

BELÉZA™

BY VASAYO™

LIPOSOMAL REJUVENATING CREAM

Rejuvenating Cream uses **reproage™**, a powerful peptide that “switches off” the skin’s response to the genetic, environmental, and lifestyle factors that trigger aging.

1

“Reprograms”
the Skin to
Deflect Aging
Triggers

2

Brightens &
Nourishes
for Younger
Looking Skin

3

Enables Even
the Driest Skin
to Retain
Moisture

Skin ages because of genetics, environmental influences, and lifestyle habits (diet, sleeping patterns, exercise, etc.).

Each of these elements trigger organic responses that cause your skin to look tired, saggy, and wrinkled. But what if there was a way to “switch off” this function?

Beléza Rejuvenating Cream was formulated with **reproage™** peptide and a high-performance blend that directs skin cells to fend off the aging triggers and regenerate as younger skin does for luminous, silky results.

CLINICAL VALIDATION*

After 14 Days

Increase in hydration by 90%

After 28 Days

Elasticity improvement & wrinkle-depth reduction

*Based on a twice-a-day-application study on the active ingredients conducted by Lipotec S.A.U.

VASAYO-LIPOTEC PARTNERSHIP

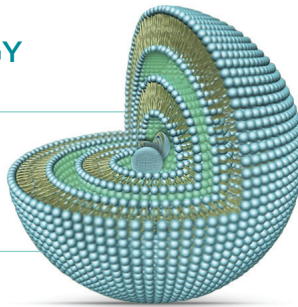

Vasayo is proud to share an exclusive partnership with Lipotec S.A.U., the global leader in the pioneering of liposomal skin care solutions, headquartered in Barcelona, Spain.

“This collaborative effort will forever change the face of skin care.”

JEAN-CLAUDE DENEUVILLE
Global Director Agile Businesses

ADVANCED LIPOSOMAL TECHNOLOGY

Beléza by Vasayo's Advanced Liposomal Technology delivers nutrients deep into the epidermal layer allowing for optimal dispersion of active ingredients.
