## Plants to Attract & Feed

### Hummingbirds

One good way to enjoy the company of hummingbirds is planting a **hummingbird garden**. In addition to providing them a natural diet, a hummer garden is an excellent way to attract birds to your nearby **feeder**: since hummingbirds feed by sight on regularly-followed routes - called traplining - their inquisitive nature will quickly lead them to investigate any possible new source of food.

#### Trees and Shrubs

- Azalea
- Butterfly Bush (Buddleia)
- Cape Honeysuckle
- Flame Acanthus
- Flowering Quince
