioning, developing solutions and transforming conflict dynamics.
- Has been developed by Susanne Hoogwater (41). She is a graphic facilitator, creative lawyer, author and artist. She completed basic mediation training. She is an expert in visual communication and is highly motivated to contribute her skills to conflict resolution work.
- Susanne is a native from the Netherlands, and lives in the Denver area, Colorado, United States .

GRAPHIC RECORDING

Graphic recording is a process that actively engages people with the information they are exchanging or receiving. They see their stories evolve on flip charts and hand-drawn maps.

A graphic recorder is an active listener in the room. She listens, synthesizes and organizes the information. The information will be enriched with images, metaphors and other visual elements. The real time drawing process gives a refreshing human touch to the information.

Graphic recording is a process that is used in a variety of settings for collaborative and strategic thinking, problemsolving and planning in corporations, non-profit organizations, an education.

For more information visit the website of the International Organization of Visual Practitioners - www.ifvp.org
