

TBB SAFE™

Digital Technology Lifecycle Protection

Strategy

- Cyber governance assessment
- Technical project planning
- Technology category identification

Education

- Corporate staff cybersecurity awareness training
- IT staff cyber orientation
- Controls systems engineer cyber training (Red-Blue team cyber exercises)

Architecture

- Technology market research
- Technology down selection
- Technology - layered defense cyber architecture mapping

Field Deployment

- Software cyber vulnerability scanning
- Application data fuzz testing
- Technology implementation/configuration
- Cyber penetraton testing/mitigation
- Failure scenario development/mitigation
