BUTTERFLY GARDENS

Don't forget the Nursery -

Without the Caterpillars, we will not have the Butterflies !!

In creating our Butterfly Garden, you will want some plants that will be eaten by the caterpillars. Use insecticides sparingly.

Place the plants in an area that is inconspicuous, because the plants will look a little shredded as they get eaten !! Also place these plants in an area that is sheltered where they will not be subject to gusts of wind.

Host Plants:

Milkweed
Passion Vines
Parsley
Dill
Fennel
Citrus
Pipevine
